

# Diabetes Annual Report

Reporting Period: 2022-2023 school year

## Executive Summary

[Ohio law](#) requires traditional public school districts, community schools, STEM schools, and chartered nonpublic schools to annually report the number of students enrolled with a diagnosis of diabetes and the number of diabetic medication administration errors. Diabetic medication administration errors include incorrect administration of insulin such as giving too little, too much, or at the wrong times. During the 2022-2023 school year, public schools and districts reported diabetes information in the Education Management Information System (EMIS). Nonpublic schools reported in the Nonpublic Schools Data System (NPDS). The Department contacted all schools and districts that did not report in EMIS or NPDS and requested that they report in a Microsoft Forms tool.

## 2022-2023 School Year Reporting Results<sup>1</sup>

Number of districts and schools responding to the medical reporting of diabetes care	1,622
Number of students with diabetes enrolled in 2022-2023	6,576
Total diabetes medication errors reported by districts and schools	87

Of the 1,622 Ohio districts and schools that reported diabetes data, there were 6,576 students with diabetes enrolled and 87 diabetic medication errors reported during the 2022-2023 school year.

The Ohio Department of Education and Workforce’s Office of Whole Child Supports provides technical assistance to districts and schools to help reduce diabetic medication errors. The Department’s [Supporting Students with Diabetes webpage](#) also provides requirements, staff training materials, and information about diabetes management in schools.

Appendix A includes schools that are not included in this annual report because they did not report the numbers of diabetic students or diabetic medication errors in EMIS, NPDS, or the Microsoft Forms tool.
