1.2 GENERAL DATA CHARACTERISTICS

FILE DESCRIPTIONS

This section presents the file descriptions for each of the EMIS records to be transferred to the designated Information Technology Center sites. Each file description includes:

- the data elements,
- their characteristics,
- field number,
- position in the file, and
- field size.

These file descriptions will be used by individuals responsible for formatting the school district data. Persons responsible for this task may be a vendor, district personnel, designated data acquisition site staff, or the Ohio Department of Education staff involved in the creation or use of the EMIS data.

Picture Clause Symbols

Symbol	Meaning
X	Alphanumeric field
A	Alphabetic field
9	Numeric field
V	Indicates position of assumed decimal point; used only in numeric fields, does not count toward data item size.
S	Operational sign. Used only in numeric fields. All signed number fields must use a trailing separate character.

FORMATTING RULES AND NOTES

Unless otherwise stated, **alphanumeric fields** must be left justified and filled with trailing spaces.

Numeric fields must be right justified and filled with leading zeroes.

All signed numeric fields must contain a trailing separate sign character. The sign character immediately follows the numeric digits. The sign character must be either a "+" or "-" (ASCII values 44 and 46 respectively). For example, the picture S9(9)V99(s) represents 11 numeric digits followed by a sign field. This field would have a total size of 12 bytes.

For **date fields**, CCYYMMDD represents the required format for the date. For example, the value for May 2, 2006, is 20060502.

A field format of **Y/N** indicates that the field is entered as either "Y" or "N."

Areas defined as **"Filler**" are blank areas to maintain the position of remaining elements when an element in the middle of a record is deleted. Filler areas are ignored by ODE when files are loaded.

EMIS IDENTIFYING FIELDS

The following table contains fields for each record type that are considered "key" fields. Key fields are those that can be used to uniquely identify each record.

The State Student ID (SSID) is required in the Student Standing Record for all students, Student Attribute- No Date Record for all students reported in the Graduate reporting period, and in the Graduation-Only Record for any student reported on that record type. All other student IDs are those supplied by the local student management software and will be replaced with the State Student ID (SSID) during the submission process at the Information Technology Center Site. In the file layouts these other State Student IDs (SSID) are called EMIS Student IDs. This element is the district-determined number used by districts for student tracking.

For student, staff and financial records, the first 31, 31 and 35 positions respectively of each record are always required. The elements listed in the table below are in addition to the preliminary parts of each record.

Terms Used

Sort Type identifies the record type, i.e., CI (Staff Demo), CK (Staff Job), GQ (Student Program), GG (Gifted), etc. It is 2 characters in length. The sort type is critical and basically determines which type of data is on the record. The Data Collector will use this to determine into which file the records are to be loaded. For example, a GI record will be loaded into the Student Demographic Record and the GI record layout is assumed for all of the fields being loaded.
