

ODE EMIS MANUAL

Section 4.7: Subject Codes

Version 5.0
September 11, 2015

REVISION HISTORY

The revision history sections of the EMIS Manual provide a means for readers to easily navigate to the places where updates have occurred. Significant changes and updates are indicated through red text for additions and strike throughs for deletions. Minor changes—such as typos, formatting, and grammar corrections or updates—are not marked.

| Version | Date | Effective Date (FY & Reporting Period) | Change # | Description |
|---------|----------|--|----------|---|
| 2.0 | 9-20-12 | FY13 October (K) | 907 | Deleted the following subject codes: 010301, 010201, 010901, 012000, 011001, 010601, 010701, 010001, 010150. |
| 2.0 | 9-20-12 | FY13 October (K) | 907 | Added the following subject codes: 012015, 012020, 012025, 010718, 010716, 010717. |
| 2.0 | 9-20-12 | FY13 October (K) | 907 | Changed the name of course code 990361. |
| 2.0 | 11-27-12 | FY13 October (K) | FY12 875 | Deleted the following subject codes: 151207, 150210, 151131, 152410, 150110. |
| 3.0 | 10/16/13 | FY14K | 839 | Deleted the following subject codes: 120000, 230000, and 220000. |
| 3.0 | 10/16/13 | FY14K | 997 | Added a number of courses in each of the following career fields: Information Technology, Health Science, Law & Public Safety, Engineering & Science Technologies, Manufacturing Technologies, Construction Technologies, and Transportation Systems. |
| 3.1 | 10/31/13 | FY14K | 997 | The following new courses were added twice in v3.0: 178000, 178029, 175001, 072000, 072005, 072010, 145120, 145115, 170911, 176000, and 177000. The duplicate entries have been deleted. |

| Version | Date | Effective Date (FY & Reporting Period) | Change # | Description |
|---------|----------|--|----------|---|
| 3.2 | 1/10/1 | FY14K | 1039 | Marked the following subject codes as to be deleted before the start of FY16: 170005, 170100, 171001, 171002, 171003, 171004, 171005, 171007, 171011, 171017, 171100, 171805, 171806, 173601, 171821, 171822, 171402, 171504, 171815, 171816, 171817, 171818, 171819, 175000, 170007, 171600, 171810, 171820, 171825, 070005, 070101, 070103, 070203, 070204, 070302, 070303, 070305, 070307, 070410, 070603, 070904, 070906, 070912, 070913, 071100, 070994, 074820, 074830, 074840, 074850, 074890, 140200, 140210, 140220, 140230, 140240, 172801, 172802, 172808, 172810, 172811, 172812, 172815, 170370, 170006, 171012, 171300, 171503, 172302, 172306, 170350, 170301, 170302, 170303, 170400, 170401, 170403, 170801, 171200, and 173100. |
| 3.3 | 4/14/14 | FY14N | 1009 | A number of math subject code descriptions have been updated to align with new standards. Subject code 110050 was marked to be deleted in FY15. The following subject codes were added: 110060, 110065, 111960, 111970, 111980, and 111350. |
| 3.3 | 4/14/14 | FY14N | 947 | A number of science subject code descriptions have been updated to align with new standards. The following subject codes were marked as to be deleted in FY15: 132212, 132214, 132216, 132240, and 139905. The following subject codes were added: 134250, 139960, and 139970. |
| 4.0 | 9/17/14 | FY15L, Initial | 1105 | Added 050103 Reading 3-4 and 050153 Integrated English Language Arts 3-4. |
| 4.1 | 10/22/14 | FY15L, Initial | 1111 | Marked the following subject codes as to be deleted before the start of FY17: 140050, 140075, 140300, 140310, 140320, 140800, 140025, 140100, 140110, 040805, 040810, 040815, 041900, 042010, 042015, 042020, 042025, 042030, 042035, 042040, 042045, 044110, and 044100. |
| 4.1 | 10/22/14 | FY15L, Initial | 1009 | Corrected the name of course 110500. |
| 4.1 | 10/22/14 | FY15L, Initial | 1111 | Changed the names of the following subject codes: 177014, 177015, 177016, 177017, and 177018. |

| Version | Date | Effective Date (FY & Reporting Period) | Change # | Description |
|------------|----------------|--|--------------|---|
| 4.1 | 10/22/14 | FY15L, Initial | 1111 | Added a number of courses in each of the following career fields: Arts and Communications, Engineering and Science Technologies, Health Science, Human Services, Law and Public Safety, and Business and Administrative Services. |
| 4.1 | 10/22/14 | FY15L, Initial | 1111 | Added a career development code (990363). |
| 4.1 | 10/22/14 | FY15L, Initial | 1111 | Career Fields 03, 07, and 15 were combined into one table for Business Administration courses. |
| 4.1 | 10/22/14 | FY15L, Initial | 1009 | Subject code 110050 was deleted. |
| 4.1 | 10/22/14 | FY15L, Initial | 947 | Subject codes 132212, 132214, 132216, 132240, and 139905 were deleted. |
| <u>5.0</u> | <u>9/11/15</u> | <u>FY16L, Initial</u> | <u>30349</u> | <u>Added the following subject codes: 010125, 010130, 010945, 010640, 142050, 330130, 330000, 330100, 330125, 330105, 330110, 330120, 330025, 330021, 330040, 330030, 330035, 176009, 990364, 990365, 090191, 091201, 091205, 091210, 091215, 091220, 091225, 093010, 093015, 091403, 091053, 091052, 091402, 091500, 091505, 091501, 093005.</u> |
| <u>5.0</u> | <u>9/11/15</u> | <u>FY16L, Initial</u> | <u>30349</u> | <u>Deleted the following subject codes: 170005, 170100, 171001, 171002, 171003, 171004, 171005, 171007, 171011, 171017, 171100, 171805, 171806, 173601, 171821, 171822, 171402, 171504, 171815, 171816, 171817, 171818, 171819, 175000, 170007, 171600, 171810, 171820, 171825, 070005, 070101, 070103, 070203, 070204, 070302, 070303, 070305, 070307, 070410, 070603, 070904, 070906, 070912, 070913, 071100, 070994, 074820, 074830, 074840, 074850, 074890, 140200, 140210, 140220, 140230, 140240, 172801, 172802, 172808, 172810, 172811, 172812, 172815, 170370, 170006, 171012, 171300, 171503, 172302, 172306, 170350, 170301, 170302, 170303, 170400, 170401, 170403, 170801, 171200, 173100.</u> |
| <u>5.0</u> | <u>9/11/15</u> | <u>FY16L, Initial</u> | <u>30349</u> | <u>Modified the name or definition for a few career technical subject codes.</u> |

4.7 SUBJECT CODES

ACADEMIC CONTENT AREAS SECTION

Fine Arts Section

Table 1. Dance Codes (0803xx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 080312 | Introduction to Dance A study of the skills and processes necessary to understand and experience dance as an art form and as a means of meaningful communication. Emphasis is placed on kinesthetic intelligence and the fundamentals of dance and choreography. Study also emphasizes the role of dance throughout history and in different cultures. | FAR | Arts |
| 080315 | Comprehensive Dance A comprehensive study of the knowledge and processes of creating, performing, responding to, and representing ideas through the art form of dance. Multiculturalism, art history, art criticism and aesthetics are incorporated into course content and dance experiences for individual and group learning. | FAR | Arts |

Table 2. Drama/Theatre Arts Codes (050xxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 050337 | Drama/Theatre in grades K-8 The study of dramatic elements and theatrical techniques, particularly in an improvisational, non-exhibitional, process-centered manner, designed to develop imagination, communication, and expressive skills. | N/A | Arts |
| 050600 | Theatre Arts Subject matter and experiences are concerned with a wide range of studies and activities including playwriting, dramatic literature, scene design, technical theatre, acting, directing, and the supporting of arts and crafts of the theatre and of selected aspects of video, radio, television and film. | FAR | Arts |

Table 3. Music Codes (12xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 122000 | Music (K-8) Organized study of the elements and styles of music and the historical, cultural and societal context of music designed for all pupils in grades K-8. | N/A | Arts |
| 120001 | General Music Organized subject matter and musical experiences consisting of an extensive and varied study of music designed for all pupils in grades K-12. | FAR | Arts |
| 120300 | Music Theory The study of the principles of music, including rudiments, harmony, counterpoint, form and analysis, orchestration and skills such as sight singing, ear training, conducting and composing. | FAR | Arts |
| 120400 | Vocal/Choral Music Learning experiences designed for the study of vocal / choral repertoire and the development of vocal / choral skills through solo and ensemble performance. | FAR | Arts |
| 120500 | Instrumental Music Learning experiences designed for the study of instrumental repertoire and the development of instrumental skills through solo and ensemble performance. | FAR | Arts |
| 120800 | Music Appreciation Organized subject matter and learning experiences designed to further pupils' knowledge, comprehension, and appreciation of various types and styles of music. | FAR | Arts |
| 129999 | Other Music Course A music course that is given for high school credit toward graduation that is different in scope from any of the other SUBJECT CODES described above and which addresses important content (knowledge and skills) in the study of music. | FAR | Arts |

Table 4. Visual Art Codes (02xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 020012 | Visual Art (K-12) A study of the knowledge, skills and processes for observing, creating, responding and communicating in ways that are unique to visual art. Art production and the construction of meaning in visual artworks are complimentary learning activities. Course content may include meaningful connections between visual art and other disciplines to enable students to understand art in a broader context. | FAR | Arts |
| 020100 | Art Appreciation The study of works of visual art from various historical, cultural and social contexts. Instruction addresses multiple strategies for inquiry to enable students to develop and present their own views and responses to specific artworks and to discuss the viewpoints of others. | FAR | Arts |
| 020101 | Art History This course examines the reciprocal impact between visual art and historical, cultural, social and political contexts. Key artworks are studied chronologically and thematically with emphasis on subject matter, ideas, and the formal, technical and expressive aspects of the works. | FAR | Arts |
| 020210 | Design This course emphasizes study of the elements and principles of art and design. Students explore, organize, and use the elements and principles to create two- and three-dimensional original work in various forms and media. | FAR | Arts |
| 020240 | Crafts Students acquire utilitarian skills including weaving, jewelry-making, fabric crafting, basketry, metalsmithing, leather-shaping, and wood-forming. Objects by professional craftspersons are studied for their formal, expressive, and technical qualities. | FAR | Arts |
| 020242 | Ceramics Original objects (primary pottery and sculpture) are created with clay using hand building, casting, wheel forming, and glazing techniques. Objects created by professional ceramists are examined for their expressive, formal, and technical qualities. | FAR | Arts |
| 020250 | Drawing and Painting Pencil, pen and ink, chalk, charcoal, acrylics, oils, and watercolors are explored to create original personal images. Drawings and paintings by culturally and historically representative artists are examined for their formal, expressive, and technical qualities. | FAR | Arts |
| 020270 | Photography and Film Making Still and motion picture camera procedures are investigated along with darkroom developing and printing techniques. The expressive, formal, and technical qualities of professional work are studied. | FAR | Arts |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 020280 | <p>Printmaking Linoleum block printing, woodblock printing, silk-screen printing, and etching are studied as processes for expressing ideas. Professional printmakers' products are also examined.</p> | FAR | Arts |
| 020290 | <p>Sculpture Various media such as clay, metal, wood, stone, and wire and various processes such as carving, casting, soldering, and modeling are investigated as means for creating three-dimensional artistic forms. Professional sculptors' works are studied.</p> | FAR | Arts |
| 029902 | <p>Advanced Visual Art An advanced course of organized subject matter and experiences in art. Works from different cultures and time periods as well as those created by the students are studied.</p> | FAR | Arts |
| 020320 | <p>Graphic Arts/Unified Arts Computer design is explored to develop understanding of techniques, processes and possibilities of electronic media to understand, create and appreciate visual art.</p> | FAR | Arts |
| 029100 | <p>Studio Art – Drawing A course in drawing for students who are highly motivated and have previous training in art.</p> | FAR | Arts |
| 029110 | <p>Studio Art – 2D Design A course in two-dimensional art design for students who are highly motivated and have previous training in art.</p> | FAR | Arts |
| 029120 | <p>Studio Art – 3D Design A course in three-dimensional art design for students who are highly motivated and have previous training in art.</p> | FAR | Arts |
| 029999 | <p>Other Visual Art Course A course that is given for high school credit toward graduation, but that is different in scope from any of the other SUBJECT CODES described above and which addresses important content (knowledge and skills) in the study of visual art.</p> | FAR | Arts |

Business Education Section

Table 5. Business Education (Non-Career Technical) Codes (03xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 030100 | <p>Accounting Instruction focuses on the management of a company’s financial resources including the accounting cycle, financial statements, and interpretation and use of financial data. Content should be based on National Business Education Association (NBEA) content standards. Only grade 9-12 courses based on standards from the 9-12 grade band of NBEA Standards are eligible for high school credit.</p> | BUS | — |
| 030500 | <p>Business Mathematics Students develop the skills necessary to solve mathematical problems, analyze and interpret data, and apply sound decision-making skills in business. Content should be based on National Business Education Association (NBEA) content standards. Only grade 9-12 courses based on standards from the 9-12 grade band of NBEA Standards are eligible for high school credit.</p> | BUS, MTH | Mathematics |
| 030600 | <p>Business Communications Students master the oral and written communication skills essential to interacting effectively with people in the workplace and society. Content should be based on National Business Education Association (NBEA) content standards. Only grade 9-12 courses based on standards from the 9-12 grade band of NBEA Standards are eligible for high school credit.</p> | BUS, ENG | English |
| 030900 | <p>Business Law Addresses statutes and regulations affecting businesses, families and individuals in their related roles. Content should be based on National Business Education Association (NBEA) content standards. Only grade 9-12 courses based on standards from the 9-12 grade band of NBEA Standards are eligible for high school credit.</p> | BUS | — |
| 031500 | <p>Personal Finance Students develop and utilize rational decision-making processes to form personal financial decisions in their roles as citizens, workers, and consumers. Content should be based on National Business Education Association (NBEA) content standards. Only grade 9-12 courses based on standards from the 9-12 grade band of NBEA Standards are eligible for high school credit.</p> | BUS | — |
| 031700 | <p>Computer Programming and Software Development Students design, develop, test and implement computer programs using structural/procedural, objective oriented, data description, scripting/control, and/or mark-up languages. Content should be based on National Business Education Association (NBEA) content standards. Only grade 9-12 courses based on standards from the 9-12 grade band of NBEA Standards are eligible for high school credit.</p> | BUS, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 031800 | Business Economics Develops student's abilities to make wise economic decisions related to their personal financial affairs, the successful operation of organizations, and the economic activities of the country. Content should be based on National Business Education Association (NBEA) content standards. Only grade 9-12 courses based on standards from the 9-12 grade band of NBEA Standards are eligible for high school credit. | BUS, SOC | Economics |
| 032300 | Introduction to Business/General Business The study of domestic and international business operations including start-up, financing, management, and standard practices. Content should be based on National Business Education Association (NBEA) content standards. Only grade 9-12 courses based on standards from the 9-12 grade band of NBEA Standards are eligible for high school credit. | BUS | — |
| 032800 | Office Procedures Instruction in office practices and procedures, office technology, office environment, records management, human relations, and telephone techniques. Content should be based on National Business Education Association (NBEA) content standards. Only grade 9-12 courses based on standards from the 9-12 grade band of NBEA Standards are eligible for high school credit. | BUS | — |
| 033450 | Business (Other) Abbreviated written and/or electronic communications. | BUS | — |
| 036000 | Computer Application Students identify, evaluate, select, install, use, upgrade, and customize application software. Computer applications include word processing, database, spreadsheet, presentation, and calendaring/scheduling software. Content should be based on National Business Education Association (NBEA) content standards. Only grade 9-12 courses based on standards from the 9-12 grade band of NBEA Standards are eligible for high school credit. | BUS, TEC | — |

English Language Arts Section

Table 6. English Language Arts Codes (05xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 050102 | <p>Reading K-3 This course should address the content in the K-3 portion of Ohio’s academic content standards for reading. Reading instruction should include the reading of a variety of text (e.g., informational and literary), application of comprehension strategies and the building and extending of vocabulary.</p> | N/A | Reading |
| 050103 | <p>Reading 3-4 This course should address the content in the 3-4 portion of Ohio’s academic content standards for reading. Reading instruction should include the reading of a variety of text (e.g., informational and literary), application of comprehension strategies and the building and extending of vocabulary. This course should contain a majority of 4th graders, but will also include 3rd graders who have been retained due to Third Grade Reading Guarantee.</p> | N/A | Reading |
| 050104 | <p>Reading 4-6 This course should address the content in the 4-6 portion of Ohio’s academic content standards for reading. Reading instruction should include the reading of a variety of text (e.g., informational and literary), applications of the comprehension strategies and the building and extending of vocabulary.</p> | N/A | Reading |
| 050106 | <p>Reading 7-8 This course should address the content in the 7-8 portion of Ohio’s academic content standards for reading. Reading instruction should include the reading of a variety of text (e.g., informational and literary), applications of the comprehension strategies and the building and extending of vocabulary.</p> | N/A | Reading |
| 050152 | <p>Integrated English Language Arts K-3 Instruction should be based on the benchmarks and indicators for grades K-3. Students should read grade appropriate text and use a variety of comprehension strategies for different purposes, utilize the writing process, write for different purposes and different audiences, research self-selected or assigned task and use effective communication techniques.</p> | N/A | Language Arts |
| 050153 | <p>Integrated English Language Arts 3-4 Instruction should be based on the benchmarks and indicators for grades 3-4. Students should read grade appropriate text and use a variety of comprehension strategies for different purposes, utilize the writing process, write for different purposes and different audiences, research self-selected or assigned task and use effective communication techniques. This course should contain a majority of 4th graders, but will also include 3rd graders who have been retained due to Third Grade Reading Guarantee.</p> | N/A | Language Arts |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 050154 | Integrated English Language Arts 4-6 Instruction should be based on the benchmarks and indicators for grades 4-6. Students should read grade appropriate text and use a variety of comprehension strategies for different purposes, utilize the writing process, write for different purposes and different audiences, research self-selected or assigned task and use effective communication techniques. | N/A | Language Arts |
| 050156 | Integrated English Language Arts 7-8 Instruction should be based on the benchmarks and indicators for grades 7-8. Students should read grade appropriate text and use a variety of comprehension strategies for different purposes, utilize the writing process, write for different purposes and different audiences, research self-selected or assigned task and use effective communication techniques. | N/A | Language Arts |
| 050160 | Integrated English Language Arts I Integrated Language Arts Instruction addresses the content and skills of Ohio’s Academic Content Standards for English Language Arts. Instruction should be based on the benchmarks for grades 8-10 and grade level indicators for grade <i>nine</i> . Students will read a variety of texts for different purposes, utilize the writing process, write for different purposes and different audiences, research self-selected or assigned topics use an appropriate form to communicate their findings and continue to use effective communication techniques. | ENG | Language Arts |
| 050170 | Integrated English Language Arts II Integrated Language Arts Instruction addresses the content and skills of Ohio’s Academic Content Standards for English Language Arts. Instruction should be based on the benchmarks for grades 8-10 and grade level indicators for grade <i>ten</i> . Students will read a variety of texts for different purposes, utilize the writing process, write for different purposes and different audiences, research self-selected or assigned topics use an appropriate form to communicate their findings and continue to use effective communication techniques. | ENG | Language Arts |
| 050180 | Integrated English Language Arts III Integrated Language Arts Instruction addresses the content and skills of Ohio’s Academic Content Standards for English Language Arts. Instruction should be based on the benchmarks for grades 11-12 and grade level indicators for grade <i>eleven</i> . Students will read a variety of texts for different purposes, utilize the writing process, write for different purposes and different audiences, research self-selected or assigned topics, use an appropriate form to communicate their findings and continue to use effective communication techniques. | ENG | Language Arts |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 050190 | <p>Integrated English Language Arts IV Integrated Language Arts Instruction addresses the content and skills of Ohio’s Academic Content Standards for English Language Arts. Instruction should be based on the benchmarks for grades 11-12 and grade level indicators for grade <i>twelve</i>. Students will read a variety of texts for different purposes, utilize the writing process, write for different purposes and different audiences, research self-selected or assigned topics use an appropriate form to communicate their findings and continue to use effective communication techniques.</p> | ENG | Language Arts |
| 050014 | <p>Intervention English This course is designed for remedial study with emphasis on the English language arts Academic Content Standards and the Ohio Graduation Test.</p> | ENG | English |
| 050119 | <p>Intervention Reading This course is designed to provide special assistance in the development of reading skills and strategies for students who cannot construct meaning from what they read. Instruction addresses content from the reading benchmarks of the English language arts Academic Content Standards.</p> | ENG | Reading |
| 051905 | <p>English as a Second Language (ESL) Designed for individuals whose primary language is not English. The study of the English language and culture leading to the ability to function in everyday situations as well as in academic settings, with a special emphasis on Ohio’s English Language Arts Academic Content Standards.</p> | ENG | English |
| 050220 | <p>Grammar and Usage This course emphasizes the editing phase of the writing process, providing students a variety of strategies for refining and editing their own writing. Instruction will be centered around the writing benchmarks of the English language arts Academic Content Standards.</p> | ENG | English |
| 050300 | <p>Literature This course is designed to provide instruction in the study of print materials, which have noteworthy content and excellence of style. Students apply the reading process to the various genres of literature. Instruction addresses content from the reading benchmarks of the English language arts Academic Content Standards.</p> | ENG | English |
| 050400 | <p>Composition This course will provide instruction in writing. Students will develop their writing with a focus on expository and persuasive techniques. Journals will be kept and portfolios will be maintained throughout the class. Instruction will be centered around the writing benchmarks of the English language arts Academic Content Standards.</p> | ENG | English |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 050403 | <p>Journalism This course includes the study and practice of writing, editing and publishing newspapers and periodicals. Instruction centers on the writing and research standards in the English Language Arts Academic Content Standards.</p> | ENG | English |
| 050500 | <p>Speech This course covers subject matter and experiences in speech. A wide spectrum of studies and activities from the scientific (voice science) through the humanistic (rhetoric) will be taught. Behavioral sciences (group dynamics) as well as the artistic (oral interpretation of literature) will also be taught.</p> | ENG | English |
| 050545 | <p>Applied Communications This course gives students practice in communication skills of reading, writing, listening and speaking in their chosen vocations. Students learn to deliver presentations that effectively convey information and persuade or entertain audiences. Instruction centers on the Communication: Oral and Visual Standard in the English Language Arts Academic Content Standards.</p> | ENG | English |
| 059920 | <p>English Language & Composition This course is centered around the reading and writing benchmarks of the English language arts Academic Content Standards. It is designed to develop the writing and language skills students need for success in their secondary school program, in their daily lives, and in a global society. Students will compose oral, written, and media text consisting of organized subject matter and experiences emphasized in English.</p> | ENG | English |
| 059930 | <p>English Literature & Composition This course is centered around the reading and writing benchmarks of the English language arts Academic Content Standards. It is designed to develop the reading and writing skills students need for success in their secondary school program, in their daily lives, and in a global society. Students will analyze and interpret a variety of genres of literature as well as informational and graphic texts.</p> | ENG | English |
| 059999 | <p>Other English/Language Arts Course A topical course that can cover the different aspects of English Language arts. Instruction will be centered around the benchmarks of the English language arts Content Standards.</p> | ENG | English |

Family & Consumer Sciences Section

The courses below earn Home Economics Credit.

Table 7. Family & Consumer Sciences (Non-Career Technical) Codes (23xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 230001 | Family & Consumer Sciences Content from a combination of the various areas of family and consumer sciences. | HEC | — |
| 230100 | Clothing and Textiles Nature, acquisition, and the use of clothing and textiles. | HEC | — |
| 230140 | Foods and Nutrition Food and its role in personal and family living. | HEC | — |
| 230200 | Child Development and Parenting The developing child and the care and guidance of children. | HEC | — |
| 230300 | Consumer Education Consumer education as it relates to the management of homes and families. | HEC | — |
| 230500 | Family Living Nurturing human development through the life span. | HEC | — |
| 230600 | Housing and Home Furnishings Choosing, equipping and furnishing living environments. | HEC | — |

Foreign Language Section

Table 8. Foreign Language Codes (06xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 060101 | Arabic The study of the language and culture of the Arabic world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060102 | Chinese The study of the language and culture of the Chinese-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060103 | Greek The study of the language, literature, and culture of the Ancient Greeks and their influence on modern civilization. | FLR | Foreign Language |
| 060104 | Hebrew The study of the language and culture of the Hebrew-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 060107 | Latin The study of the language, literature, and culture of Ancient Rome and its influence on modern civilization. | FLR | Foreign Language |
| 060218 | Russian The study of the language and culture of the Russian-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060221 | Swahili The study of the language and culture of the Swahili-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060227 | Czech The study of the language and culture of the Czech-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060230 | French The study of the language and culture of the French-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060235 | German The study of the language and culture of the German-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060245 | Italian The study of the language and culture of the Italian-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060250 | Japanese The study of the language and culture of the Japanese-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060255 | Polish The study of the language and culture of the Polish-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060265 | Spanish The study of the language and culture of the Spanish-speaking world leading to the ability to communicate in a range of situations and glean meaning from a variety of texts. | FLR | Foreign Language |
| 060900 | Foreign Language (Exploratory) A language survey course during which students are exposed to several languages. | FLR | Foreign Language |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 060207 | TESOL–English as a Second Language (ESL) The study of the language and culture of the English-speaking world leading to the ability to function in academic and everyday situations. Designed for individuals whose primary language is not English. This course focuses on English as a foreign language. | FLR | Foreign Language |
| 061050 | American Sign Language (ASL) The study of a visual-gestural language used by deaf people in the United States and part of Canada. ASL has its own culture, grammar, and vocabulary; is produced by using the hands, face, and body; and is not derived from any spoken language. | FLR | Foreign Language |
| 069922 | Latin: Vergil Students read, translate, analyze, and interpret the works of Vergil. | FLR | Foreign Language |
| 069915 | French Literature A formal study of a representative body of literary texts in French for students who have advanced language skills. | FLR | Foreign Language |
| 069935 | Spanish Literature A formal study of a representative body of literary texts in Spanish for students who have advanced language skills | FLR | Foreign Language |
| 069925 | Latin Literature Students read, translate, analyze, and interpret Latin works. | FLR | Foreign Language |
| 069951 | Early Language Learning Arabic The study of a language and culture other than English in elementary school-Arabic. | N/A | Foreign Language |
| 069952 | Early Language Learning Chinese The study of a language and culture other than English in elementary school-Chinese. | N/A | Foreign Language |
| 069953 | Early Language Learning Japanese The study of a language and culture other than English in elementary school-Japanese. | N/A | Foreign Language |
| 069954 | Early Language Learning Italian The study of a language and culture other than English in elementary school-Italian. | N/A | Foreign Language |
| 069955 | Early Language Learning German The study of a language and culture other than English in elementary school-German. | N/A | Foreign Language |
| 069956 | Early Language Learning Hebrew The study of a language and culture other than English in elementary school-Hebrew. | N/A | Foreign Language |
| 069957 | Early Language Learning French The study of a language and culture other than English in elementary school-French. | N/A | Foreign Language |
| 069958 | Early Language Learning Spanish The study of a language and culture other than English in elementary school-Spanish. | N/A | Foreign Language |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 069959 | Early Language Learning Swahili The study of a language and culture other than English in elementary school-Swahili. | N/A | Foreign Language |
| 069960 | Early Language Learning Russian The study of a language and culture other than English in elementary school-Russian. | N/A | Foreign Language |
| 069961 | Early Language Learning Latin The study of a language and culture other than English in elementary school-Latin. | N/A | Foreign Language |
| 069962 | Early Language Learning Greek The study of a language and culture other than English in elementary school-Greek. | N/A | Foreign Language |
| 069963 | Early Language Learning American Sign Language The study of a language and culture other than English in elementary school-American Sign Language. | N/A | Foreign Language |

Health and Physical Education Section

Table 9. Health Education Codes (26xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 260101 | Health Education Educational activities that promote understanding, attitudes, and practices consistent with individual, family, and community health needs. | HTH | — |
| 260150 | Substance Abuse Prevention Subject matter and learning experiences which address drug, alcohol, and tobacco abuse situations including prevention, intervention, discipline, and community resources available to the pupil and to the family. | HTH | — |
| 260200 | Safety/First Aid/CPR Subject matter and learning experiences concerned with developing students' awareness and understanding of hazards of everyday living, and the knowledge, habits, attitudes, and skills which will enable them to function at an optimum level in the prevention and care of injury situations. | HTH | — |
| 260410 | Sports Medicine Educational activities concerned with the effects of sports and exercise on health and fitness and with the prevention and treatment of athletic injuries. | HTH | — |
| 269999 | Other Health A course that is given for High School credits to be applied toward the diploma, but that is different in scope from any of the other SUBJECT CODES described above. | HTH | — |

Table 10. Physical Education Codes (08xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 080300 | Physical Education A comprehensive subject area which incorporates fundamental motor skills, body control and balance, physical fitness, leisure sports and games skills, cognitive skills, as well as stress management skills. | PHE | — |
| 080405 | Lifetime Sports Activities taught throughout the school life with emphasis on learning experiences that can be turned into healthful lifetime skills. | PHE | — |
| 080505 | Adapted Physical Education Adapted Physical Education is specially designed instruction in physical education. According to federal law, physical education means the development of (a) physical and motor fitness; (b) fundamental motor skills and patterns; and (c) skills in aquatics, dance, and individual and group games and sports. | PHE | — |
| 080900 | Outdoor Physical Education A variety of outdoor leisure and sports activities, such as, fishing, archery, nature study, boating, backpacking, and similar pursuits that enhance students physical health and their understanding of the natural world. | PHE | — |
| 080999 | Other Physical Education Course Other Physical Education course for which high school credit can be earned that is different in scope and content from any of the other courses described above. | PHE | — |

Mathematics Section

Table 11. Elementary and Middle School Level Mathematics Codes (11xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--|--|-----------------------------------|-----------------------------|
| The following four courses do not earn high school mathematics credit. | | | |
| 110003 | Mathematics K-3 Instruction provided by a teacher to multiple groups of students rather than in a self-contained classroom setting. Includes content in the K-3 portions of Ohio's New Learning Standards for Mathematics. | N/A | Mathematics |
| 110150 | Mathematics 4-6 Includes content in the 4-6 portions of Ohio's New Learning Standards for Mathematics. | N/A | Mathematics |
| 110175 | Mathematics 7-8 Includes content in the 7-8 portions of Ohio's New Learning Standards for Mathematics. | N/A | Mathematics |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--|---|-----------------------------------|-----------------------------|
| 110060 | Advanced Mathematics 7 This is the first year of a two-year optional program designed to compress 7th, 8th, and 9th grades into two years. The content of this first year will address all of the 7th grade content and a portion of the 8th grade content. Description of the content appropriate for this course is identified in Appendix A of the Common Core State Standards for Mathematics. | MTH | Mathematics |
| The following course would receive high school mathematics credit if taught by a 7-12 or 4-9 licensed mathematics teacher. | | | |
| 110065 | Advanced Mathematics 8 This is the second year of a two-year optional program designed to compress 7th, 8th, and 9th grades into two years. The content of this second year will address the remaining content from the 8th grade content and the first year of high school (Mathematics I or Algebra I) as described in the Pathways for high school mathematics. Description of the content for this course is identified in Appendix A of the Common Core State Standards for Mathematics. | MTH | Mathematics |

Table 12. High School Level Mathematics Codes (11xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--|---|-----------------------------------|-----------------------------|
| Topic-Focused Mathematics Course Sequence: A four-year program or sequence of courses that addresses the content in the high school portion of the New Learning Standards for Mathematics through topic-focused, discrete courses. Described as the Traditional Pathway identified in Appendix A of the Common Core State Standards for Mathematics. These courses would require the Traditional End-of-Course exams. | | | |
| 110301 | Algebra I The first course in a four-year sequence that addresses the high school portion of the New Learning Standards for Mathematics. Description of the content appropriate for this course is identified in the Traditional Pathway of Appendix A and/or the Model Content Framework. | MTH | Mathematics |
| 111200 | Geometry The second course in a four-year sequence that addresses the high school portion of the New Learning Standards for Mathematics. Description of the content appropriate for this course is identified in the Traditional Pathway of Appendix A and/or the Model Content Framework. | MTH | Mathematics |
| 110302 | Algebra II The third course in a four-year sequence that addresses the high school portion of the New Learning Standards for Mathematics. Description of the content appropriate for this course is identified in the Traditional Pathway of Appendix A and/or the Model Content Framework. | MTH | Mathematics |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|---|---|-----------------------------------|-----------------------------|
| 110099 | <p>Advanced Mathematics (Pre-Calculus) The fourth course in a four-year sequence which addresses advanced content in Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability, and/or the conceptual underpinnings of calculus.</p> | MTH | Mathematics |
| <p>Integrated Mathematics Course Sequence: A four-year program or sequence of courses that address the content in the grades high school portion of the New Learning Standards for Mathematics using an integrated approach. This course sequence is described in Appendix A of the Common Core State Standards for Mathematics as the Integrated Pathway. These courses would require the Integrated End-of-Course exams.</p> | | | |
| 110010 | <p>Mathematics I The first course in a four-year sequence that addresses the high school portion of the New Learning Standards for Mathematics. Description of the content appropriate for this course is identified in the Integrated Pathway of Appendix A and/or the Model Content Framework.</p> | MTH | Mathematics |
| 110020 | <p>Mathematics II The second course in a four-year sequence that addresses the high school portion of the New Learning Standards for Mathematics. Description of the content appropriate for this course is identified in the Integrated Pathway of Appendix A and/or the Model Content Framework.</p> | MTH | Mathematics |
| 110030 | <p>Mathematics III The third course in a four-year sequence that addresses the high school portion of the Common Core State Standards for Mathematics. Description of the content appropriate for this course is identified in the Integrated Pathway of Appendix A and/or the Model Content Framework.</p> | MTH | Mathematics |
| 110040 | <p>Mathematics IV (Pre-calculus) The fourth course in a high school sequence that addresses advanced content in Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability, and/or the conceptual underpinnings of calculus.</p> | MTH | Mathematics |
| <p>Applied Mathematics Course Sequence: The following three courses address the content in the high school portion of the New Learning Standards for Mathematics through concrete models and real-world situations and with less emphasis on symbol-manipulation and formal mathematical structure. This sequence of courses would require the respective Traditional or Integrated series of End-of-Course exams and would meet the requirement of Algebra II or its equivalent. If a course is used as a first year of a two year course, then the End-of-Course exam would follow the completion of the two years. A fourth course in high school mathematics is required to meet the Ohio Graduation Requirements.</p> | | | |
| 110480 | <p>Applied Algebra or Applied Mathematics I The first course in a high school sequence addressing content through concrete models and real-world situations and with less emphasis on symbol-manipulation and formal mathematical structure. This course would require the respective Algebra I or Mathematics I End-of-Course exam.</p> | MTH | Mathematics |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 110490 | Applied Geometry or Applied Mathematics II The second course in a high school sequence addressing content through concrete models and real-world situations and with less emphasis on symbol-manipulation and formal mathematical structure. This course would require the respective Geometry or Mathematics II End-of-Course exam. | MTH | Mathematics |
| 110500 | Applied Algebra II or Applied Mathematics III The third course in a high school sequence addressing content through concrete models and real-world situations and with less emphasis on symbol-manipulation and formal mathematical structure. This course would require the respective Algebra II or Mathematics III End-of-Course exam. | MTH | Mathematics |

Table 13. Additional High School Level Mathematics Codes (11xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 111950 | Intervention Mathematics (high school credit optional in grades 9-12, not for high school credit below grade 9) Course designed specifically as intervention for students who have taken and not yet reached the proficient standard on the Ohio Graduation Test for mathematics. Prepares students to retake the test, includes little or no new significant content, and is remedial in nature. | MTH | Mathematics |
| 111960 | Mathematics Response to Intervention Support 1 This course is designed to provide support and to coincide with an Algebra I or Mathematics I course. This class is not remedial and is to provide immediate support and intervention for students. | MTH | Mathematics |
| 111970 | Mathematics Response to Intervention Support 2 This course is designed to provide support and to coincide with a Geometry or Mathematics II course. This class is not remedial and is to provide immediate support and intervention for students. | MTH | Mathematics |
| 111980 | Mathematics Response to Intervention Support 3 This course is designed to provide support and to coincide with an Algebra II or Mathematics III course. This class is not remedial and is to provide immediate support and intervention for students. | MTH | Mathematics |
| 110190 | Transition to High School Mathematics (Elective high school credit optional in grades 9-12, not for high school credit below grade 9. This course does not meet the mathematics credit requirements of the Ohio Graduation Requirements.) Course designed specifically as intervention for students who enter grade 9 not ready for high school level mathematics courses. Use this code for courses that contain little of the high school level content found in the New Learning Standards for Mathematics. | MTH | Mathematics |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 111350 | <p>Modeling and Quantitative Reasoning This course prepares students to investigate contemporary issues mathematically and to apply the mathematics learned in earlier courses to answer questions that are relevant to their civic and personal lives. The applications should provide an opportunity for deeper understanding and extension of the material from earlier courses. This course should also show the connections between different mathematics topics and between the mathematics and the areas in which applied.</p> | MTH | Mathematics |
| 111300 | <p>Discrete Mathematics The study of mathematical properties of sets and systems that have a countable number of elements including applications of systematic counting techniques and algorithmic thinking to represent, analyze, and solve problems.</p> | MTH | Mathematics |
| 111600 | <p>Trigonometry In-depth study of trigonometric and circular functions including modeling, graphing, and connecting to polar coordinates, complex numbers, and series.</p> | MTH | Mathematics |
| 111850 | <p>Transition to College Mathematics A course designed for students in grades 11-12 making a transition to a college preparatory program. The content is from the high school portion of the New Learning Standards for Mathematics, both new and previously addressed topics with increasing emphasis on symbol manipulation and mathematical structure.</p> | MTH | Mathematics |
| 111500 | <p>Probability and Statistics In-depth study of probability, data analysis, and statistics including applying the concept of random variables to generate and interpret probability distributions, transforming data to aid in interpretation and prediction, and testing hypotheses using appropriate statistics.</p> | MTH | Mathematics |
| 119550 | <p>Statistics The purpose of this course is to introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. Students are exposed to four broad conceptual themes: Exploring Data, Sampling and Experimentation, Anticipating Patterns, and Statistical Inference.</p> | MTH | Mathematics |
| 110600 | <p>Calculus A formal study of topics from calculus that is not associated with the Advanced Placement Program. Includes the study of limit, series, and differentiation and integration.</p> | MTH | Mathematics |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 119930 | Calculus AB Calculus AB is designed to be taught over a full high school academic year. It is possible to spend some time on elementary functions and still teach the Calculus AB curriculum within a year. However, most of the year must be devoted to the topics in differential and integral calculus. The courses described here represent college-level mathematics for which most colleges grant advanced placement and/or credit. | MTH | Mathematics |
| 119960 | Calculus BC Calculus BC is a full-year course in the calculus of functions of a single variable. It includes all topics taught in Calculus AB plus additional topics, but both courses are intended to be challenging and demanding; they require a similar depth of understanding of common topics. The courses described here represent college-level mathematics for which most colleges grant advanced placement and/or credit. | MTH | Mathematics |
| 119999 | Other Mathematics Course High school level elective course that addresses advanced mathematical topics. Course Other mathematics course for which high school credit can be earned that is different in scope from any of the other SUBJECT CODES described above. (A course that addresses concepts and skills below the 9-12 portion of New Learning Standards for Mathematics should be coded as 110190 Transition to High School Mathematics.) | MTH | Mathematics |

Science Section

Table 14. Science Codes (13xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 132110 | Science (K-3) Early elementary science course for grades K-3. Course includes content found in Ohio's New Learning Standards and Model Curriculum for Science, Grades K-3. Earth and Space Sciences, Life Sciences, and Physical Sciences are integrated with scientific practices, inquiry, and applications. | N/A | Science |
| 132120 | Science (4-6) Elementary or early middle school science course for grades 4-6. Course includes content found in Ohio's New Learning Standards and Model Curriculum for Science, Grades 4-6. Earth and Space Sciences, Life Sciences, and Physical Sciences are integrated with scientific practices, inquiry, and applications. | N/A | Science |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 132130 | <p>Science (7-8) Middle school science course for grades 7-8. Course includes content found in Ohio's New Learning Standards and Model Curriculum for Science, Grades 7-8. Earth and Space Sciences, Life Sciences, and Physical Sciences are integrated with scientific practices, inquiry, and applications.</p> | N/A | Science |
| 132900 | <p>Intervention Science High school science course for students who have previously completed Physical Science and Biology and have taken but not yet passed the Ohio Graduation Test. The variety of standards-based instruction and assessment strategies used in this course is appropriate to assist student preparation for the Ohio Graduation Test. This course may not satisfy Ohio's graduation requirements.</p> | SCI | Science |
| 132220 | <p>Physical Science High school level course that satisfies Ohio's science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Content from this course contributes to the Ohio Graduation Test. Course includes content found in Ohio's New Learning Standards and Model Curriculum for Science, High School Physical Science.</p> | SCI | Science |
| 132230 | <p>Biology High school level course that satisfies Ohio's science graduation requirements as required by section 3313.603 of the Ohio Revised Code which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Content from this course contributes to the Ohio Graduation Test. Course includes content found in Ohio's New Learning Standards and Model Curriculum for Science, High School Biology.</p> | SCI | Science |
| 132350 | <p>Environmental Science Advanced high school level course that satisfies Ohio's science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course includes content found in Ohio's New Learning Standards and Model Curriculum for Science, High School Environmental Science.</p> | SCI | Science |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 134250 | <p>Physical Geology Advanced high school level course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course includes content found in Ohio’s New Learning Standards and Model Curriculum for Science, High School Physical Geology</p> | SCI | Science |
| 130301 | <p>Chemistry Advanced high school level course that satisfies Ohio Core science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course includes content found in the Revised Academic Content Standards and Model Curriculum for Science, High School Chemistry.</p> | SCI | Science |
| 130302 | <p>Physics Advanced high school level course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course includes content found in Ohio’s New Learning Standards and Model Curriculum for Science, High School Physics.</p> | SCI | Science |
| 132330 | <p>Advanced Biology An advanced high school level course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course develops specialized content to extend connections, depth, and detail of biology that emphasizes content beyond what is outlined in Ohio’s New Learning Standards and Model Curriculum for Science, High School Biology. Content may include concepts in anatomy, physiology, ecology, behavior, evolution, genetics, cell biology, microbiology, diversity, growth, or human biology.</p> | SCI | Science |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 132326 | <p>Advanced Chemistry Advanced high school level course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course develops specialized content to extend connections, depth, and detail of chemistry that emphasizes content beyond what is outlined in Ohio’s New Learning Standards and Model Curriculum for Science, High School Chemistry. Content may include concepts in inorganic, organic, analytical, physical, or and biological chemistry.</p> | SCI | Science |
| 132340 | <p>Advanced Earth and Space Sciences Advanced high school level course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course develops specialized content beyond what is outlined in Ohio’s New Learning Standards for Science to extend connections, depth, and detail of the major concepts and principles of earth and space sciences. Content may include concepts in astronomy, oceanography, meteorology, geology, or natural resources.</p> | SCI | Science |
| 132325 | <p>Advanced Physics Advanced high school level course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course develops specialized content beyond what is outlined in Ohio’s New Learning Standards for Science, High School Physics to extend connections, depth, and detail of physics. Content may include concepts in mechanics, electricity, magnetism, thermodynamics, waves, optics, atomic and nuclear physics, radioactivity, relativity, or quantum mechanics.</p> | SCI | Science |
| 139960 | <p>Physics 1: Algebra-Based Advanced high school level course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course includes topics found in the Advanced Placement Physics 1: Algebra-Based Course Description.</p> | SCI | Science |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 139970 | <p>Physics 2: Algebra-Based Advanced high school level course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course includes topics found in the Advanced Placement Physics 2: Algebra-Based Course Description.</p> | SCI | Science |
| 139940 | <p>Physics C: Electricity & Magnetism Advanced high school level course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course includes topics found in the Advanced Placement Physics C: Electricity & Magnetism Course Description.</p> | SCI | Science |
| 139950 | <p>Physics C: Mechanics Advanced high school level course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course includes topics found in the Advanced Placement Physics C: Mechanics Course Description.</p> | SCI | Science |
| 139997 | <p>Other Science Any introductory level high school science course that includes content typically taught at the 9th or 10th grade level and is not listed in previous course descriptions. These courses would typically be science elective courses that are offered to grade 9 or 10 students, but may not satisfy Ohio’s graduation requirements.</p> | SCI | Science |
| 139998 | <p>Other Advanced Science Any advanced level science course that satisfies Ohio’s science graduation requirements as required by section 3313.603 of the Ohio Revised Code, which requires inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. Course content must be at the 11th or 12th grade level or above, must not repeat content in K – 8, High School Physical Science, or Biology, and must be designed to prepare students for college or career level coursework or training.</p> | SCI | Science |

Social Studies Section

Table 15. Social Studies Codes (15xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 151209 | Social Studies (K-3) Social studies instruction offered primarily for students in grades K-3. | N/A | — |
| 151210 | Social Studies (4-6) Social studies instruction offered primarily for students in grades 4-6. | N/A | — |
| 151201 | Social Studies (7-8) Integrated study using various social studies disciplines. (for grades 7-8) | N/A | — |
| 150610 | Economics (7-8) The study of how society uses its resources to satisfy the desires of its citizens for goods and services. (for grades 7-8) | N/A | Economics |
| 150701 | Geography (7-8) The study of spatial aspects of human existence. (for grades 7-8) | N/A | Geography |
| 150305 | Government (7-8) The study of institutions and processes through which decisions are made for a society. (for grades 7-8) | N/A | Civics and Government |
| 150807 | History (American) (7-8) The study of America's past. (for grades 7-8) | N/A | History |
| 152310 | History (Integrated) (7-8) The integrated study of American history and world history. (for grades 7-8) | N/A | History |
| 150888 | History (World) (7-8) The study of the world's past. (for grades 7-8) | N/A | History |
| 150100 | Anthropology The study of the physical, social and cultural development of humans. | SOC | — |
| 150600 | Economics The study of how society uses its resources to satisfy the desires of its citizens for goods and services. | SOC | Economics |
| 150700 | Geography The study of spatial aspects of human existence. | SOC | Geography |
| 150300 | Government (American) The study of institutions and processes through which decisions are made for the United States. | SOC | Civics and Government |
| 150308 | Government/Economics (American) The study of institutions and processes through which decisions are made for the United States and the study of how the United States uses its resources to satisfy the desires of its citizens for goods and services. | SOC | Civics and Government |
| 150810 | History (American) The study of America's past. | SOC | History |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 152300 | History (Integrated) The integrated study of American history and world history. | SOC | History |
| 152400 | History (Regional) The study of a region's past. | SOC | History |
| 150890 | History (World) The study of the world's past. | SOC | History |
| 152100 | Integrated Social Studies Integrated study using various social studies disciplines. | SOC | — |
| 150400 | Intervention Social Studies Remedial study in preparation for the Ohio Graduation Tests with little or no significant new content. | SOC | — |
| 151121 | Psychology The study of the human mind and its influence on behavior. | SOC | — |
| 151205 | Social Psychology The study of individual human behavior in groups. | SOC | — |
| 151300 | Sociology The study of social relationships, institutions, and group behavior in societies. | SOC | — |
| 152810 | European History The study of Europe's past. | SOC | History |
| 159960 | Government & Politics (Comparative) The comparative study of the institutions and processes through which decisions are made for societies. | SOC | Civics and Government |
| 159950 | Government & Politics (United States) The study of institutions and processes through which decisions are made for the United States. | SOC | Civics and Government |
| 159930 | Macroeconomics The study of the functioning of entire economies. | SOC | Economics |
| 159940 | Microeconomics The study of the behavior of individual households, firms and markets. | SOC | Economics |
| 152150 | Issues in Social Studies The study of issues related to the social studies utilizing applications of relevant disciplines. | SOC | — |
| 159999 | Other Social Studies The study of specialized social studies topics (including community service courses per ORC 3313.605). | SOC | — |

Technology Section

Table 16. Computer Science Codes (29xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|---|---|-----------------------------------|-----------------------------|
| <p>The following courses do not earn high school technology credit. This instruction may also be provided by a teacher to multiple groups of students rather than in a self-contained classroom setting. The K-8 content across Ohio’s Technology standards defines achievement in meeting the No Child Left Behind 8th Grade Technology Literacy Requirement. Instruction is most effective when integrated with curricular components of other academic content areas.</p> | | | |
| 290035 | <p>Computer/Multimedia Literacy K-3 Includes content in the K-3 portion of Ohio’s academic content standards for technology that focuses on the use of educational technology for learning.</p> | N/A | — |
| 290040 | <p>Computer/Multimedia Literacy 4-6 Includes content in the 4-6 portion of Ohio’s academic content standards for technology that focuses on the use of educational technology for learning.</p> | N/A | — |
| 290045 | <p>Computer/Multimedia Literacy 7-8 Includes content in the 7-8 portion of Ohio’s academic content standards for technology including keyboarding, word processing, productivity, communication and information tools.</p> | N/A | — |
| <p>Computer Science codes include computer/multimedia literacy, software, Internet, systems/networking and programming. All courses should be based on advanced topics aligned with the 9-12 section of the Ohio Technology academic content standards. Credit cannot be given for concepts below 9th – 12th grade.</p> | | | |
| 290050 | <p>Computer/Multimedia Literacy Course focuses on advanced concepts in 9-12 portion of Ohio’s technology academic content standards. Instruction is most effective when integrated or linked to other content areas.</p> | TEC | — |
| 290100 | <p>Technology-Productivity Tools Course focuses on advanced concepts in 9-12 portion of Ohio’s technology academic content standards that increase personal productivity and manage information. Instruction is most effective when integrated or linked to other academic areas.</p> | TEC | — |
| 290110 | <p>Technology-Communication Tools Course focuses on advanced concepts in the 9-12 portion of Ohio’s technology academic content standards including identifying purpose, audience and communication strategy. Instruction is most effective when integrated or linked to other academic content areas.</p> | TEC | — |
| 290120 | <p>Technology-Problem-Solving Tools Course focuses on advanced concepts in the 9-12 portion of Ohio’s technology academic content standards including inquiry/problem-solving skills and technology tools. Instruction is most effective when integrated or linked to other academic content areas.</p> | TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 290130 | Internet Searching Course focuses on advanced concepts in the 9-12 portion of Ohio's technology academic content standards including Internet search strategies, search engine ranking methods and Web site evaluation. | TEC | — |
| 290075 | Technology: Electronic Resources Course focuses on advanced concepts in the 9-12 portion of Ohio's technology academic content standards including information literacy concepts and use of technology tools to conduct research. Topics include use of Internet and other electronic information resources. | TEC | — |
| 290140 | Technology and Ethics Course focuses on advanced concepts in the 9-12 portion of Ohio's technology academic content standards and library guidelines including copyright, intellectual property, biotech and other current ethical concerns. | TEC | — |
| 290150 | Computer Graphics Course includes design techniques used to generate computer graphics. Topics may include use of tools to draw, import, edit, create, animate images, photos, original artwork, etc. | TEC | — |
| 290200 | Computer Science Course includes study and use of programming languages, i.e., BASIC, COBOL, DOS, Visual BASIC, C++, HTML, XML, MSDN, etc. Topics also include operating systems, servers, networks, etc. | TEC | — |
| 290310 | Computer Science A The study of programming methodology with an emphasis on problem solving and algorithm development. Also includes study of data structures and abstraction, but not to the extent as covered in Computer Science AB. | TEC | — |
| 290320 | Computer Science AB Includes all topics of Computer Science A, as well as a more formal and more in-depth study of algorithms, data structures and data abstraction. | TEC | — |
| 290160 | Web Site Development Course includes Web site design, posting/removing Web sites to/from Web server and Web programming HTML, XML, etc. Course should cover Universal Design and other accessibility methods. | TEC | — |
| 290165 | Advanced Web Site Development Course should include advanced Web programming and applications, Universal Design and other accessibility methods. | TEC | — |
| 290170 | Networking Course includes operating systems, printers/print servers, network configuration and servers, etc. | TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 290180 | Computer Repair Course includes troubleshooting, repair, system/network reconfiguration, help desk practices, etc. | TEC | — |
| 299999 | Other Computer Technology A course that is given for High School credit to be applied toward the diploma, but that is different in scope from any of the other SUBJECT CODES described above. | TEC | — |

Table 17. Information Literacy Codes (20xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--|--|-----------------------------------|-----------------------------|
| <p>The following courses do not earn high school technology credit. This instruction may also be provided by a teacher to multiple groups of students rather than in a self-contained classroom setting. The K-8 content across Ohio’s Technology standards defines achievement in meeting the No Child Left Behind 8th Grade Technology Literacy Requirement. Instruction is most effective when integrated with curricular components of other academic content areas.</p> | | | |
| 200910 | Information Literacy K-3 Instruction that includes content in the K-3 portion of Ohio’s technology academic content standards and library guidelines. | N/A | — |
| 200915 | Information Literacy 4-6 Instruction that includes content in the 4-6 portion of Ohio’s technology academic content standards and library guidelines. | N/A | — |
| 200920 | Information Literacy 7-8 Instruction that includes content in the 7-8 portion of Ohio’s technology standards and library guidelines including Internet searching, evaluation of Web sites and other electronic resources. | N/A | — |
| <p>Information literacy codes focus on acquisition, interpretation, and dissemination of information. All courses should be based on advanced topics aligned with the 9-12 section of the Ohio Technology academic content standards and Library Guidelines. Credit cannot be given for concepts below 9th – 12th grade.</p> | | | |
| 200700 | Library Science Course focuses on how information is organized, accessed, and evaluated, including use of information management systems in school, public, academic, and government libraries. | TEC | — |
| 200905 | Information Literacy Instruction focuses on recognizing the need for information and developing the skills to locate, evaluate and utilize the information. Learning experiences include information retrieval and critical thinking skills that enable students to acquire, interpret, evaluate, create, and communicate information. Information sources include print, nonprint, electronic, Internet-based resources accessed via the school library, school district, Internet, statewide/national networks, and other providers. | TEC | — |

Table 18. Technology Education Codes (10xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|---|---|-----------------------------------|-----------------------------|
| <p>The following courses do not earn high school technology credit. This instruction may also be provided by a teacher to multiple groups of students rather than in a self-contained classroom setting. The K-8 content across Ohio’s Technology standards defines achievement in meeting the No Child Left Behind 8th Grade Technology Literacy Requirement. Instruction is most effective when integrated with curricular components of other academic content areas.</p> | | | |
| 102285 | <p>Technological Literacy K-3 Instruction that includes content in the K-3 portion of Ohio’s academic content standards for technology.</p> | N/A | — |
| 102290 | <p>Technological Literacy 4-6 Instruction that includes content in the 4-6 portion of Ohio’s academic content standards for technology.</p> | N/A | — |
| 102295 | <p>Technological Literacy 7-8 Instruction that includes content in the 7-8 portion of Ohio’s academic content standards for technology.</p> | N/A | — |
| <p>Technology Education: A comprehensive study of the knowledge and processes necessary in designing, making, developing, producing, using, managing, and assessing of technological systems and products. Dimensions of technology include assessing impacts and consequences of technology, nature and history of technology, and connections. Technological systems and products are those systems and products that change the world around us to satisfy our needs and wants. In particular Technology Education focuses on the systems and products of the energy/power/transportation, manufacturing, construction, communication, and bio-related/chemical fields. These activities may take place in thematic units at the elementary level, general technology courses at the middle and high school levels, specific high school systems courses, Tech Prep and Pathways courses at the high school level, and modules and problem-based learning integrated with mathematics, science, language arts, social studies and arts teams at all levels.</p> | | | |
| 102300 | <p>Technology Education Comprehensive action-based courses concerned with the evolution, utilization, and significance of technology and its impact on industry, including its organization, personnel, systems, techniques, resources, products, and socio cultural aspects.</p> | TEC | — |
| 107450 | <p>Foundations of Technology Prepares students to understand and apply technological concepts and processes that are the cornerstone for the high school technology program. Group and individual activities engage students in creating ideas, developing innovations and engineering practical solutions. Technology content, resources and laboratory/classroom activities apply student applications of science, mathematics and other school subjects in authentic situations. This course will focus on the three dimensions of technological literacy: knowledge, ways of thinking and acting, and capabilities, with the goal of students developing the characteristics of technologically literate citizens.</p> | TEC | — |
| 101700 | <p>Research and Development The study of industrial-technical problems, including provisions for individual or group investigations of problems and opportunities to evaluate their solutions by designing, constructing, and testing products.</p> | TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--|--|-----------------------------------|-----------------------------|
| 101720 | <p>Design Course includes design topics from the 9-12 portion of Ohio’s technology academic content standards; including identifying and producing a product or system using a design process and evaluating the final solution, and communicating findings; recognizing the role of teamwork in engineering design and of prototyping in the design process; and understanding and applying research, development, and experimentation to problem-solving.</p> | TEC | — |
| 101730 | <p>Issues and Problems in Technology The study of themes concerning technology, society, and the environment.</p> | TEC | — |
| <p>Construction Technology Systems: A comprehensive study of the knowledge and processes in designing, making, developing, producing, using, managing, and assessing of technological systems and products to build structures on site. In particular courses that are part of the construction technology systems focus on project planning, architectural design and drafting, site preparation, building the structure, and maintaining the structure.</p> | | | |
| 100100 | <p>Construction The study of the technology and the socioeconomic contributions of those industries concerned with residential, civic industrial, civil, and transportation structures.</p> | TEC | — |
| 100800 | <p>Home Mechanics The study of the tools, materials, and processes involved in the up-keep and repair of the home, its equipment and devices.</p> | TEC | — |
| <p>Manufacturing Technology Systems: A comprehensive study of the knowledge and processes in designing, making, developing, producing, using, managing, and assessing of technological systems and products in manufacturing facilities. In particular courses that are part of manufacturing technology systems focus on mechanical design and drafting, materials, and processes (including woods, metals, plastics), production, robotics, and automation systems, and specific trades/crafts.</p> | | | |
| 101300 | <p>Manufacturing The study of the technology and the socioeconomic contributions of industries concerned with the creation of durable consumer products.</p> | TEC | — |
| 101350 | <p>Robotics Application of processes and knowledge in the design, development, and use of systems to manage and control devices. Products of student work in robotics may be descriptive and/or functional models of technology applications across all systems areas.</p> | TEC | — |
| 101800 | <p>Service Industries The study of the technology of industries concerned with the maintenance and repair of consumer and/or industrial products.</p> | TEC | — |
| 101900 | <p>Woods Processes Information and skills concerned with woods, including various manufactured wood products, focusing on the technology employed in the manufacture and construction of products using woods and related factors such as occupations, economics, and consumer information.</p> | TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--|---|-----------------------------------|-----------------------------|
| 101410 | <p>Metals Processes Information and skills concerned with metals including the products manufactured from metals and the technology employed in the production, processing, and use of metals, as well as related factors such as occupations, economics, and consumer information.</p> | TEC | — |
| 101500 | <p>Plastics Information and skills concerned with the production, processing, and use of plastics, composites and related factors such as occupations, economics, and consumer information.</p> | TEC | — |
| 100200 | <p>Industrial Crafts Information and skills concerned with handcrafts and the craft industry, including its tools, materials, processes, products, and occupations.</p> | TEC | — |
| <p>Communication Technology Systems: A comprehensive study of the knowledge and process in designing, making, developing, producing, using, managing, and assessing of technological systems to products for transferring graphic and electronic messages. Computer modeling and information technology applications are critical to all technology systems areas. In particular courses that are part of communication technology systems focus on existing and emerging information technologies for encoding, transmitting, receiving, storing, retrieving, and decoding of graphic and electronic messages.</p> | | | |
| 100300 | <p>Drafting Information and skills concerned with conveying ideas or illustrations graphically through drawings, charts, sketches, maps, and graphs, and the related factors such as the role of drafting in history and industry.</p> | TEC | — |
| 100401 | <p>Electricity/Electronics Information and skills concerned with electrical energy including theory, applications, and control as it relates to electrically powered equipment, to various kinds of communications equipment, and to related factors such as occupations, economics, and consumer information.</p> | TEC | — |
| 100700 | <p>Graphic Arts The study of information and skills concerned with graphic reproduction, as well as related factors such as occupations, economics, and consumer information.</p> | TEC | — |
| 102000 | <p>Communications Provides an introduction to technical communication systems and processes. Students use a variety of technologies and media to create, implement, and evaluate a network to solve a communication problem.</p> | TEC | — |
| 102500 | <p>Industrial Computer Applications Experiences with computer applications across the technological systems areas. Selected activities covering computer hardware, software, and interface device applications to develop understanding of industrial uses of computers.</p> | TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--|---|-----------------------------------|-----------------------------|
| <p>Energy/Power/Transportation Technology Systems: A comprehensive study of the knowledge and process in designing, making, developing, producing, using, managing, and assessing of technological systems to produce products for the transmission of energy and power, and the transportation of goods and people. In particular technology courses focus on energy and power sources or devices, the transformation of energy and power from one form to another, the transmission of energy and power from one form to another, and the sale use of power. In addition transportation focuses on the systems and products used to transport goods and people.</p> | | | |
| 101610 | <p>Power Mechanics Information and skills concerned with the various forms of power, including its generation, transmission, and utilization.</p> | TEC | — |
| 102100 | <p>Energy/Power/Transmission Beginning-level course designed to provide a conceptualized study of basic machines. Students obtain a basic understanding and develop skills needed to identify, build, maintain, test, and develop machines.</p> | TEC | — |
| <p>Bio-Related and Chemical Technology Systems: A comprehensive study of the knowledge and process in designing, making, developing, producing, using, managing, and assessing of technological systems to produce products with bio-related and chemical applications. In particular technology courses focus on practical application of biological organism and chemical processes to make or modify products, the production process techniques related to agriculture, chemical, and medical technology products, and the human interface with technology in managing the artificial and natural environment.</p> | | | |
| 103050 | <p>Bio-Related and Chemical Technology Systems Comprehensive study of the knowledge and process in designing, making, developing, producing, using, managing, and assessing of technological systems to produce products with bio-related and chemical applications.</p> | TEC | — |

CAREER-TECHNICAL EDUCATION SECTION

Workforce Development Section

Table 19. Career Field 01: Environmental & Agricultural Systems Codes (01xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 010105 | <p>Agriculture, Food and Natural Resources This is the first course in the Agricultural and Environmental Systems career field. It introduces students to the pathways that are offered in the Agricultural and Environmental Systems career field. As such, learners will obtain fundamental knowledge and skills in food science, natural resource management, animal science and management, plant and horticultural science, power technology and biotechnology. Students will be introduced to the FFA organization and begin development of their leadership ability.</p> | CTA | — |
| 010110 | <p>Communications and Leadership Students will analyze attributes and capabilities of those in leadership positions and develop their communication and leadership skills in authentic situations. The course prepares students to apply journalistic, communication and broadcasting principles to the development, production, and transmittal of agricultural and environmental systems information.</p> | CTA | — |
| 010115 | <p>Business Management for Agricultural and Environmental Systems Learners will examine elements of business, identify organizational structures and identify and apply management skills. Learners will develop business plans, financial reports and strategic goals for new ventures or existing businesses. Learners will use marketing concepts to evaluate the marketing environment and develop a marketing plan with marketing channels, product approaches, promotion and pricing strategies. Learners will practice customer sales techniques and apply concepts of ethics and professionalism while understanding related business regulations.</p> | CTA | — |
| 010120 | <p>Structural Engineering Students will apply principles of engineering and design along with an understanding of the properties and uses of construction materials to buildings and structures used in agriculture, horticulture and natural resources. The course will focus on the study and utilization of wood and lumber, metals, concrete and masonry, pipes and plumbing, and electrical systems. Students will design, plan, build and calculate costs-benefits analysis for construction projects while abiding by all building code and safety regulations.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 010155 | <p>Plant and Horticultural Science This first course in the pathway focuses on the broad knowledge and skills required to research, develop, produce and market agricultural, horticultural, and native plants and plant products. Students will apply principles and practices of plant physiology and anatomy, plant protection and health, reproductive biology in plants, influences in bioengineering, plant nutrition and disorders. Environmental aspects of irrigation, chemical application, soils, and pest management will be studied and applied. Projects and activities will enable students to develop communication, leadership, and business management skills.</p> | CTA | — |
| 010190 | <p>Agricultural and Environmental Systems Capstone <u>Students apply Agricultural and Environmental Systems program knowledge and skills in a more comprehensive and authentic way. Capstones are project/problem-based learning opportunities that occur both in and away from school. Under supervision of the school and through partnerships, students combine classroom learning with work experience to benefit themselves and others. These can take the form of mentorship employment, cooperative education, and internships.</u> The capstone course is an opportunity for students to solve problems and demonstrate that they have achieved the requisite knowledge and skills in their chosen Agricultural and Environmental Systems career field pathway. The course is designed to assess cognitive, affective and psychomotor learning and to do so in a student centered and student directed manner. The capstone requires the application of learning to a project that serves as an instrument of evaluation.</p> | CTA | — |
| 010210 | <p>Agricultural and Industrial Power The Agricultural and Industrial Power course will introduce students to the breadth of the Agricultural and Industrial Power Technology pathway. Students will learn the principles of agricultural and industrial power technology equipment systems including electronic, electrical, engines, fuel, hydraulics, and power trains. Additionally, students will learn to operate and maintain agricultural and industrial equipment.</p> | CTA | — |
| 010215 | <p>Electronic and Electrical Systems In the <i>Electronic and Electrical Systems</i> course, students will diagnose problems, test and repair electronic and electrical components. Students will learn physical principles of electricity and apply such to the proper maintenance, diagnosis and repair of electrical circuits. Students will learn the physical and mathematical principles of electronics, controllers and sensors and will learn the operation of onboard computers and programmable controllers.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 010220 | <p>Engines and Fuel Systems In the <i>Engines and Fuel Systems</i> course, students will learn basic engine information and operations; different kinds of corollary systems; how to use test equipment and service tools; plus techniques for diagnosis and testing. Students will learn the different kinds of fuel systems, fuels and their characteristics, designations, and additives. Students will diagnose fuel system problems including the identification of parts failure and will be able to make necessary repairs.</p> | CTA | — |
| 010225 | <p>Hydraulics and Pneumatics In the <i>Hydraulics and Pneumatics</i> course, students will learn physical principles of hydraulics. They will diagnose problems, test system components, learn how to properly maintain hydraulic circuits and diagnose and test problem areas in hydraulics systems of agricultural and industrial power equipment.</p> | CTA | — |
| 010230 | <p>Power Trains In the <i>Power Trains</i> course, students will learn the physical principles of power trains, the different components that transfer and control power, and how power trains are designed to function. Students will also learn how to adjust and maintain a power train system as well as how to diagnose and test problem areas.</p> | CTA | — |
| 010235 | <p>Outdoor Power Technology The <i>Outdoor Power Technology</i> course trains students in technical knowledge and skills necessary to maintain, troubleshoot and repair small power equipment used in agriculture, horticulture and natural resource management. Students will learn the theory of power and progress through aspects of 2- and 4-stroke engines, electrical systems, fuel systems, and drive train systems that make up modern small engine powered equipment.</p> | CTA | — |
| 010240 | <p>Power Sports In the <i>Power Sports</i> course, students will learn the theories of operating systems and the maintenance practices for power sport vehicles used off road or on the water. Students will learn principles of power sports vehicles including diagnosis, service, and repair. This courses covers core information on power sport internal combustion engines, primary drive operation, transmission power flow, fuel system operation, and electrical and suspension systems.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 010610 | <p>Greenhouse and Nursery Management The course will apply principles of science, engineering, and business to support the sustainable propagation and production of plants in a commercial nursery or greenhouse facility. Management of soil/media, water and nutrient distribution, lighting, ventilation and temperature, and pests will be learned and applied. Students will demonstrate knowledge of propagation methods, plant health, nutrition, and growth stimulation. Students will develop successful business, communication, marketing, and sales strategies for use in the greenhouse and nursery industries.</p> | CTA | — |
| 010615 | <p>Landscape Systems Management Students will learn methods for establishing and managing landscapes to promote growth and balance. The classification and care of woody and herbaceous landscape plants will be covered in-depth. Students will learn to optimize growing conditions, balance nutrients, and manage pests and disease. Horticultural skills including proper planting, fertilizing, and pruning techniques will be practiced while safely operating well maintained specialized equipment. The implications of landscape installation on the environment will be analyzed and eco-friendly practices applied. Students will employ communication, business, and management strategies appropriate for the industry.</p> | CTA | — |
| 010620 | <p>Agronomic Systems This course focuses on the knowledge and skills required to research, develop, produce and market major agricultural and horticultural crops. Cultural and sustainable production practices will be examined. Students will apply scientific knowledge of plant development, nutrition and growth regulation. The knowledge and skills needed to manage water, soils, and pests related to agronomic crops will be learned. Students will employ communication, business, and management strategies appropriate for the industry.</p> | CTA | — |
| 010625 | <p>Floral Design and Marketing Students will use principles and elements of design to create various types and styles of floral arrangements with natural and artificial plants and plant products. Identification of ornamental plants and cut flowers, use of design materials, and storage and handling applications will be examined. Students will develop successful business, communication, marketing, and sales strategies for use in the floral industry.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 010630 | <p>Landscape Design and Build Students will develop skills in landscape planning, design, estimation and installation. Principles and elements of design and engineering will be emphasized. Students will design full-featured landscapes using computer-aided technology, construct hardscapes and install artificial lighting and water systems. Environmental effects of a landscape will be evaluated and eco-friendly techniques applied. Students will employ communication, business, and management strategies appropriate for the industry.</p> | CTA | — |
| 010635 | <p>Turf Science and Management The course will apply principles of science, engineering, and business to support the establishment and maintenance of residential, athletic and recreational turf. Instruction in establishment, care, production, and marketing of turf grass along with safe operation and maintenance of specialized equipment will be provided. Environmental awareness and conservation practices will be applied. Students will employ communication, business, and management strategies appropriate for the industry.</p> | CTA | — |
| 010710 | <p>Natural Resources Learners will apply science principles and management practices to the protection of renewable and non-renewable natural resources. Students will learn fundamentals of land use as well as watershed, wildlife, fishery and forest management. Students will be introduced to management practices related to managing air and water quality along with requirements for managing solid and liquid waste. Communications, business principles and leadership skill development are essential to the program.</p> | CTA | — |
| 010715 | <p>Energy Systems Management Students will apply basic principles of energy accounting, thermodynamics and heat transfer, energy conversion and efficiency to heating, power generation and transportation. Students will apply the principles and practices needed for managing both renewable and non-renewable energy sources including, solar thermal, hydrogen generation, photovoltaic, hydroelectric, biomass use, geothermal heat transfer, and fossil fuel. Future energy systems and energy use scenarios are investigated, with a focus on promoting the use of renewable energy resources and technologies.</p> | CTA | — |
| 010716 | <p>Bio Energy Students are introduced to the scientific and technical processes of biofuel/bioenergy production. Learners will evaluate the energy conversion process and methods for optimizing the fermentation process. Students will identify the systems and components employed by fermentation systems and communicate safe handling techniques of equipment, biomass, effluent and biogas. A focus will be given to environmental impacts, life-cycle analysis, and economic analysis of bioenergy production.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 010717 | <p>Solar and Wind Energy Students will specify system options by conducting Energy Site Assessments by using and interpreting resource maps, performance data, zoning requirements and interferences, installation timelines and price. Students will read plans, lay out components and assemble electrical systems. Students will perform system checkouts and interpret results from mechanical and electrical diagnostic reports and compile and maintain system records. Students will apply safety regulations and requirements and identify and mitigate public safety issues during system installations.</p> | CTA | — |
| 010718 | <p>Oil and Gas Operations Students will develop the skills applicable to careers in petroleum, natural gas and coal industries. They will learn practices related to exploration, leasing, surveying, drilling, geophysical logging and completion process. Students will be familiar with wellhead and surface production equipment and interpret production histories and graphs. Students will learn sampling, analysis, monitoring and control techniques for effective environmental management in the extractive industries and the principals of metering, sales and marketing.</p> | CTA | — |
| 010720 | <p>Environmental Science for Agriculture and Natural Resources Learners will study relationships between organisms and their environment. Principles of biogeochemical cycles, air-water-land relationships, non-point pollution, and wetlands will be applied. Learners will examine economic fundamentals of resource development, agriculture sustainability, energy needs and pollution control. Learners will analyze and interpret data gathered from ecosystems, population studies, forest management practices, pesticide use, land use and waste management. Learners will develop responses to environmental problems and develop management strategies for responsible conservation and resource development.</p> | CTA | — |
| 010725 | <p>Environmental Systems Management Learners will analyze and interpret biological, chemical and physical properties of soil, water and air. They will determine the source and type of environmental contamination, evaluate pollution control measures and be prepared to respond accordingly. Learners will be able to monitor treatment processes for potable water, waste water and solid waste. Learners will develop and implement environmental plans using principles governing ecosystems in relation to resource development and industrial processes.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 010730 | <p>Forestry and Woodland Ecosystems Learners will apply principles of botany, dendrology and silviculture to the management of forests and forest ecosystems. Learners will apply principles of timber cruising with surveying and mapping techniques to take forest measurements. Learners will develop the knowledge and skills necessary for forest reforestation, timber stand improvement, timber harvesting and forest product utilization. Learners will operate and maintain forestry equipment, apply fire management practices, and understand related regulations, laws, and policy issues.</p> | CTA | — |
| 010735 | <p>Park and Recreational Management Students will design facilities, develop educational programs and manage resources for use in public recreation. Students will maintain and operate equipment for maintaining wildlife habitat and supporting a variety of public recreational activities. Students will develop marketing and programming skills for park development, apply management practices to park operations and learn the systems required to maintain public safety.</p> | CTA | — |
| 010740 | <p>Urban Forestry The learner will promote the care and management of trees for residential and commercial purposes. Learners will apply principles of soil management, dendrology and pest management to the care and management of trees. Learners will analyze budgets; and develop short and long-range management plans that balance environmental and economic goals and that support sustainable land use patterns. Principles of rigging, advanced rope techniques, and chainsaw applications for tree pruning and removal will be learned.</p> | CTA | — |
| 010745 | <p>Wildlife and Fisheries Learners will apply the principles and practices of resource conservation and management to fish and wildlife populations. Students learn to properly handle wild animals, principles of wildlife nutrition, inventory practices, water quality parameters and testing, and natural and artificial propagation. Learners will apply principles of facility design and layout for managing fish populations. Learners will research and evaluate the impacts of various land practices, legislation, and human activities on habitats and populations.</p> | CTA | — |
| 010910 | <p>Animal Science and Technology Learners will develop business leadership, problem-solving and communication skills in relation to the science and technology of animals. Students will learn responsible animal management principles and routine husbandry practices in relation to animal welfare and behavior. Learners will identify and describe the anatomy and physiology of monogastric and ruminant organisms as it applies to nutrition, reproduction, and animal health. Learners will investigate animal genetics and how it impacts principles of animal improvement, selection and marketing.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 010915 | <p>Animal Nutrition, Health and Reproduction Learners will apply principles of nutritional management for various classes of animals. Learners will analyze nutritional content/quality of feeds; formulate rations; develop feeding recommendations; identify deficiency symptoms and implement corrective methods as needed. Care/management plans are developed that reflect the classification of animals and follows best practices and legal compliance. Learners will monitor/evaluate the quality of animal habitats and estimate carrying capacity as it relates to the impact of the environment and animal health.</p> | CTA | — |
| 010920 | <p>Livestock Science Learners will apply principles of nutrition, health and reproduction to the management of animals, poultry and fish in production agriculture. Learners will demonstrate understanding of anatomy and physiology and apply genetic principles for improvement. Learners will apply knowledge of animal behavior, welfare, and husbandry principles. Learners will evaluate body/carcass composition and apply marketing principles to the sale and distribution of livestock products. Learners will employ communication, business, and management strategies appropriate for the industry.</p> | CTA | — |
| 010925 | <p>Small Animal Science Learners apply principles of nutrition, health and reproduction to the management of animals intended for companionship or research. Through interpretation, problem-solving and diagnostic methods, the learners develop and implement management programs that reflect responsible animal behavior, welfare and husbandry practices. Learners implement principles and practices of nutritional management, responsible breeding and disease management. Safe handling, grooming and training skills are developed and applied. Learners identify business management procedures and understand the importance of business regulations.</p> | CTA | — |
| 010930 | <p>Veterinary Science Learners will develop knowledge of veterinary pharmacology, radiology and imaging techniques, principles of surgery, safe laboratory skills, and the concepts of ethics and professionalism in the work place. Learners will develop skills in inquiry and statistical methods. Learners will describe causes, symptoms, and treatment of common diseases with special emphasis on developing preventative health management plans and breeding programs. Learners will utilize principles of technology to manage information systems, and research issues affecting the industry.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 010935 | <p>Equine Science and Management Learners are introduced to responsible equine management principals and routine husbandry practices in relation to equine behavior methodology and legal compliance. Learners will apply knowledge of health and nutrition when designing preventative health care plans, breeding plans, and feed management programs. Safe handling, grooming, training, equipment selection/maintenance/use and emergency care techniques are developed and applied. Learners will evaluate responsible stewardship practices and develop production management strategies that emphasize the industries goals through good reproductive decision-making.</p> | CTA | — |
| 010940 | <p>Zoo and Aquarium In this course, learners will identify and apply responsible animal science principals and routine husbandry practices to captive animal populations. Learners will apply knowledge of animal behavior, welfare, and husbandry principals to enhance exhibit design, animal enrichment and training plans, and educational and visitor engagement programs. Emphasis will be given to data collection and research techniques. Principles of responsible population control, disease risk and management, and problem-solving/action planning techniques will be examined.</p> | CTA | — |
| 011010 | <p>Science and Technology of Food This first course in the pathway examines the research, marketing, processing and packaging techniques applied to the development of food products. Learners will examine principles of food preservation techniques and determine correlations to food sensory, shelf life and food stability. Learners will examine and develop food safety, sanitation, and quality assurance protocol. Government regulations and food legislation will be examined and the implications to food science and technology will be identified.</p> | CTA | — |
| 011015 | <p>Food Marketing and Research Learners will focus on the stages of research process from research planning to gathering, analysis, and interpretation of data as it relates to food marketing management. Learners will apply knowledge of food additives, nutrition, mixes and solutions to enhance existing food products and to create new processed foods. Learners will identify and describe the impact that technological advances have on food production and availability. Cultural trends and preferences affecting product development will be examined.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 011020 | <p>Meat Science and Technology Learners will apply food chemistry and microbiology to processing, preservation, packaging, storage and marketing of meat products. Learners will design and implement a quality assurance program that meets legal compliance. Learners will evaluate carcass composition, assign quality grades, and examine valued-added products. Learners will demonstrate knowledge of safety regulations and operate and maintain equipment and facilities. Learners will practice customer service and sales techniques while understanding the scope and importance of business regulations.</p> | CTA | — |
| 011025 | <p>Microbial Food Science and Safety Learners are introduced to the chemistry, bioengineering and microbiology involved in producing food products. Processes contributing to the appearance, taste, texture, and smell of food products will be explored. Learners will examine functional foods, value-added foods, organic foods and food additives. Contamination points from biological hazards and food allergens will be identified and preventive measures developed. Food laws, regulations and regulatory and commercial grading standards will be examined.</p> | CTA | — |
| 011030 | <p>Applications of Food Science and Technology Learners will use principles and practices of food processing and packaging to develop solutions for problems in food production, handling and storage. Learners will examine heat preservation, cold processing, food irradiation, fermentation, milling, and hydrogenation processing techniques. Learners will examine the process of food product development and techniques used to measure food sensory aspects, shelf life and food stability. Learners will examine government regulation impact on labeling, new packaging technologies, harvesting, transportation, and the environment.</p> | CTA | — |
| 012010 | <p>Animal and Plant Biotechnology Learners will apply principles of chemistry, microbiology and genetics to plant and animal research and product development. They will describe the importance of biotechnology in society and analyze the issues that have affected agricultural biotechnology. Students will apply genetic principals to determine genotypes and phenotypes. Students will describe the parts and functions of animal and plant cells and their importance in biochemistry.</p> | CTA | — |
| 012015 | <p>Laboratory Techniques and Safety Learners will demonstrate proper techniques and procedures that apply in a laboratory environment. They will examine the theory of application and will operate various analytical instruments. Students will apply current Good Laboratory Practice and Good Manufacturing Practices. Learners will demonstrate proper safety procedures used in the laboratory and abide by the compliance standards of regulatory agencies.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|---------------|--|-----------------------------------|-----------------------------|
| 012020 | <p>Applications of Genetics Learners will explore the mechanisms of heredity and genetics through food, plant, and animal science. Students will examine DNA and chromosome structure, transcription and gene regulation; replication and cell division; patterns of inheritance; and genetic recombination mutations and their repair. Learners will apply molecular technologies to food, plant and animal research.</p> | CTA | — |
| 012025 | <p>Bioinformatics Learners will be introduced to the basics of bioinformatics where they will employ mathematical, statistical and computational methods to process large amounts of biologically-derived information. The main techniques that will be examined related to sequence analysis are gene identification, genome sequencing, sequence comparison, and database searching. Students will apply biological principles to understand the application of bioinformatics algorithms and software.</p> | CTA | — |
| <u>010125</u> | <p><u>Animal and Plant Science</u> <u>Students will apply knowledge of animal and plant science to the agriculture industry. They will be introduced to the value of production animals relative to the agricultural marketplace. Students will engage in animal classification and selection, body systems, along with animal welfare and behavior in relation to the production of animals. Students will learn principles of plant anatomy and physiology, and the role of nutrition, deficiencies and growing environment on plant production. Throughout the course, business principles and professional skills will be examined.</u></p> | <u>CTA</u> | <u>==</u> |
| <u>010130</u> | <p><u>Global Economics and Food Markets</u> <u>Students will examine economic principles related to agriculture, food, and natural resources along with the operation and use of commodity futures and option markets. Students will learn economic principles with emphasis on their application to the solution of agricultural industry problems. They will examine future exchanges and commodity futures contracts, hedging strategies, as well as put and call options. Throughout the course, students will become familiar with the causes and consequences of economic growth, globalization and development.</u></p> | <u>CTA</u> | <u>==</u> |
| <u>010945</u> | <p><u>Animal Anatomy and Physiology</u> <u>Students will examine the structure and function of the major organ systems as well as the function and principle of blood flow in animals. Students will study internal and external anatomical parts, their functions, and will investigate the relationship among these parts and systems within the body of animal. Throughout the course, students will apply the internal functions of anatomical structures to the business and industry principles of the animal industry.</u></p> | <u>CTA</u> | <u>==</u> |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 010640 | <u>Landscape Hardscapes</u> <u>Students will learn skills in constructing and installing hardscape features in a landscape. Topics include basic principles of building and implementing designs drawn and drafted from computer-aided designs and blueprints. Students will install artificial lighting, water systems, deck and creative concrete features on job sites. Throughout the course, business management practices, employability skills, and safety procedures will also be emphasized.</u> | CTA | == |

Table 20. Career Field 02: Arts & Communications Codes (04xxxx, 34xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 340001 | Arts and Communication Primer The worlds of art designers, performers, and media artists intersect historically, culturally and aesthetically. In this introductory course for the Arts and Communication Career Field, students learn the basics of performance, design, audio, and video. They review brochures, photographs, news stories, videos, and other products common to the visual, media and performing arts industries. | CTA | — |
| 340005 | Visual Design and Imaging Programs that focus on the creation, design, and execution of layouts and illustrations on various mediums including electronic media and the theory and processes of image transfer, including offset, flexography, lithography, photoengraving and other techniques. Communications, business principles and leadership skill development related to the industry are essential to the program. Specialization areas include commercial art and graphic occupations. | CTA, TEC | — |
| 340006 | Business of Arts and Communications A growing number of professionals make a living in industries related to arts and communications. From event management to tracking expenses, students learn the business side of visual, media, and performing arts. Topics include marketing, branding, producing, promoting, booking, budgeting and merchandising, etc. Students learn and apply intellectual property rights, licensing, copyright, royalties, liabilities, and contractual agreements. They learn how both profit and non-profit organizations businesses operate. | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 340009 | <p>Arts and Communication Capstone Students apply Arts and Communication program knowledge and skills in a more comprehensive and authentic way. Capstones are project/problem-based learning opportunities that occur both in and away from school. Under supervision of the school and through partnerships, students combine classroom learning with work experience to benefit themselves and others. These can take the form of mentorship employment, cooperative education, apprenticeships, and internships.</p> | CTA | — |
| 340010 | <p>Principles of Arts and Communications A course focused on the fundamental principles and practices of image capture, audio and writing in Media Arts; creating and outputting illustrations for Visual Design and Imaging; and creating, interpreting and performing works for the Performing Arts all of which convey a message and stimulate thought. Business principles and leadership skill development related to the industry are essential to the program.</p> | CTA | — |
| 340015 | <p>Media Arts Programs that focus on the use of still and motion photography in journalism. Communications, business principles and leadership skill development related to the industry are essential to the program. Specialization areas include journalism, photography and digital media.</p> | CTA | — |
| 340020 | <p>Performing Arts Programs that focus on the creation, interpretation and performance of works that use auditory, kinesthetic, and visual phenomena to express ideas and emotions in various forms. Communications, business principles and leadership skill development related to the industry are essential to the program. Specialization areas include music, dance and theater.</p> | CTA | — |
| 340110 | <p>Media Arts Primer In this first course of the Media Arts pathway students will learn the basics of how to convey messages through journalism, commercial advertising, and marketing. They review the accuracy and impact of words and visuals used in news, advertisements, and commercials. They learn essential terminology and basic tools for delivering messages. They understand the content length, deadlines, and responsibilities of various delivery channels.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 340115 | <p>Media Arts Writing Copy for news stories, technical journals, advertisements and social media has similarities and differences. This course focuses on creating and adapting content for multiple purposes with print, radio, TV and the Web. Students conduct and synthesize research and interviews to write persuasive and unbiased copy. They evaluate and edit text for purpose, style, space limitations, and accuracy. They accentuate messaging with design elements. Strategies to determine audience impact are engaged.</p> | CTA | — |
| 340120 | <p>Digital Image Editing This course focuses on manipulating images for final output through print and Web-based production. Students obtain a brief perspective on analog image editing and delve into the world of editing digital photos, illustrations and other artwork. They learn to adjust resolution and exposure, modify color, compress data, and format and manage files. Students will use problem-solving strategies and work collaboratively to complete the creative process with artists, printers and Web developers.</p> | CTA | — |
| 340125 | <p>Motion Graphics From script to storyboard and special effects, students develop products focused on a central theme and purpose. Using commercial and open-source digital animation software, they create an illusion of motion that extends beyond traditional frame-by-frame footage. They learn skills and techniques involving music, animation, text, voice, photos and videos. Products are adjusted for access through computers, mobile devices, game consoles, projectors, radio, and TV.</p> | CTA | — |
| 340130 | <p>Audio Broadcast Sound is essential to broadcast journalism and advertising. Students compare and contrast how sound alone and sound combined with visuals can entertain, inform, and initiate action. They generate content, record, edit, mix, and produce voice and music for airwaves, podcasts, and/or the internet. They adapt for analog and digital audio while adhering to Federal Communications Commission rules and regulations related to bandwidth and advertising.</p> | CTA | — |
| 340135 | <p>Musical Engineering Students put music theory and basic music skill into practice as they engineer sound for live and recorded production. They create, capture, edit, mix, and synchronize music into audio and video tracks of various formats. Topics include acoustics, reflection, absorption of sound and reverberation. Students create products based on research of audience sensitivity and need and do so in compliance with laws related to intellectual property and competition.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 340140 | <p>Video Broadcast This course focuses on video broadcast for the journalism industry. Skills attained include interviewing, image capture, color manipulation, audio and video blend, lighting and editing. Students critique news broadcasts and research content. They plan and shoot video for live and recorded use in a specific time slot while adhering to laws related to defamation, libel, copyright, and privacy.</p> | CTA | — |
| 340145 | <p>Video Production This course focuses on video production for commercial use. Students plan and coordinate work with clients to produce projects on a tight timeline. They learn how to read and interpret a script, select and maintain equipment and combine graphics, text and special effects. Skills attained include pre-production documentation and planning; in-production audio and video recording; and post-production editing and distribution.</p> | CTA | — |
| 340150 | <p>Photographic Composition Aesthetics and techniques are essential to producing a good photograph. This course focuses on capturing and manipulating images in digital photography with some skill development in darkroom film processing, printing, and enlarging. Topics include camera functions, mechanics of image capture, image manipulation, and print production. Students shoot photographs in various studio and indoor and outdoor settings.</p> | CTA | — |
| 340155 | <p>Photography Production Students advance their digital photographic knowledge and skill using camera raw files with a focus on commercial use and knowledge of production software. Emphasis is on creative expression and client communications to increase marketability of product. Topics include white balance, saturation, contrast and color correcting. Students apply copyright and fair use guidelines.</p> | CTA | — |
| 340160 | <p>Multi-Media Web Production The focus of this course is on merging different types of media on the Internet. Students combine text, still photography, audio, videography, and graphic arts to create interactive Web pages. They demonstrate creative, digital storytelling accessible from multiple platforms. Students learn project management and marketing. They learn how to create Web content that is accessible by individuals with visual disabilities.</p> | CTA | — |
| 340165 | <p>Digital Cinema Inspiration, technique, and trends are the focus of this single-camera, cinema-style course. Students engage in creative storytelling through concept development, scriptwriting, and storyboarding. They learn to achieve the look of film through lighting and camera technique as well as double-system audio capture. Legal and ethical aspects such as copyright and fair use guidelines are learned.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 340210 | <p>Performing Arts Primer In this first course for the Performing Arts pathway, students examine how music, dance and theatre disciplines connect to create a production. They compare and contrast different genre, social contexts, and cultural aspects of dance, music and theatre from early Greek to present day. They learn the role of stagecraft, including new and emerging technology.</p> | CTA | — |
| 340215 | <p>Dance Performing arts directors and choreographers look for dancer technical strength, preciseness, and ability to engage audiences. In this course, students develop physical stamina and fitness, musicality, expression and sequence retention while learning terminology for dance movement and for the industry. Through solo, ensemble, and improvisational movement, they interpret and communicate stories and feelings. Self-discipline, including emotional and nutritional health, is reinforced.</p> | CTA | — |
| 340220 | <p>Choreography The choreographer designs steps and routines. In this course, students critique choreographed works from multiple dance genres. Using this knowledge and research as well as understanding specific characteristics and movements of dance, they compose sequences into their own designs. They alter choreography in solo and/or ensemble work. They work with dancers to maximize aesthetic appeal for the audience while helping them manage physical and psychological demands of a performance.</p> | CTA | — |
| 340225 | <p>Acting and Script Analysis This course combines understanding of the relationship between actor and script. Students research major theatre genres and influences, breaking down a script to discover objectives, obstacles, tactics, and character development. They create a script with scenes, plot points, and characters. They learn acting techniques, including imagery, personal associations, and inner monologue. They perform a role within an original or established piece of work.</p> | CTA | — |
| 340230 | <p>Acting Performance Meeting expectations of the casting director and audience is critical to any successful performer. This course focuses on maximizing an actor's physical and emotional expression, vocal intonation, memorization, and imagination to convey stories and feelings. Whether spoken or sung, stylistic identity is reinforced. Other topics include material selection, developing a score of action for a role, sustaining a character and self and peer critique.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 340235 | <p>Musical Concept From warm up skills to complex rhythmic and technical passages, students combine theory and technique to sing or play at least one musical instrument. They recognize different harmonic, rhythmic and melodic structures based on culture, era and style. They write, read and understand musical symbols. Other topics include scales and mode studies, dictation, transcriptions and. Students provide and receive performance critiques.</p> | CTA | — |
| 340240 | <p>Music Ensemble and Composition In this course, students compose music and perform in groups. They sight read music, blend and balance ensemble instrumental and/or vocal performance and respond to cues with an understanding of stage presence and choreography. They score an original musical piece using notation and sequencing software. Talent and self-confidence is strengthened through practice, social interaction, self/peer critique, and performance.</p> | CTA | — |
| 340245 | <p>Musical Theatre The troupe member with abilities in music, dance, and acting has “triple threat” value in musical theatre. In this course, students assume the roles of singer, instrumentalist, actor and dancer as well as director, stage manager, set designer and/or costume technician. Students learn to take, and give orders to accomplish tasks. They analyze historical and current-day exemplary models of musical theatre for story line, musical arrangement, and audience appeal.</p> | CTA | — |
| 340250 | <p>Stagecraft Creating the set, balancing the lights, projecting video and engineering the sound all help to accentuate the script and characters in a show. Students learn the skills of stagecraft through research, critique, and hands-on experience. They use technology, background design, makeup, and costuming to enhance overall production with a focus on the script and director vision.</p> | CTA | — |
| 340255 | <p>Stage Design and Construction This course focuses on design and construction of what the audience sees around actors. Students analyze scripts and budgets to determine appropriate sets. They create renderings and drawings by hand and through computer drafting programs to present the designer’s vision. They develop models, mock-ups, and final construction of scenery. In addition to construction techniques, they acquire workplace skills such as leadership, collaboration, and safety.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 340260 | <p>Costuming and Makeup This course focuses on character design specific to makeup and costumes. Students research, render, and produce masks, hats, dresses, and other attire. They apply actor makeup and choose wigs or hair-styles aligned with a production script and/or purpose. Factors influencing character design are story line, director concept, relationships among characters, character movement, color, and stage lighting.</p> | CTA | — |
| 340310 | <p>Visual Design Primer Visual design takes the form of charts, drawings, boxes and more. In this first course for the Visual Design and Imaging pathway, students gain a perspective of symbols, typography and product output. They acquire basic knowledge of today’s role of graphics in communication industries. Focusing on the consumer, students analyze products and create their own designs for critique. They learn how safety, deadlines, teamwork, and ethics relate to the work.</p> | CTA | — |
| 340315 | <p>Visual Creation A keen eye for detail, art elements, design principles, and styles of art are essential to the world of visual communications. Students learn proper composition with such principles as color theory, typography, and drawing. They create designs targeted for the Internet and for two- or three-dimensional products while adhering to copyright laws and deadlines.</p> | CTA | — |
| 340320 | <p>Digital Print Design Starting with understanding target audiences, demographics, product shelf life and sustainability students create designs for two- or three-dimensional products. Using workflow processes, they lay out newsletters, posters, business cards and other products. They create logo and package designs for corporate branding, marketing, and advertising. Critical thinking is engaged in multiple-level critiques.</p> | CTA | — |
| 340325 | <p>Digital Media Art This course focuses on digital technology for products accessed through computers, mobile devices, game consoles, projectors, radio, and TV. Students apply techniques to digitize drawing, painting, and typography. They analyze the effects of single-color and multi-color output. They identify advantages and disadvantages of digital communications from philosophical, ethical, creative, and commercial output perspectives. Products are critiqued for design, production quality and customer impact.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 340330 | <p>Visual Distribution Students analyze customer preferences to determine product creation, production, and delivery. From a four-color vehicle wrap to a spot varnish that adds spark to an annual report cover, students learn techniques to enhance product uniqueness in the graphic arts industry. They compare the differences of customer impact between using traditional mass distribution to individual consumer targeting. Among strategies engaged are Variable Data Imaging (VDI), Quick Response (QR) codes and e-mail blasts.</p> | CTA | — |
| 340340 | <p>Advertising and Communication Creators and producers of graphic images must understand how to integrate and adapt creations for multiple marketing purposes. Students research and analyze the power of visuals in advertising campaigns and public relations events. Using the principles of advertising and visual communications, they develop strategies and products for specific purposes and audiences. They use logos, images, and type integrated strategically to create both printed and electronic products on a theme.</p> | CTA | — |

Table 21. Business Administration Courses. This includes courses from three career fields: 03–Business & Administrative Services (14xxxx); 07–Marketing (04xxxx); and 15–Finance (14xxxx).

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|---|--|-----------------------------------|-----------------------------|
| Career Field 03: Business & Administrative Services Codes (14xxxx) | | | |
| 140050 | <p>Introduction to Business and Administrative Services This career field course is based upon the Business and Administrative Services Career Field Technical Content Standards and includes content that crosses all pathways of the career field. It is the basics course that leads to specialization in one of the career pathways of Administrative and Professional Support, Legal Management and Support, Medical Management and Support, and Management.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 140075 | <p>Interdisciplinary Career Field Business Concepts This course addresses business content specific to the various career fields and is addressed in a contextual manner. Content is based on business competencies, including business process and computer applications, within the career field technical content standards for the career field that serves as the anchor class. The course must be correlated to an anchor course in any career field except business and administrative services, finance, marketing, or information technology.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS | — |
| 140300 | <p>Administrative and Professional Support Based on a sequence of courses, students will be prepared for careers which support business operations through a variety of administrative duties including information and communication management, data processing and collection, and project tracking. Due to changes in technology, the skills required in administrative support careers have increased and correspond with that of a mid-level manager. Sample occupations within this pathway include: administrative assistant, customer service representative, executive assistant, office manager, and project coordinator.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS, TEC | — |
| 140310 | <p>Legal Management and Support Based on a sequence of courses, students will be prepared for careers which facilitate legal operations through a variety of management and administrative duties. Employees in this field are found in law firms, courts, court reporting firms, legal departments of corporate businesses, and government regulatory agencies. Sample occupations within this pathway include: legal office manager, legal assistant, legal secretary, paralegal, court administrator, compliance analyst, regulatory analyst.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--|---|-----------------------------------|-----------------------------|
| 140320 | <p>Medical Management and Support Based on a sequence of courses, students will be prepared for careers which facilitate medical business operations, through a variety of management and administrative duties. Employees in this field are found in medical offices, hospitals, and insurance companies. Sample occupations within this pathway include: admissions specialists, benefits coordinators, medical billing specialists, medical records and health information technician, medical office manager, claims processor, and medical coding specialist.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS, TEC | — |
| 140800 | <p>Business Management Based on a sequence of courses, students will be able to plan, organize, direct, and evaluate all or part of a business organization (including their own) through the allocation and use of financial, human and material resources. Activities in which they are engaged include project management, business analysis, quality control, scheduling, procurement and warehousing, and activities related to staffing. Sample occupations within this pathway include: business analyst, chief operations officer, district manager, master scheduler, project manager, purchasing manager, small business manager/owner, supervisor, human resources generalist/manager, labor relations, manager, recruiter, training manager.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS, TEC | — |
| 142210 | <p>Legal Environment of Business Students will examine all aspects of business law including the judicial system, differences between types of laws and origins of laws, administrative and employment laws and laws impacting individuals as well as businesses. Students will also research real estate and debtor and creditor laws and regulations. Students will learn to support attorneys by conducting legal research, and preparing fully-compliant legal documents. Compliance and contract law will be emphasized.</p> | CTA, BUS | — |
| Career Field 07: Finance Codes (14xxxx) | | | |
| 140025 | <p>Finance Career Field Course This career field specialization course is based upon the Finance CFTCS and includes content that crosses all pathways of the career field. It is the basics course that leads to specialization in one of the career pathways of Accounting or Financial Services.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--|---|-----------------------------------|-----------------------------|
| 140100 | <p>Accounting (Career Technical) Prepares students for careers that record, classify, summarize, analyze and communicate a business’s financial information and business transactions. Accounting includes such activities as bookkeeping, systems design, and analysis and interpretation of accounting information. Sample occupations include: certified public accounting (CPA), auditor, financial accountant, accounting clerk, treasurer, bookkeeper, forensic accountant, and international accountant.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS | — |
| 140110 | <p>Financial Services Prepares students for careers in banking, securities and investments, and insurance. Activities include accepting deposits, lending funds and extending credit, banking services, investments, mortgages and loans, investments, real estate, and insurance. Sample occupations include: loan officer, branch manager, investment banker, financial planner, bank teller, personal financial advisor, real estate broker, and credit analyst.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS | — |
| Career Field 15: Marketing Codes (04xxxx) | | | |
| 040805 | <p>Introduction to Marketing Broad preparation for careers that help identify and understand target audience needs and wants, generate demand, or get a good, service or idea to that audience. This can be the first course for all marketing, business administration or hospitality and tourism pathways.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS | — |
| 040810 | <p>Marketing Management Educational programs in marketing management prepare learners for careers requiring broad, cross-functional knowledge of marketing and management. These functions include supply-chain management, marketing-information management, pricing, product/service management, marketing communications, and selling.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 040815 | <p>Marketing Communications Preparation for careers that inform, remind, and/or persuade a target audience including advertising, public relations, and multimedia marketing communications.</p> <p>FY16 will be the last year for this subject code; it will be deleted as of FY17.</p> | CTA, BUS | — |

They will examine legal and ethical issues associated with management as well as management functions, levels, and types. Project management technology, tools, and processes will also be emphasized.</p> | CTA, BUS | — |
| 141025 | <p>Management Principles Students will apply management and motivation theories to plan, organize, and direct staff toward goal achievement. They will learn to manage a workforce, lead change, and build relationships with employees and customers. Students will use technology to analyze the internal and external business environment, determine trends impacting business, and examine risks threatening organizational success. Ethical challenges, project management, and strategic planning will also be addressed.</p> | CTA, BUS | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 141030 | <p>Strategic Entrepreneurship Students will use innovation skills to generate ideas for new products and services, evaluate the feasibility of ideas, and develop a strategy for commercialization. They will use technology to select target markets, profile target customers, define the venture’s mission, and create business plans. Students will take initial steps to establish a business; Students will calculate and forecast costs, break-even, and sales. Establishing brand, setting prices, promoting products, and managing customer relationships will be emphasized.</p> | CTA, BUS | — |
| 141035 | <p>International Business Students will evaluate global business strategies and market-entry methods for conducting business internationally. They will use technology to determine the impact of government, economics, geography, history, ethics, and digital communication tools on global trade. Management of sourcing and procurement, quality, distribution and supply chain in a global environment will be emphasized. Students will identify financing options for international operations. They will also analyze the competitiveness of U.S. companies in the international marketplace.</p> | CTA, BUS | — |
| 142000 | <p>Fundamentals of Business and Administrative Services This is the first course specific to the Business and Administrative Services career field. It introduces students to the specializations offered in Business and Administrative Services. Students will obtain fundamental knowledge and skills in general management, human resources management, operations management, business informatics and office management. They will acquire knowledge of business operations, business relationships, resource management, process management, and financial principles. Students will use technological tools and applications to develop business insights.</p> | CTA, BUS | — |
| 142005 | <p>Office Management Students will apply techniques used to manage people and information in a business environment. Students will learn to build relationships with clients, employees, peers, and stakeholders and to assist new employees. They will manage business records, gather and disseminate information, and preserve critical artifacts. They will also examine contracts, internal controls, and compliance requirements. Business office tools and applications will be emphasized.</p> | CTA, BUS | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 142010 | <p>Legal Environment of Business Students will examine all aspects of business law including the judicial system, differences between types of laws and origins of laws, administrative and employment laws and laws impacting individuals as well as businesses. Students will also research real estate and debtor and creditor laws and regulations. Students will learn to support attorneys by conducting legal research and preparing fully-compliant legal documents. Compliance and contract law will be emphasized.</p> | CTA, BUS | — |
| 142015 | <p>Medical Office Management Students will carry out procedures used to manage people and information in medical offices. Students will code medical procedures in accordance with applicable guidelines as well as use technology to convert patient information to electronic medical records. They will also manage the insurance billing and collection process, utilize a patient scheduling and registration system, and develop a compliance program. Medical office safety and security will be emphasized.</p> | CTA, BUS | — |
| 142020 | <p>Operations Management Students will learn to plan, organize, and monitor day-to-day business activities. They will use technology to plan production activities, forecast inventory needs, and negotiate vendor contracts. Students will also calculate break-even, set cost-volume-profit goals, and develop policies and procedures to promote workplace safety and security. They will design sustainability plans and use lean and six sigma principles to plan for quality improvement. Corporate social responsibility, ethics, risk management, and compliance will be emphasized.</p> | CTA, BUS | — |
| 142025 | <p>Supply Chain Management Students will determine how to facilitate the flow of goods from the point of origin to the point of consumption. Students will utilize technology to track supply chains and measure their effectiveness and efficiency. They also will identify opportunities to improve service levels, quality, and costs through supply chains and select strategies for improving customer and supplier relationships. International business, business process analysis, project management, internal controls, and compliance will be emphasized.</p> | CTA, BUS | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 142030 | <p>Logistics Management Students will develop plans and networks to move materials, information, products, and services through organizations. Students will analyze transportation cost structures and reverse logistics' costs. They will utilize technology to evaluate warehouse size and space layouts. Students will also design receiving and fulfillment processes and develop preventive maintenance schedules. Requirements for the treatment, storage, and disposal of hazardous materials will be emphasized. Project management techniques and international business will be examined.</p> | CTA, BUS | — |
| 142035 | <p>Human Resource Management Students will develop human resources strategies to obtain, retain, and effectively use talent throughout the organization. Students will utilize technology to create job applications, job descriptions, and job profiles to support the talent acquisition process. They will learn to recruit applicants, administer employment assessments, conduct background investigations, and make and communicate hiring decisions. Students will also develop employee handbooks and establish performance improvement processes. Rewards and recognition practices, relationship management and compliance will be addressed.</p> | CTA, BUS | — |
| 142040 | <p>Business Informatics Students will capture and use organizational knowledge and data to solve business problems and meet specific business needs. Students will select tools and techniques to facilitate knowledge sharing. They will also maintain and update knowledge management systems. They will examine business issues using business process analysis and complete data research and analysis using structured approaches and tools. Relationship management and project management skills will also be emphasized.</p> | CTA, BUS | — |
| 142045 | <p>Business and Administrative Services Capstone The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in a Business and Administrative Services program in a more comprehensive and authentic way. Capstones often include project-/problem-based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeshipinternship.</p> | CTA, BUS | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 142050 | <p><u>Medical Terminology for Business</u> <u>This course focuses on the development and use of a working medical vocabulary. Topics include medical terminology development, business relationships, compliance, and business practices. Students will use medical terminology for transcription, coding, and related medical management processes. Students will also focus on operation of a medical office and office-related skills.</u></p> | CTA | — |
| 143000 | <p>Finance Foundations This is the first course specific to Finance. It introduces students to the specializations offered in the career field. Students will obtain fundamental knowledge and skills in accounting, banking services, corporate finance, insurance, and securities and investments. They will acquire knowledge of financial analysis and application, business law and ethics, economics, international business and business relationships. Knowledge management and information technology will be emphasized. Employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |
| 143005 | <p>Financial Accounting Students will track, record, summarize, and report a business’s financial transactions. They will develop financial documents, project future income and expenses, and evaluate the accuracy of a business’s financial information. Students will also apply tools, strategies, and systems to evaluate a company’s financial performance and monitor the use of financial resources. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |
| 143010 | <p>Corporate Finance Students will manage policy and strategy for corporate budgeting, investment, and financial planning. They will calculate profitability, predict business success and the likelihood of failure, and compare business performance within and across industries. Students will also develop and track the achievement of financial goals. They will determine how to balance risk with return and select strategies for recovering from risky situations and disasters. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |
| 143015 | <p>Managerial Accounting Students will use financial information to make strategic business decisions. They will monitor business profitability, measure the cost-effectiveness of expenditures, prepare budget and forecast reports, and set achievable business financial goals. Students will also use critical information on financial documents to determine risks to short-term and long-term business success. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 143020 | <p>Fundamentals of Financial Services Students will develop knowledge and skills needed in the banking, insurance, and investment industries. They will analyze banking products and services, determine ways in which insurance reduces risk, and calculate insurable losses. Students will also learn to sell financial products and build positive relationships with clients and colleagues. They will use financial ratios to evaluate company performance and select profitable investments for clients. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |
| 143025 | <p>Financial Services Operations Students will plan, organize, and carry out day-to-day activities unique to the banking, insurance, and investment industries. They will learn to underwrite loan and insurance applications, handle problem accounts, and investigate and process insurance claims. Students will also evaluate risks faced by financial institutions and develop processes to promote ethically and legally compliant behavior throughout a banking, insurance, or investment company. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |
| 143030 | <p>Finance Capstone The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in a Finance program in a more comprehensive and authentic way. Capstones often include project-/problem-based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship/internship.</p> | CTA, BUS | — |
| 144000 | <p>Marketing Principles This is the first course in the Marketing career field. It introduces students to the specializations offered in Marketing. Students will obtain fundamental knowledge and skills in marketing communications, marketing management, marketing research, merchandising, and professional selling. They will acquire knowledge of marketing strategies, market identification techniques, employability skills, business ethics and law, economic principles and international business. Technology, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 144005 | <p>Marketing Applications Students will develop and implement marketing strategies and techniques across marketing functions: channel management, marketing research, market planning, pricing, product-/service management, and branding. They will use marketing operations procedures and activities to ensure marketing’s efficiency and effectiveness. Students will generate, screen, and develop new product ideas. They will predict economic trends and conditions and determine how cultural intelligence can impact organizations. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |
| 144010 | <p>Integrated Marketing Communications Students will create, execute, and evaluate promotional strategies and content for advertising, sales promotion, and publicity/public relations. They will apply project management techniques to guide and control promotional campaign development and execution. Students will incorporate motivation theories, branding techniques and design principles in communications with targeted audiences. They will plan and implement procedures to use marketing communications that mitigate image or brand-damaging issues. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |
| 144015 | <p>Digital Marketing and Management Students will apply tools, strategies, and processes to communicate digitally with targeted customers. They will create, implement, and critique online advertising, email marketing, websites, social media, mobile marketing, search-engine optimization, video or images and podcasts/webcasts. Students will apply project management techniques to guide and control digital communications efforts. They will also create and repurpose content for use in digital environments. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |
| 144020 | <p>Marketing Research Students will conduct qualitative and quantitative marketing research using primary and secondary data. They will gather, synthesize, evaluate, and disseminate marketing information for use in business decision-making or to address a specific marketing problem or issue. Students will apply project management techniques to guide and control marketing-research activities. They will use statistical techniques to evaluate marketing data. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 144025 | <p>Merchandising and Buying Students will determine what to buy, when to buy, how much to buy, and from whom to buy products for resale. They will develop a product mix and apply display and visual merchandising techniques. Students will also implement sales support activities, process sales, track products, and plan merchandise flow. Students will establish and grow positive customer relationships. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |
| 144030 | <p>Professional and Technical Sales In this course, students will demonstrate sales processes and techniques used in a business-to-business environment. They will develop, grow, and maintain positive business relationships. Students will monitor trends and the business environment to determine the impact on their sales, customers, and competitors. They will negotiate and adjust prices and sales terms. Students will manage sales activities and territories. Technology, employability skills, leadership, and communications will be incorporated in classroom activities.</p> | CTA, BUS | — |
| 144035 | <p>Marketing Capstone The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in a Marketing program in a more comprehensive and authentic way. Capstones often include project-/problem-based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship/internship.</p> | CTA, BUS | — |

Table 22. Career Field 04: Construction Technologies Codes (17xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 170005 | <p>Construction Technologies Combined with specialization competencies utilizing business and industry technical standards and a math, science, ELA, technology, and business process framework, develops technical literacy in construction systems leading to pathways in pre-construction and design, construction management, apprenticeship and specialization areas (e.g., carpentry, electrical, masonry, environmental control technologies, etc.) and post-secondary articulation.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 170100 | <p>Environmental Control Technologies Utilizes industry standards and a math, science, ELA and technology framework to introduce concepts of installation, repair and maintenance of residential, commercial, and industrial air conditioning systems.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171001 | <p>Carpentry Utilizes industry standards and a math, science, ELA and technology framework to introduce concepts of layout, construction and repair of residential and commercial structures.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171002 | <p>Electrical Trades Utilizes industry standards and a math, science, ELA and technology framework to introduce concepts of layout, assembly, installation, testing, and maintenance of electrical fixtures and apparatus, and the wiring used in electrical systems.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171003 | <p>Heavy Equipment (Construction) Classroom and practical work experiences concerned with the operation, maintenance and repair of heavy duty construction equipment and the gasoline or diesel engines powering the equipment.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171004 | <p>Brick, Block and Cement Masonry Utilizes industry standards and a math, science, ELA and technology framework to introduce concepts of cutting, chipping and fixing in position of brick and concrete block.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 171005 | <p>Interior Design Applications Utilizes industry standards and a math, science, ELA and technology framework to introduce concepts of the interior construction industry; including painting, wallpapering, flooring, tiling, drywall, trim, lighting and more.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 171007 | <p>Plumbing and Pipefitting Utilizes industry standards and a math, science, ELA and technology framework to introduce concepts of layout, assembly, installation, alteration and repair of piping systems and related fixtures and fittings.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171011 | <p>Building and Property Maintenance Utilizes industry standards and a math, science, ELA and technology framework to introduce concepts of the physical structure of an office building, factory, apartment building, house, or similar structure in good repair.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171017 | <p>Building Technology Utilizing industry standards and a math, science, ELA and a technology framework introduces concepts across multiple areas of construction. Areas include carpentry, electrical trades, masonry, and plumbing and related technical topics.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171100 | <p>Custodial Services Utilizes industry standards and a math, science, ELA and technology framework to introduce concepts of layout, assembly, installation, testing, and maintenance of electrical fixtures and apparatus, and the wiring used in electrical systems.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 171805 | <p>Construction—Design-Build Utilizes industry standards and a math, science, ELA and technology framework to introduce concepts of designing, planning, managing, building and maintaining the built environment.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 171806 | <p>Construction—Management Classroom and laboratory experiences combining advanced academics and the skills and knowledge essential to the construction industry. Focus is on supervision, planning and management of the construction process. The program will follow the state TCP and culminate in an associate degree.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 173601 | <p>Wood Product Technologies Utilizing business and industry, math, science and technology standards, introduces concepts of wood product materials and technologies; design and production of window frames, molding, trims and panels; and wood crafting skills including the design and manufacture of wood products such as furniture, moldings, trims, fixtures and cabinetry.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 178000 | <p>Construction Students will learn principles in basic safety (10-hr OSHA), construction math, hand and power tool use and operation, blueprint reading, material handling, communication and employability skills. An emphasis will be placed on safe and green construction practices.</p> | CTA | — |
| 178029 | <p>Construction Pre-Apprenticeship/Capstone Students apply Construction Technologies program knowledge and skills in a more comprehensive and authentic way. Capstones are project/problem based learning opportunities that occur both in and away from school. Under supervision of the school and through partnerships, students combine classroom learning with work experience to benefit themselves and others. These can take the form of mentorship employment, cooperative education, or internships. The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in Construction programs in a more comprehensive and authentic way. Capstones often include project/problem based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 178001 | <p>Carpentry and Masonry Technical Skills This first course in the pathway will introduce to students the materials, methods, and equipment used in carpentry and masonry. Students will organize a project work sequence by interpreting plans and diagrams within a construction drawing set. They will lay out and install basic wall, floor and roof applications. Students will perform introductory concrete applications including formwork, reinforcement, mixing, and finishing. Current advancements in technology, safety, applicable code requirements and correct practices are learned.</p> | CTA | — |
| 178003 | <p>Structural Systems Students will learn procedures and techniques required for layout and framing of walls and ceilings, including roughing-in door and window openings, constructing corners and partitions; bracing walls and ceilings; and applying sheathing. Students will learn methods of roof, cold formed steel, and wood stair framing. Students will learn site and personal safety, material properties, design procedures, and code requirements for structural systems.</p> | CTA | — |
| 178004 | <p>Structural Coverings and Finishes This course will address applications of interior and exterior finish work. Students will identify material properties and select for appropriate application. Students will install thermal and moisture protection including roofing, siding, fascia and soffits, gutters, and louvers. Students will install drywall; trim-joinery and molding and apply wall, floor and ceiling coverings and finishes. Throughout the course, the safe handling of materials, personal safety, prevention of accidents and the mitigation of hazards are emphasized.</p> | CTA | — |
| 178005 | <p>Masonry-Brick and Block The focus of this course will be on the technical aspects of masonry with emphasis on developing introductory skills in laying block and brick. They will learn the physical attributes of masonry materials and the tools required in masonry construction. Students will learn the principles necessary to construct structures with a variety of brick and block materials. Throughout the course, the safe handling of materials and personal safety are emphasized.</p> | CTA | — |
| 178006 | <p>Concrete and Residential Masonry In this course, students will learn to read and interpret construction plans and drawings for masonry applications. They will learn to select materials based on physical attributes and job requirements. Students will set grades and construct forms, for concrete foundations, footings, and retaining walls. They will mix, reinforce, pour and finish concrete in various residential and commercial applications.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 178002 | <p>Mechanical, Electrical and Plumbing Systems Students learn physical principles and fundamental skills across mechanical systems in construction. Students will select materials, assemble, and test basic electrical circuits. Students will select materials and assemble simple copper and plastic plumbing applications for both supply and drains. They will perform simple maintenance of electric motors, electric fixtures and plumbing fixtures. Students will be able to select and install basic ductwork components and learn the operation and maintenance of heating and cooling equipment.</p> | CTA | — |
| 178007 | <p>Construction Electrical Systems This introductory electrical course will emphasize electrical theory, materials, equipment. Students will explore the National Electrical Code and learn worksite safety. They will interpret schematics; construct basic circuits, use test equipment and electrical hand and power tools.</p> | CTA | — |
| 178008 | <p>Residential Electrical Systems This course will emphasize electrical theory, materials, equipment and general methods used in residential construction. Students will navigate the National Electrical Code, learn worksite safety and understand licensing and permitting requirements. They will interpret plans and job specifications and calculate loads and service requirements. Students will install, test and repair receptacle outlet, lighting and small appliance circuits. They will understand circuit protection concepts and install a subpanel. Specialty circuit installation will be addressed.</p> | CTA | — |
| 178009 | <p>Commercial and Industrial Construction Electrical Systems Students will plan and install electrical systems in commercial settings. Students learn worksite safety and understand permitting requirements. Students interpret plans and job specifications and calculate loads and service requirements. Students install, test and repair receptacle outlet, lighting and equipment circuits. They will understand circuit protection concepts and be able to install entrance panels. Specialty commercial circuit installation will be addressed. Students apply operating principles to the installation and troubleshooting of motors and controls.</p> | CTA | — |
| 178010 | <p>Pipefitting and Plumbing Systems This course will emphasize the physical principles, general methods, materials and equipment used in the plumbing and pipefitting. Students will learn worksite safety and understand licensing and permitting requirements. They will interpret plans and job specifications and calculate service requirements. Students will rough in water supply and drainage lines following plumbing codes and municipal building standards. Additionally, students will install and maintain plumbing fixtures.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 178011 | <p>Residential and Commercial Plumbing Systems This course focuses on the advanced residential and commercial plumbing systems. Students will plan, install, and maintain water supply, wastewater and fuel supply components following codes and municipal building standards.</p> | CTA | — |
| 178012 | <p>Heating and Cooling Systems Students will apply principles of heating and cooling to the installation, troubleshooting and maintenance of residential and commercial Heating, Ventilation, and Air conditioning/Refrigeration (HVAC/R) Systems.</p> | CTA | — |
| 178013 | <p>HVAC Refrigeration Students will install, troubleshoot and service residential and commercial refrigeration systems. Students will learn laws of thermodynamics, pressure and temperature relationships, the refrigeration cycle, and refrigerant management. Students will address hydronic systems, chilled water systems, package units, and cooling towers.</p> | CTA | — |
| 178014 | <p>Sheet Metal The fundamentals of the sheet metal trade are the emphasis of this course. Students will learn components of a ductwork system and use architect and engineer’s scales to read and interpret construction drawings for material calculations and selection. Students will layout sheet-metal patterns using parallel line, radial line, and triangular development procedures. Students will, also fabricate edges, joints, seams, and notches; seal and insulate; and install ductwork systems and accessories.</p> | CTA | — |
| 178015 | <p>Telecommunications/Low Voltage Systems Students will apply knowledge of regulatory codes and operating principles to the installation and service of low voltage communications and alarm systems. Students will read and interpret electronic circuit diagrams, specifications, engineering drawings, and service manuals. Students will use measuring and testing instruments to locate circuit and component faults, and to calibrate and test systems. Additionally, students will identify components, layout, install and verify operation of security and access control systems.</p> | CTA | — |
| 178016 | <p>Alternative Power Generation Systems Students will learn the technology and applications of solar and wind energy with an emphasis on installation and service processes. Content includes identifying the functions of photovoltaic, standby power and electric storage systems. Students will perform battery maintenance and implement principles and guidelines of energy analysis needed to carry out effective energy audits in accordance with standards and codes.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 178017 | <p>Powerline/Hi-Voltage Power Transmission This course focuses on the principles of hi-voltage power transmission. Students use code to build, maintain and repair both above-ground and belowground electrical transmission systems. Students will apply specific rigging techniques and equipment to field situations. Emphasis is placed on safety around high voltage equipment.</p> | CTA | — |
| 178018 | <p>Construction Safety and Crew Leadership This course covers OSHA standards (30-hr OSHA) and requirements as they apply to the construction industry and crew/project management. Topics include safety and health hazards, safe practices, construction safety management, and crew management. Emphasis is on hazard identification, avoidance, control and prevention.</p> | CTA | — |
| 178019 | <p>Plan Reading Students learn blueprint reading as it relates to the architecture and construction. Students will use scaling, orthographic projections, dimensioning practices, symbols, notations, and abbreviations to perform area calculations and to interpret floor plan, section, and elevations. Using construction plans, students will identify problems or shortcomings related to the layout and installation of materials for the project.</p> | CTA | — |
| 178020 | <p>Architecture Design – Structural and Mechanical/Electrical/Plumbing Students will use architecture design principles to organize and arrange structures to create a perspective of a building. Students will use orthographic/pictorial projection, freehand technical sketching and computer-aided drafting (CAD) skills to generate floor and wall plans, elevations, sections, details and schedules. Students will develop sets of structural framing and mechanical working drawings that include plumbing, HVAC and electrical power and lighting plans.</p> | CTA | — |
| 178021 | <p>Architecture Design – Site and Foundation Plans Students use advanced architectural design concepts to construct design models including perspective drawings for final presentations. Students use orthographic/pictorial projection, freehand technical sketching and computer-aided drafting (CAD) tools to create site foundation and section plans that include topographical details and schedules. Additionally, students perform zoning analysis, develop preliminary plot plans, and construct grading and utilities plans that include legal descriptions and cut and fill volumes.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 178022 | <p>Construction Management This course provides an integrated look at balancing the planning, estimating, and directing of construction operations. Students learn the process of creating and monitoring a construction project including standard agreements, bidding, estimates and project schedules. Students will learn to manage change orders, accident prevention and loss control, closeouts, and claims with an emphasis in production and quality control. Additionally, students will apply leadership, communications, and problem solving skills to construction management.</p> | CTA | — |
| 178023 | <p>Remodeling/Renovation Students will apply structural and mechanical skills to remodeling and renovations. Also, students will learn the process of securing the required building permits, the management of subcontractors, and the coordination of formal building inspections. Students will troubleshoot design or logistics issues and provide possible solutions. Throughout the course, the safe handling of materials, personal safety, prevention of accidents and the mitigation of hazards are emphasized.</p> | CTA | — |
| 178024 | <p>Facility and Building Maintenance Students are introduced to the maintenance and management processes used in public buildings and industrial facilities. Students will troubleshoot building and systems issues and provide solutions following applicable procedures and standards. Students will operate and maintain machinery and equipment used in grounds and facilities maintenance tasks. Throughout the course, the safe handling of materials, personal safety, prevention of accidents and the mitigation of hazards are emphasized.</p> | CTA | — |
| 178025 | <p>Custodial Services Students select and use the tools and equipment required for maintaining the safety and sanitation of building environments. Students select and apply methods, chemicals and equipment used to clean and maintain resilient, natural, synthetic and special surfaces. Students perform routine and renovation cleaning activities in both common and special service areas with an emphasis in client satisfaction. Additionally, students follow standard safety practices and procedures.</p> | CTA | — |
| 178026 | <p>Heavy Equipment Operations Students perform heavy equipment operating techniques and perform operator level maintenance. Students will learn to survey using lasers, transits and machine control systems. Additionally, students learn the techniques and processes for clearing, grubbing, stripping, excavating, backfilling, stockpiling, and cutting and spreading of fill material. Throughout the course, safety is emphasized.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 178027 | <p>Construction Site Preparation Students use surveying, topographic, satellite positioning, and geometric instruments to locate and prepare a site for construction. Students establish lot and building lines as well as grade levels, and use site plans and elevation drawings to determine excavation needs. Students locate and mark underground and overhead services, identify soil conditions that may require shoring and position batter boards. Additionally, students identify the parameters for site selection, zoning regulations, and the process for filing building permits.</p> | CTA | — |
| 178028 | <p>Interior Design Students learn principles and elements of design as they relate specifically to interior spaces. Students develop functional and aesthetic design concepts with an emphasis in providing design solutions. Students select materials for appropriateness, quality, performance, and cost for interior applications. Students use presentation techniques, technical drawings and other visual materials to enhance and present interior designs.</p> | CTA | — |

Table 23. Career Field 05: Education & Training Codes (35xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 350001 | <p>Introduction to Education and Training Provides options for students to explore Education and Training career field to allow students to pursue the career pathways.</p> | CTA | — |
| 350011 | <p>Teaching Professions Major career courses to prepare students for entry level, technical and professional career option within the teaching professions.</p> | CTA | — |
| 350201 | <p>Early Childhood Education Preparation for employment in childcare services, child development, and early childhood education within the childcare and guidance industries.</p> | CTA | — |

Table 24. Career Field 06: Engineering & Science Technologies Codes (17xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 171821 | <p>Computational Science and Engineering Combined with Engineering Science (subject code 171815), utilizes business and industry technical standards and math, science and technology framework to introduce concepts of the utilization of mathematical formulas to serve as forecasting models across multiple industries in a problem-based format.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171822 | <p>Aerospace Engineering Combined with Engineering Science (171815), utilizes business and industry technical standards and a math, science, and technology framework to introduce concepts of pre-engineering related to aerospace in the Project Lead The Way model and leads to post-secondary articulation.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 171402 | <p>Power Transmission Utilizing business and industry technical standards and a math, science, ELA, technology and business process framework, develops technical literacy in erecting and maintaining power lines and circuits for transmission and distribution of electrical power, and assembling and erecting related equipment and structures.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 171504 | <p>Telecommunications Utilizing business and industry technical standards and a math, science, ELA, technology and business process framework, develops technical literacy in the assembly, installation, operation, maintenance and repair of telecommunications equipment.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 171815 | <p>Engineering Science Utilizing business and industry standards and a pre-calculus/trigonometry, science and technology framework introduces pre-engineering skills, problem solving and critical thinking in the areas of introduction to engineering, principles of engineering, digital electronics, and engineering design and development in the Project Lead the Way model and leads to post-secondary articulation.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171816 | <p>Computer Integrated Manufacturing Combined with Engineering Science (171815), utilizes business and industry technical standards and a math, science, and technology framework to introduce concepts of pre-engineering related to robotic manufacturing in the Project Lead the Way model and leads to post-secondary articulation.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171817 | <p>Civil Engineering and Architecture Combined with Engineering Science (171815), utilizes business and industry technical standards and a math, science, and technology framework to introduce concepts of pre-engineering related to civil engineering and architecture in the Project Lead the Way model and leads to post-secondary articulation.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171818 | <p>Fuel Cell Technologies Combined with Engineering Technologies—Emerging (subject code 171815), utilizes business and industry technical standards and a math, science, and technology framework to introduce concepts of pre-engineering related to fuel cell types, materials, function, and design in the Project Lead the Way model and leads to post-secondary articulation.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 171819 | <p>Materials Joining Technologies Combined with Engineering Technologies— Emerging (subject code 171815), utilizes industry technical standards and a math, science, and technology framework to introduce concepts of pre-engineering related to robotics, material science and nanofabrication in welding in the Project Lead the Way model and leads to post-secondary articulation.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 175000 | <p>Biomedical Science Utilizing business and industry, mathematics, science and technology standards, introduces concepts of biomedical science including principles of the biomedical sciences, human body systems, medical interventions, and science research. This is a Project Lead the Way program only.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 170007 | <p>Engineering Systems Combined with specialization competencies utilizing business and industry technical standards and a math, science, ELA, technology and business process framework, develops technical literacy in engineering and science leading to pathways in the engineering and science career field.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171600 | <p>Energy Science Utilizing industry standards and a math, science, ELA and a technology framework introduces concepts of solar, wind, fossil fuel, nuclear, geothermal, biomass, and fuel cell energy and leads to post-secondary.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171810 | <p>Engineering Technology Combined with the first course in the pathway and utilizing business and industry technical standards and a math, science, ELA, technology framework, introduces concepts of engineering related to mechanical, electrical and industrial engineering and leads to post-secondary education.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 171820 | <p>Biotechnical Engineering Combined with Engineering Science (subject code 171815), utilizes business and industry technical standards and a math, science, and technology framework to introduce concepts of biotechnical engineering, genomics, bioprocesses, agricultural, environmental, and biomedical science in a problem-based format.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171825 | <p>Engineering Design and Development Combined with Engineering Science (subject code 171815) and an elective Project Lead the Way Course introduces concepts of formal research and design in the construction of a solution to an engineering or societal problem.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 175001 | <p>Engineering Design The focus of Engineering Design is the application of the engineering design process. Topics include work-processes, optimization methods, design optimization, and risk management tools. Students will use 2D and 3D modeling software to help them design solutions to solve proposed problems, document their work, and communicate solutions. Additionally, students will interpret industry prints, and create working drawings from functional models. Emphasis is given to experimental problem solving in real systems.</p> | CTA | — |
| 175002 | <p>Engineering Principles This course will introduce students to fundamental engineering concepts and scientific principles associated with engineering design applications. Topics include mechanisms, energy, statics, materials, and kinematics. Additionally students will learn material properties and electrical, control and fluid power systems. Students will learn to apply problem solving, research and design skills to create solutions to engineering challenges.</p> | CTA | — |
| 175003 | <p>Manufacturing Operations Students will learn the production processes applied across manufacturing operations. Students will be able to demonstrate a broad array of technical skills with an emphasis given to quality practices, measurement, maintenance and safety.</p> | CTA | — |
| 175004 | <p>Robotics Students will apply the knowledge and skills necessary to program and operate Robots, using the teach pendant as the main interface point. The Students will learn robotic operations and system configurations. Students will code, compile, and debug programs using the robotic programming language.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 175005 | <p>Aerospace Engineering This course will introduce students to the evolution of flight, navigation and control, flight fundamentals, aerospace materials, propulsion, space travel, and orbital mechanics. Students will learn and apply principles of aerospace design and construction to aircraft, rockets and spacecraft.</p> | CTA | — |
| 175006 | <p>Computer Integrated Manufacturing In this course students will be introduced to all aspects of computer integrated manufacturing. They will learn about robotics and automation, manufacturing processes, computer modeling, manufacturing equipment, and flexible manufacturing systems.</p> | CTA | — |
| 175007 | <p>Digital Electronics Students are introduced to the process of combinational and sequential logic design. The system uses a precise sequence of discrete voltages, representing numbers, non-numeric symbols or commands for input, processing, transmission, storage, or display. Engineering standards and methods for technical documentation will also be learned.</p> | CTA | — |
| 175008 | <p>Mechanisms and Drives Students will learn the principles and practices of machine operation and machine applications. They will learn will learn how machine components such as gears, belts, sprockets, bearings, clutches, couplings, springs, etc. contribute to the application for which the machine is designed. They will also examine the basic drives of such mechanisms as electric motors and hydraulic & pneumatic actuators.</p> | CTA | — |
| 175009 | <p>Engineering Capstone The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in Engineering program in a more comprehensive and authentic way. Capstones often include project/problem based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship/internship.</p> | CTA | — |
| 175011 | <p>DC and AC Electronic Circuits Students will learn the fundamental principles of electricity with emphasis on DC (direct current) circuits and an introduction to AC (alternating current) circuits. They will use concepts of Ohm’s Law, the Power Formula, and Kirchoff’s Laws with series, parallel, and series-parallel circuit applications. The relationship between electricity and magnetism and motor theory will also be introduced. The student will use and maintain digital multimeters and oscilloscopes.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 175012 | Analog Based Electronic Devices Students are introduced to semiconductor diode applications, other two-terminal devices, thyristors, transistors and field effect transistors. Course includes design and analysis of transistor and FET DC bias circuitry. Operational characteristics and applications of FET and diode switching circuitry are studied. Students will examine rectifier circuits, amplifier circuits and zener voltage regulation. Emphasis is on component testing and troubleshooting. | CTA | — |
| 175015 | Pre-Engineering (Middle Level) Students in the pre-engineering programs acquire knowledge and skills in problem solving, teamwork and innovation. Students explore STEM careers as they participate in a project-based learning process, designed to challenge and engage the natural curiosity and imagination of middle school students. Teams design and test their ideas using modeling, automation, robotics, mechanical and computer control systems, while exploring energy and the environment. | CTA | — |

Table 25. Career Field 08: Government and Public Administration Codes (360230)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 360230 | Government and Public Administration Students will focus on those careers that are inherent to government, as well as other career fields that are utilized in a government and public administration context. | CTA | — |

Table 26. Career Field 09: Health Science Codes (07xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 072001 | Health Science and Technology This first course in the career field provides students an overview of the opportunities available in the healthcare industry. Students will learn fundamental skills in effective and safe patient care that can be applied across a person’s lifespan. They will also be introduced to exercise science and sports medicine, the field of biomedical research and the importance of managing health information. | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 070005 | <p>Health Science Utilizing business and industry technical standards and a math, science, ELA, technology, and business process framework combined with specialized competencies develops technical literacy in the Health Science Career Field leading to pathways in Clinical Healthcare Services, Health Information Management, Health Support Services and Bioscience Research & Development and specialization areas (e.g. physical therapy, dental assisting, medical assisting, nursing, radiology, surgical technology, etc.) with post-secondary articulation.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070101 | <p>Dental Assistant Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, instruction includes concepts, subject matter and laboratory experience to assist the dentist in the dental operatory, clerical functions, and selected dental laboratory work.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070103 | <p>Dental Laboratory Technology Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces subject matter and experiences in producing restorative appliances authorized by a dentist.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070203 | <p>Medical Laboratory Technology Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts, subject matter and experiences to perform diagnostic analytic laboratory tests including phlebotomy techniques.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 070204 | <p>Phlebotomy Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces subject matter and experiences to lead to a recognized, portable credential as a certified phlebotomist.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070302 | <p>Practical Nursing Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, instruction includes subject matter and supervised clinical experiences to provide direct nursing care under the supervision of a registered nurse, licensed physician, dentist, or chiropractor.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070303 | <p>Nurse Assisting Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts, subject matter and clinical experiences in the care of individuals under the supervision of a nurse.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070305 | <p>Surgical Technology Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts, subject matter and experiences as a general assistant on the surgical team in the operating suite.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070307 | <p>Home Health Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts, subject matter and experiences to assist elderly, convalescent, or handicapped in their homes for daily living needs.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 070410 | <p>Exercise Science/Sports & Recreation Healthcare Utilizing business and industry technical standards and math, science, ELA, and technology framework, in the study of organ systems, study of movement & associated functional response and adaptations, understand scientific basis underlying exercise-induced physiological responses in athletic training, biomechanics, exercise physiology and nutrition for the prevention, diagnosis and treatment of injuries.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070603 | <p>Optometric Occupations Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, instruction includes concepts, subject matter and experience to prepare, assemble, and/or fit corrective lenses prescribed by a physician, optometrist or optician.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070904 | <p>Medical Assistant Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, instruction includes concepts, subject matter and experience to perform functions and procedures concerned with the diagnosis and treatment of patients under the supervision of a physician.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070906 | <p>Community Health Aide Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, instruction includes concepts, subject matter and experience to serve as a liaison between professional health workers and the recipients of health services.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070912 | <p>Pharmacy Technician Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, instruction includes concepts, subject matter and experiences to work in a pharmacy under the supervision of a pharmacist.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 070913 | <p>Health Unit Coordinator Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts, subject matter and experiences to manage components of non patient care activities in health care facilities.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 071100 | <p>Clinical Health Care Services Combined with specialized competencies and utilizing business and industry technical standards with a math, science, ELA, social studies and technology framework involved in changing the health status of a patient/client over time through performance of tests or evaluations to identify the presence or absence of illness or injury that creates a picture of the health status of an individual at a single point of time.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 070994 | <p>Patient Care Technician Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts, subject matter and experiences to perform clinical skills such as blood collection, EKGs, catheterization, recording vital signs and patient treatments, and other tasks related to patient care in a variety of healthcare environments under the direct supervision of a registered nurse or other medical professionals.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 074820 | <p>Diagnostic Pathway A clustered program utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, instruction includes concepts, subject matter and experiences in health careers that focus on diagnostic procedures to determine status of body functions/systems, cause and nature of diseases and disorders.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 074830 | <p>Therapeutic Pathway A clustered program utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, instruction includes concepts, subject matter and experiences in health careers that focus on care and treatment of individuals for the promotion and maintenance of wellness; prevention and treatment of physical, mental and emotional disorders.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 074840 | <p>Health Support Pathway Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts, subject matter and experiences for health support services careers, including operation, resource management, esthetics and aseptic procedures of the physical plant to ensure a healthy and well equipped environment in healthcare.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 074850 | <p>Biotechnology Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts and subject matter in classroom and laboratory experiences in the bioprocesses of organisms, cells or their components to create products or solve problems. Program concentrates on biomedical, environmental, pharmaceutical, bioinformatics and bioethics.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 074890 | <p>Health Information Management Services A clustered program utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts, subject matter and experiences for health careers that focus on compilation, maintenance and retrieval of records, reports and statistical data on health services.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 072000 | <p>Exercise and Athletic Training In this, first course students will apply procedures and techniques used in athletic training and in the care and rehabilitation of athletic injuries and therapeutic exercise. Topics include injury prevention, conditioning, and wound care techniques of the musculoskeletal system. Students will learn techniques in the analysis of mechanical factors related to human movement. In addition, current trends, technology, legal considerations, and the role of exercise science in relationship to other health fields will be emphasized.</p> | CTA | — |
| 072005 | <p>Bio-Statistics in Exercise Science and Sports Medicine Students will use fundamental qualitative analysis to study the human body's responses to exercise. Topics include respiratory response to exercise, metabolism and energy production, body composition, healing rate of tissues, and cardiovascular conditioning. Students will use therapeutic exercise and the application of modalities to restore or facilitate normal function or development. Developing and implementing exercise test protocols, and emergency procedures will be emphasized.</p> | CTA | — |
| 072010 | <p>Exercise Physiology and Biochemistry Students will learn to critically evaluate acute and chronic conditions associated to the human body's responses to exercise. Students will pre-screen individuals to identify the benefits and risks associated with physical activity. Students will coordinate exercise tests in order to measure body compositions, cardiorespiratory fitness, muscular strength/endurance, and flexibility. Emphasis is placed on developing conditioning programs that address pre-assessment needs, enhance mobility and build muscle strength.</p> | CTA | — |
| 072015 | <p>Nutrition and Wellness Students will increase their knowledge of comprehensive health and wellness. Students will be able to identify the components of fitness and communicate the relationship between physical fitness, physical performance, injury prevention, and nutritional intake. Students will evaluate an individual's state of nutrition based upon the impact of personal choices and social, scientific, psychological and environmental influences. Further, students will calculate an individual's kilocalorie burn rate and recommend an ideal diet and physical fitness plan.</p> | CTA | — |
| 072020 | <p>Fitness Evaluation and Assessment Students will complete comprehensive fitness evaluations and develop individualized training programs. Students will administer lab and field tests of cardiovascular endurance, body composition, joint flexibility and muscular strength, power, and endurance. Emphasis is placed on assessing body composition, neuromuscular flexibility, agility, balance, coordination, and proprioception. Additionally, students will identify components of physical fitness and communicate how physical activity impact health and wellness.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 072025 | <p>Athletic Injuries and Prevention Students will identify signs and symptoms of injury and apply emergency procedures and techniques used in the immediate care of athletic-related trauma. Students will learn clinical and field evaluative processes, injury prevention techniques, conditioning techniques, treatment, taping, bracing, and rehabilitation of musculoskeletal injuries and conditions. Students will design and implement conditioning programs, including nutritional considerations and ergogenic aids. Emphasis is placed on the synthesis of information gathered through injury history, observation, and manual muscle testing.</p> | CTA | — |
| 072030 | <p>Sports Exercise Psychology Students apply practical and theoretical information as it relates to psychology of sport. Students analyze the reciprocal relations among physical activity, exercise behavior, and biochemical and physiological adaptation. Topics include theories of behavior change, exercise psychology interventions, and the relationship between exercise and mental health. Further, students will identify psychosocial determinants and effects associated with adopting and maintaining an exercise program and develop strategies for promoting optimal performance in athletes.</p> | CTA | — |
| 072035 | <p>Principles of Allied Health In this, first course students will apply knowledge and clinical skills necessary to assess, plan, provide, and evaluate care to patients in varied healthcare settings. Students will apply first aid principles and techniques needed for response to choking, cardiopulmonary resuscitation, and other life-threatening emergencies. Emphasis will be placed on regulatory compliance, patient safety, pathophysiology, and medical interventions. Additionally, this course introduces psychomotor skills needed to assist individuals in meeting basic human needs.</p> | CTA | — |
| 072040 | <p>Human Anatomy and Physiology In this course, students will demonstrate knowledge of body systems with emphasis on the interrelationships between structure and physical function. Students will analyze and evaluate how the body systems respond to physical activity, disease, and aging. Students will use data acquisition software to monitor abnormal physiology and body functions (e.g., muscle movement, reflex, respiratory, and voluntary actions). Further, students will analyze descriptive results of abnormal physiology and evaluate clinical consequences.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 072045 | <p>Human Pathophysiology In this course, students will identify the causes, processes, and changes in body organs and tissues that occur with human illness. Topics include identification of clinical characteristics and effects of diseases, mechanisms causing alterations in cellular activity, maintenance of cellular tissue oxygenation, fluid and electrolyte balance, neuroendocrine control of the body, and diagnostic methodology. Students will interpret and use clinical data and patient health history to assemble a comprehensive health assessment.</p> | CTA | — |
| 072050 | <p>Patient Centered Care Students will apply psychomotor nursing skills needed to assist individuals in meeting basic human needs. Students will implement interventions following a nursing assistant plan of care. Students will collect patient’s vital signs including temperature, pulse rate, respiration rate, and blood pressure. Students will perform phlebotomy procedures with emphasis on infection prevention, universal precautions, proper patient identification, specimen acquisition, handling, and processing. Additionally, students will observe patients’ physical, mental, and emotional conditions and document any change.</p> | CTA | — |
| 072055 | <p>Patient Centered Care and Diagnostics In this course, students establish and implement treatment plans while providing primary nursing care. Topics include pharmacology, phlebotomy, mental health nursing and acute care nursing. Students use diagnostic techniques to develop patient health assessments. Emphasis is placed on the synthesis of information gathered through health history, observation, and the detection of deviations and variations from normal physical characteristics. In addition, students learn the legal and ethical principles needed to function within the scope of practice.</p> | CTA | — |
| 072060 | <p>Lifespan Development and Medical Intervention Students gain necessary skills and knowledge to meet the needs of individuals from infancy through the human life cycle in a safe, legal, and ethical manner using the nursing process. Topics include physical, psychological, and cultural variations associated with maturing and aging. Emphasis will be placed on regulatory compliance, patient assessment, patient safety, and medical interventions. Additionally, students use psychomotor nursing skills to assist in day-to-day patient care activities.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 072065 | <p>Mental Health Students learn contemporary mental health theories related to psychiatric disorders and mental diseases. Students will differentiate between stress, anxiety, and crisis, and identify methods to maintain mental health, including problem-solving techniques, treatment and intervention strategies. Students will assess, plan, implement and evaluate the mental health needs of the client. Additionally, students will use therapeutic communication techniques and be able to discuss documentation guidelines and the plan of care with the patient.</p> | CTA | — |
| 072070 | <p>Surgical Support Student demonstrates knowledge and skill necessary to carry out delegated tasks associated with the safe and efficient operating room support functions and related procedures. Topics include surgical technology theory, patient care concepts, and sterilization techniques. Student will assist with the passing of instruments and the positioning of patients. Additionally, students will prepare patients for transport to and from surgery, maintain equipment and supplies, and prepare the operating room for surgery.</p> | CTA | — |
| 072075 | <p>Dental Technology Students will demonstrate knowledge and skills associated with the practice of dentistry. Topics include principles of dental procedures and comprehensive dental care; infection control in dentistry; and dental specialties including radiology and laboratory procedures. Students will perform chair-side assisting techniques including instrument sterilization, fluoride applications, dietary analysis, and assisting physician. Emphasis is given to terminology, instruments and equipment, and patient communication. Additionally, students maintain accounts and inventory, records and appointments.</p> | CTA | — |
| 072076 | <p>Dental Radiography Students will perform procedures to expose, process, and interpret dental radiographs. Students will apply knowledge of radiation physics, infection prevention and quality control standards that are appropriate to the clinical setting. Students will apply effective communication skills for interacting with diverse patient populations and proper procedure documentation according to business and industry standards.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 072080 | <p>Oral Diagnosis and Treatment Planning Students gain knowledge of head and neck anatomy with a focus on the oral cavity and teeth. They will study bone structure, cosmetic dentistry, and tooth identification and numbering systems. Students gain knowledge of chemical and physical properties of dental materials, their indications for use, and proper manipulation of the materials. Students perform radiographs, impressions, pouring, trimming, and wax bites methods and techniques. Additionally, students educate the patient on dental procedures and comprehensive dental care.</p> | CTA | — |
| 072085 | <p>Pharmacology Students will apply the principles of pharmacology in order to read, interpret and dispense prescriptions. They will learn how medications are classified and administered. Students will study the impact of drugs on different systems of the body, interaction of drugs, side effects and effectiveness in relation to dosages.</p> | CTA | — |
| 072090 | <p>Respiratory Technology Students will be able to collaborate with the respiratory therapist to administer care to patients with heart and lung disorders requiring humidity, medial gas and aerosol therapies. Students will perform diagnostic tests, clean and maintain equipment. Students observe patient responses and progress. Students apply concepts of infection control, basic therapeutic and diagnostic modalities.</p> | CTA | — |
| 072095 | <p>Opticianry and Vision Care In this course, students apply optometric examination techniques and applications. Topics include visual acuity, stereopsis, color vision, and Amlser grid. Additionally, students perform patient assessments; demonstrate medical interviewing techniques, collect health history content and prepare medical record documentations. Students will assist patients in frame selection and fittings and educate patient in comprehensive vision care.</p> | CTA | — |
| 072100 | <p>Clinical Laboratory Techniques Students will apply practical application of a wide range of clinical duties. Topics covered will include hematology, urinalysis, hemostatic processes, body chemistry, microbiology, and blood typing. Students will perform laboratory exercises illustrating principles of the cell and human physiology. Emphasis is given to safe handling, collection procedures, and preparation of specimens. Additionally, students will correlate and document clinical findings and maintain quality management in a clinical laboratory.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 072105 | <p>Health Science Capstone The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in Health Sciences program in a more comprehensive and authentic way. Capstones often include project/problem based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship/internship.</p> | CTA | — |
| 072110 | <p>Principles and Practices of Biomedical Technologies In this first course, students will use concepts, procedures, and equipment common to a professional medical laboratory. Students conduct problem-based studies, apply scientific methodology and use descriptive statistics to communicate and support predictions and conclusions. Students will follow procedures and protocols for handling, transporting, storing, and preparing specimens. Further, students will sample, monitor, and record environmental conditions of the facilities. Emphasis is given to demonstrating professional and ethical behavior associated with the medical field.</p> | CTA | — |
| 072115 | <p>Biomedical Engineering Students learn the use of cell culture techniques for bioscience research and commercial applications. Topics include cultivation of cell lines, bench-top fermenter management, detection of contamination, and an introduction to bioassays. Students will use microbiological techniques to manipulate, evaluate, and study cell growth. Focus will be on media formulation, preparation, autoclaving, and clean up procedures for the vessel and accessories. Further, students will implement quality control methods, maintain records and ensure compliance with regulatory requirements.</p> | CTA | — |
| 072120 | <p>Biochemistry of Health This course introduces biochemical methods, analysis, and techniques used in the bioscience research and development industry. Students will learn the chemistry of organic macromolecules, intermediary metabolism and the relationships to the human body. Topics also include structures, properties, functions, reactivity, and synthesis of simple organic molecules. Students will monitor, record, and maintain integrity of equipment and instrumentations; environmental conditions of the facility; and inventory.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 072125 | <p>Biotechnology for Health and Disease This course explores techniques for extracting, separating, and assaying carbohydrates, lipids, and proteins from biological samples. Topics include mechanisms for regulating metabolism and gene expression. Students will describe the morphology and process of reproduction of microorganisms important in clinical disease and biotechnology applications. Students will perform assays as a diagnostic tool to detect the presence of a pathogen. Further, students will perform separation techniques including chemical separations, centrifugation, distillation, and filtration and interpret results.</p> | CTA | — |
| 072130 | <p>Genetics of Disease Students gain knowledge and skill in genetic principles and molecular methods of analysis. Topics include enzymology, protein purification, and gene expression and organization. Students perform bio-molecular applications using knowledge of nucleic acid structure and function, DNA replication, transcription, translation, chromosome structure and remodeling and regulation of gene expression in prokaryotes and eukaryotes. Additionally, students will use electrophoresis to separate nucleic acids and proteins to determine molecular weight.</p> | CTA | — |
| 072135 | <p>Health Information Technology Students will design, develop, and assess information systems and processes used in the management and maintenance of health record systems. Topics include information technology, health care systems, health data collection and project management. Students will design and maintain medical databases, computer networks, and internet or multimedia applications. Emphasis is placed on data management, quality and security. Additionally, students evaluate the impact of information technology on the clinical process, clinical outcome, organizations, and resources.</p> | CTA | — |
| 072140 | <p>Health Information Management This course introduces Health Information Management (HIM) and its role in healthcare delivery systems. Topics include standards, regulations and initiatives; payment and reimbursement systems, healthcare providers and disciplines; and electronic health records (EHRs). Emphasis will be placed on procedures for completion, maintenance, and preservation of health information. Students will gain knowledge and skills in Current Procedural Terminology (CPT) coding system used to assign valid procedure and service codes, including general content, and coding guidelines.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 072145 | <p>Billing and Coding Students develop, evaluate, and implement billing and record systems for health information data using various classification systems to code and categorize patient information. Topics include health record content and structure, diagnostic coding, legal and compliance requirements. Students will record transactions, process payments, and manage patient accounts. Further, students gain knowledge using coded data to produce and submit claims to insurance companies; reviewing and appealing unpaid and denied claims; and for handling collections on unpaid accounts.</p> | CTA | — |
| 072150 | <p>Medical Terminology This course focuses on the applications of the rules for constructing and defining medical terms with an emphasis on building a working medical vocabulary. Topics include using the appropriate abbreviations and symbols for anatomical, physiological and pathological classifications and the associated medical specialties and procedures. Students will decipher medical terms by identifying and using word elements with an emphasis on derivation, meaning, and pronunciation. Further, students will interpret and translate medical records and documents.</p> | CTA | — |
| 072155 | <p>Medical and Dental Office Technology Students will apply fundamental principles of communication, leadership, technology and management as it applies to the medical office setting. Students will demonstrate documentation and record keeping procedures set forth by national accrediting organizations.</p> | CTA | — |
| 072160 | <p>Data and Use This foundational course focuses on the use of data and databases within the health field. Students learn what are data, how it is used and sources of data in the medical and health informatics field. They learn how to make sense of data and how data can be applied to our lives. Students will have the opportunity to interact with professionals in the health informatics field.</p> | CTA | — |
| 072165 | <p>Transforming Data into Information Students learn how to use data to address both patient and industry needs in the health-care field. Students use software to collect and analyze data, develop a health-care registry, create a mobile app mockup and develop forms and systems to solve health-care problems. They will learn how technology can be used to create better information to inform decision making, create information from data, improve public and individual health and to protect patient privacy.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 072170 | <p>Transforming Information into Knowledge This advanced course allows students to make improvements in the health-care field by designing solutions using the information, knowledge and technology tools available to health informatics professionals. Students are engaged in the following activities: building a system of sharing information among health-care facilities; using social media tools to reduce diseases in foreign countries; exploring voice recognition software; using a motion-based video gaming console for rehabilitation; and exploring clinical decision rules for improving patient care.</p> | CTA | — |
| 072175 | <p>Problems and Solutions In this advanced course, students study and design solutions to problems facing health-care systems. Students learn how can the health-care system work more efficiently and economically, how health-care issues in rural locations can be addressed and how various community organizations work together to improve the health of the community? Students will have the opportunity to interact with professionals in the health informatics fields.</p> | CTA | — |

Table 27. Career Field 10: Hospitality & Tourism Codes (33xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 330005 | <p>Culinary and Food Service Operations Educational programs in Culinary and Food Service Operations prepare learners for careers in the art and science of food preparation and presentation.</p> | CTA | — |
| 330010 | <p>Lodging Preparation for careers in the management, marketing and operations of lodging facilities.</p> | CTA, BUS | — |
| 330015 | <p>Introduction to Hospitality and Tourism Preparation for careers requiring broad, cross-functional knowledge of marketing, management and operations of restaurants, and other food services, lodging, destination marketing organizations, attractions, meetings and events, transportation and travel-related services.</p> | CTA, BUS | — |
| 330020 | <p>Travel and Tourism Educational programs in travel and tourism prepare learners for careers in management, marketing and operation of destination marketing organizations, attractions, meetings and events, transportation, and travel related services.</p> | CTA, BUS | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 330130 | <p><u>Hospitality and Tourism Capstone</u> <u>The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in the program in a more comprehensive and authentic way. Capstones often include project/problem based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship.</u></p> | CTA | = |
| 330000 | <p><u>Hospitality Fundamentals</u> <u>This first course in the career field will introduce students to culinary arts, foodservice operations, lodging, travel and tourism. Students will obtain knowledge of customer service principles and examine the impact of cultural, historical, social and technological developments on key segments of the industry. They will also apply safety and sanitation techniques to prevent and control injuries, illnesses and diseases in the workplace. Business law, employability skills, leadership and communications will be addressed.</u></p> | CTA | = |
| 330100 | <p><u>Fundamentals of Food Production</u> <u>Students will prepare food products and beverages according to standardized recipes. They will apply plating and presentation principles to deliver attractive menu items, establish food specifications and prep lists, and develop ingredient and portion control guides. Safety and sanitation, standard knife skills, and culinary math will be emphasized. Employability skills, leadership and communications will also be incorporated.</u></p> | CTA | = |
| 330125 | <p><u>Baking and Pastry Arts</u> <u>Students will apply food-science principles to prepare and bake breads, desserts and pastries. They will also use specialized decorating and presentation techniques to decorate cakes, cookies, pastries, and other baked goods. Students will select quality ingredients, determine food costs, and research and develop marketable new recipes and food concepts. Personal safety, food safety, and equipment safety will be emphasized.</u></p> | CTA | = |
| 330105 | <p><u>Contemporary Cuisine</u> <u>Students will prepare regional and international food products and beverages according to standardized recipes. They will research and develop marketable new recipes, plan and design menus, and calculate food requirements and costs. Selection, use, maintenance and storage of commercial equipment, machines, tools and tableware will be emphasized. Food science, inventory management, food presentation, and safety and sanitation will also be addressed.</u></p> | CTA | = |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 330110 | <p><u>Dining Room Service and Operations</u> <u>Students will apply strategies and techniques to identify and meet dining guest needs. They will provide table and beverage service; maintain eating areas, meeting spaces and serving stations; manage online reservations and orders; and monitor table turns, wait lines and table assignments. Nutritional analysis, types of table service, safety and sanitation, cultural intelligence, employability skills and communications will also be addressed.</u></p> | CTA | == |
| 330120 | <p><u>Restaurant Management</u> <u>Students will apply management principles to plan, organize and direct restaurant staff toward goal achievement. They will hire, train, and supervise employees; establish processes to facilitate restaurant operations; and plan and design menus. Students will also forecast and schedule food production, establish food specifications, select vendors, calculate costs, and purchase food and non-food products. Other topics include food science, nutritional analysis, business law and ethics, economics and marketing.</u></p> | CTA | == |
| 330025 | <p><u>Catering and Banquet Service Operations</u> <u>Students will design and manage catering and banquet operations. They will recommend types of food functions and food-and-beverage services to clients, create menus for special occasions and events, and determine financial requirements. Students will hire, train, and supervise staff; manage event logistics, operations and service providers; and oversee dining room operations. Customer service; food, equipment and site safety; and high-volume food production will also be addressed.</u></p> | CTA | == |
| 330021 | <p><u>Event and Food Planning</u> <u>Students will design and organize meetings and events. They will analyze risks, identify needs and develop strategies for achieving event goals. Students will also set up event facilities, manage event activities and evaluate event success. Other topics addressed in the course include menu development, customer service, people management, simple food production, sales and marketing.</u></p> | CTA | == |
| 330040 | <p><u>Travel and Adventure Planning</u> <u>Students will apply knowledge of travel destinations, tourist attractions and events of interest to plan and coordinate travel and tourism activities for customers. They will analyze cultural, historical and environmental factors impacting travel and tourism; examine challenges, opportunities and trends associated with the industry; and develop strategies for promoting travel and tourism. Social media marketing, brand positioning, marketing research and employability skills will also be addressed.</u></p> | CTA | == |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 330030 | <u>Front Office Management and Operations</u> <u>Students will develop knowledge and skills needed in the lodging industry. Students will perform front-office procedures such as reserving rooms, checking guests in and out, and orienting guests to the lodging property. They will also maintain guest rooms and public areas, develop a housekeeping plan, and establish a schedule for facilities maintenance. In addition, site safety and sanitation, customer service, people management, employability skills, leadership and communications will be emphasized.</u> | CTA | == |
| 330035 | <u>Hospitality Management</u> <u>Students will plan, organize, and monitor day-to-day lodging operations. They will use technology to maintain guest room status and accounts, manage lodging property finances, conduct marketing research, and communicate with current and prospective guests. Property sales, property management, people management and strategic planning will also be addressed.</u> | CTA | == |

Table 28. Career Field 11: Human Services Codes (17xxxx, 99xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 172600 | Human Services Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts in Human Services leading to pathways in Family & Community Services or Personal Care Services. | CTA | — |
| 172605 | Family and Community Services Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, introduces concepts in the Family and Community Services Pathway such as unemployment, substance abuse, aging and physical, emotional and cognitive disabilities, domestic violence, physical/emotional abuse, poverty and community resources. | CTA | — |
| 172602 | Cosmetology Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, instruction includes variety of beauty treatments including care and beautification of the hair, complexion, hands and feet. | CTA | — |
| 172601 | Barbering Utilizing business and industry technical standards, math, science, ELA, social studies and technology with a business process framework, instruction and clinical experiences includes haircutting and styling, shaving and massaging with emphasis on hygiene, skin and scalp diseases, and sterilization of instruments and utensils. | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 174115 | <p>Microbiology and Infection Control Students will learn basic bacteriology, infection control, and salon safety practices. Students will be able to recognize infectious disorders and contagious diseases learn the dispensary requirements, product storage, and requirements of the laws and rules, which regulate the cosmetology industry in Ohio.</p> | CTA | — |
| 174120 | <p>Trichology Students will learn the anatomy of the head and scalp, structure of the hair and various techniques and procedures for analyzing hair, scalp disorders and diseases. Students will be able to determine hair porosity, elasticity, density, texture and growth patterns as well as conduct chemical tests for treated hair and ability to recommend corrective scalp treatment.</p> | CTA | — |
| 174125 | <p>Fundamentals of Hair Cutting and Styling Students will learn basic shampooing, conditioning and haircutting including trimming, wet styling and thermal styling techniques when working with natural and synthetic hair. Students will also learn infection control and safety along with the science of ergonomics.</p> | CTA | — |
| 174130 | <p>Advanced of Hair Cutting and Styling Students will learn advanced cutting and formal styling using specialized equipment and techniques. This course offers enhanced training in current trends and razor techniques.</p> | CTA | — |
| 174135 | <p>Fundamentals of Chemical Services Students will apply basic skills, knowledge, and safety practices when giving permanent/chemical waves, curl re-forming, chemical relaxers and hair color techniques to include tinting, highlighting, bleaching, and foiling.</p> | CTA | — |
| 174140 | <p>Advanced Chemical Services Students will learn advanced chemical services using specialized products and techniques. Students will do advanced coloring, dimensional coloring, corrective techniques, texturizing, and advanced chemical wave wrapping techniques.</p> | CTA | — |
| 174145 | <p>Hand & Foot Treatment Fundamentals and Enhancements Students will learn the knowledge and skills to perform both manicures and pedicures. They will learn how to maintain personal hygiene and infection control. Students will give plain/oil manicures, pedicures, and hand/arm & foot/leg massages. Enhanced hand and foot treatments using specialized products and techniques will be performed.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 174150 | <p>Skin Care Fundamentals and Enhancements Students will apply the principles of anatomy, skin analysis, infection control and safety to safe hair removal, skincare treatments, and facial massage. Students will use electrical and manipulative facial treatments including masks, packs, and make-up techniques. Students will also learn advanced skin care treatments, targeted massage, and enhancement applications using specialized products and techniques.</p> | CTA | — |
| 175155 | <p>Salon Operations and Communications Students will learn the fundamentals of managing a cosmetology salon. Students will learn about employment and customer liability, insurance, leases, record keeping, communication, and sales.</p> | CTA | — |
| 174010 | <p>Human Services Capstone The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in Human Resources program in a more comprehensive and authentic way. Capstones often include project/problem based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship/internship.</p> | CTA | — |
| 990371 | <p>Vocational Job Training Coordinating A specialized community based job training program for students with disabilities who are unable to successfully participate in regular career-technical education programs even when adjusted programs and supplemental aides or specialized supportive personnel are available. The program utilizes a job training coordinator to match specific jobs in the community to the individual student's skills. Job coach services must be made available to assist the students to gain the skills necessary for the job. Students must be at least sixteen years old and this program must be identified on the student's individualized educational program (IEP).</p> | CTA | — |

Table 29. Career Field 12: Information Technology Codes (14xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 140200 | <p>Information Technology I (Career Technical) This course is designed to serve as the first course in a Career-Technical program in information technology. Based on information technology basics (9th and 10th grade competencies) and other fundamental skills drawn from it WORKS.OHIO, the Ohio Career Field Technical Content Standards for Information Technology, this course must lead to a specialized program in Information Support and Services, Network Systems, Programming and Software Development or Interactive Media.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | <p>CTA, BUS, TEC</p> | <p>—</p> |
| 140210 | <p>Information Support and Services (Career Technical) An instructional program that provides training for careers dealing in information technology deployment and information systems management and support.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | <p>CTA, BUS, TEC</p> | <p>—</p> |
| 140220 | <p>Network Systems (Career Technical) An instructional program that provides training for careers in communication network systems planning, administration, and management.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | <p>CTA, BUS, TEC</p> | <p>—</p> |
| 140230 | <p>Programming and Software Development (Career Technical) An instructional program that provides training for careers dealing with hardware and software programming to design, develop, and implement computer systems and software.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | <p>CTA, BUS, TEC</p> | <p>—</p> |
| 140240 | <p>Interactive Media (Career Technical) An instructional program that provides training in the area of interactive multi-media development that includes creating, designing, and producing interactive multimedia products and services and digitally-generated or computer-enhanced media.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | <p>CTA, BUS, TEC</p> | <p>—</p> |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 145120 | <p>3-D Techniques Students will use current industry standard commercial and open source programming software to create 3-D visual elements in a web or standalone environment. Students will learn aspects of computer visual production, thought, and application; to map out, design, and test three dimensional elements.</p> | CTA | — |
| 145115 | <p>Animation Students will use animation and storyboarding techniques to plan the production of an animation project. Students will design from script and storyboard actions in the pre-production planning process. Students will use commercial and open source digital animation software to create finished animations, cartoons, and other short movies. They will accomplish this using animated text, character movements, voice, background sound, sound effects, camera movements, and multiple scenes.</p> | CTA | — |
| 145015 | <p>Information Technology Capstone The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in Information Technology program in a more comprehensive and authentic way. Capstones often include project/problem based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship/internship.(75)</p> | CTA | — |
| 145020 | <p>Computer and Mobile Applications Students will learn to create applications for mobile devices using a variety of commercial and open source software. They will install these applications, modify them, and develop customer service skills to handle user issues. Knowledge and skills related to customer service in professional offices, small businesses, departments, work groups, and corporate information services will be addressed.</p> | CTA | — |
| 145025 | <p>Computer Hardware Students will learn to install, repair, and troubleshoot computer hardware systems. They will perform preventative maintenance practices and learn techniques for maintaining computer hardware security. Communication skills and professionalism in troubleshooting situations will be emphasized.</p> | CTA | — |
| 145030 | <p>Computer Software Students will apply knowledge and skills of commercial and open source operating systems in portable, stand alone, and networked devices. Students will install a variety of operating systems manually and using remote assistance. They will learn to configure, modify, and troubleshoot operating systems. Desktop virtualization, system security, and operating system history will be addressed.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 145100 | <p>Creating and Editing Digital Graphics Students will learn to design, develop, and produce interactive media projects, web sites, and social media contexts. Students will demonstrate methods of creating professional quality media using commercial and open source software.</p> | CTA | — |
| 145080 | <p>Database Administration Students will learn about user rights and responsibilities, concurrency security, reliability, backup and recovery to perform tasks involved in the administration and management of a database system. Students will design, extract and transform data ensuring data quality. Knowledge and skills relating to reporting systems, data warehouses, and data mining will be developed.</p> | CTA | — |
| 145085 | <p>Database Applications Development Students will use developer strategies to manipulate data, present database systems theory, and develop database applications. Students will learn to import and export data, manipulate table properties, make advanced queries, and run basic SQL forms and reports. Students will develop macros for automating database tasks and building menu-driven applications. Knowledge and skills of data modeling, diagraming, query writing, and design theory will be developed</p> | CTA | — |
| 145095 | <p>Design Techniques Students will learn techniques for transforming photographic images, through use of digital cameras, computers, and mobile devices. To accomplish this, they will learn software photo editing techniques including layering, color correction, masking, and special effects using current commercial and open source programs and applications.</p> | CTA | — |
| 145090 | <p>Game Design This course will prepare students to design and program games using commercial and open source programs and applications. Students will learn industry standard programming language constructs to write programs that integrate classes, class methods, and class instances. Students will learn input method handling, animation, collision detection, game physics and basic artificial intelligence.</p> | CTA | — |
| 145005 | <p>Information Technology This first course in the IT career field is designed to provide students with a working knowledge of computer concepts and essential skills necessary for work and communication in today's society. Students will learn safety, security, and ethical issues in computing and social networking. Students will also learn about input/output systems, computer hardware and operating systems, and office applications.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 145125 | <p>Interactive Application Development Students will learn skills to support and create interactive and engaging components for web and standalone interactive applications. Using commercial and open source programs and applications, students will master web interactivity with advanced techniques.</p> | CTA | — |
| 145105 | <p>Multimedia and Image Management Techniques Students will apply principles of image creation, management procedures, and multimedia techniques as they create, revise, optimize, and export graphics for video, print, and web publishing. The course will address issues related to web based publishing, social media, and security. Students will utilize current commercial and open source languages, programs, and applications.</p> | CTA | — |
| 145035 | <p>Networking Students will install, configure, and troubleshoot network hardware and peripherals. Students will learn networking by exploring the OSI model, network topologies, and cabling. Students will design simple networks, know how to select physical devices, and be able to configure the equipment. Knowledge and skills relating to the operation and usage of network protocols will be developed.</p> | CTA | — |
| 145045 | <p>Network Management Students will perform network administrator duties by installing and configuring network hardware, software, and peripherals. Abiding by IEEE standards and the Open Source Interconnection (OSI) model, students will create advanced networks, assign user rights, and develop knowledge and skills of network hierarchy. Students will demonstrate mastery of topologies, remote connectivity, wireless networking, TCP/IP, network security, and network troubleshooting.</p> | CTA | — |
| 145040 | <p>Network Operating Systems Students will perform desktop client administrator duties by providing support for users in various work environments including professional offices, small businesses, work groups, departments, and/or corporate information services (IS). Students will learn to install, configure, and update commercial and open source network operating systems.</p> | CTA | — |
| 145050 | <p>Network Security This course will address securing networks and operating systems. Students will learn to secure network communications, computer hardware, and network software. Topics include: network security theory, cryptography, security architecture, firewalls, VPNs, IP Security, and methods of protection.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 145065 | <p>Object Oriented Programming Students will learn to represent programming concepts as "objects" that have data fields and associated procedures known as methods. Students will implement classes such as support static, instance method, inheritance, polymorphism, exception handling, and object serialization. A variety of commercial and open source programs and applications will be used.</p> | CTA | — |
| 145060 | <p>Programming In this course students will learn the basics of building simple interactive applications. Students will learn the basic units of logic: sequence, selection, and loop. Students will apply algorithmic solutions to problem-domain scenarios. Students will gain experience in using commercial and open source languages, programs, and applications.</p> | CTA | — |
| 145055 | <p>Routing and Switching Student will learn the functions, characteristics, and operations of routers and switches. Students will learn about wireless network standards and components and the role that routers play in enabling communications across multiple networks. Students will troubleshoot the routing process. Students will examine the use of Virtual Local Area Networks (VLANs) to create logically separate networks.</p> | CTA | — |
| 145075 | <p>Systems Analysis and Design Students will learn the theory and practice of software testing and develop an understanding of the analysis and design phases of software development. Students will effectively use appropriate programming languages and software patterns to improve software development. A variety of commercial and open source programs, applications, and tools will be used.</p> | CTA | — |
| 145110 | <p>Video and Sound Students will create professional video and audio productions for distribution in traditional and new media channels. Students will plan, produce, edit, and launch media products. Students will develop scripts and storyboards, compose shots and operate cameras, capture sounds using microphone hardware, apply special effect techniques, and edit to achieve the final product. Students will be able to use animation and graphic design for video.</p> | CTA | — |
| 145070 | <p>Visual Programming Students will create event-driven programs using object oriented programming techniques for use in web based and standalone applications. Students will map out, design, and test computer applications, web applications, and mobile applications. Both commercial and open source programs and applications will be used.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 145010 | <p>Web Design Students will learn the dynamics of the Web environment while pursuing an in-depth study of both Hypertext Markup Language (HTML) and Cascading Style Sheets (CSS). Web based protocols such as FTP, TCP/IP, and HTTP will be addressed. Students will create a website with tag text elements, special characters, lines, graphics, hypertext links, and graphical tables.</p> | CTA | — |

Table 30. Career Field 13: Law & Public Safety Codes (17xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|-------------------|--|-----------------------------------|-----------------------------|
| 170346 | <p>Law and Public Safety Capstone The course provides opportunities for students to apply knowledge, attitudes and skills that were learned in Law and Public Safety in a more comprehensive and authentic way. Capstones often include project/problem based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship<u>internship</u>.</p> | CTA | — |
| 172801 | <p>Fire Fighter Training Utilizing business and industry, math, science and technology standards, provides concept of paid, full time firefighter. The training program must be chartered through the Ohio Department of Public Safety or have an agreement with a chartered fire fighter training program.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 172802 | <p>Criminal Justice Utilizing business and industry, math, science and technology standards, introduces concept of training provided by officially designated law enforcement agencies. The program must be certified by the Ohio Peace Officers Training Commission.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 172808 | <p>Private Security A one-year program utilizing business and industry, math, science and technology standards, introduces concept of physical and personal security, internal loss and facility access.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 172810 | <p>Career Paths for the Law Profession Utilizing business and industry, math, science and technology standards, introduces knowledge and skills to prepare students for entry level, technical and professional career options within the law and public administration professions.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 172811 | <p>Emergency Medical Technician—Secondary Utilizing business and industry, math, science and technology standards, instructs to the level of EMT Basic. This course must include the Ohio Department of Public Safety approved EMT Basic curriculum and be provided through an accredited ODPS provider. This course is a minimum of 450 hours with the ODPS curriculum limited to the senior level.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 172812 | <p>Public Safety—Core Utilizing business and industry, math, science and technology standards, introduces concept of knowledge and skills applicable to public safety careers, e.g., Firefighter, EMT Basic, and Criminal Justice. This course is to be taught only in conjunction with an approved senior level specialized public safety program.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 172815 | <p>Criminal Science Technology Utilizing business and industry standards as framework for application of clinical and criminal laboratory science, evidentiary testing & analysis, study of society's formal control system, investigative techniques, criminal law, criminal process, administration of Justice System, computer applications, record-keeping, and reconstruction techniques.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 170911 | <p>The American Criminal Justice System This first course in the Criminal Justice pathway traces the history, organization, and functions of local, state, and federal law enforcement. Students will study criminal behavior and apply constitutional and criminal law to crime and punishment. Students will learn law enforcement terminology, classifications and elements of crime, and how various court systems are used to judge and punish offenders.</p> | CTA | — |
| 170912 | <p>Security and Protective Services Private Security is an ever expanding industry that requires trained professionals that can detect, deter, and investigate crime. The course focuses on private security measures used to protect lives, property, and proprietary information. Students completing the Ohio Peace Officer Training Academy Private Security curriculum provided by an approved instructor will be eligible to sit for the OPOTA certification exam as a private security guard.</p> | CTA | — |
| 170913 | <p>Police Work and Practice in Public Safety In this course, students will learn the skills necessary to prevent, detect and react to crime. Students will learn self-defense and subject control techniques, methods to conduct patrols, surveillance, and traffic procedures. Students will understand the ethical and legal responsibilities of police officers on patrol. Additionally, students will learn the operations of police and emergency telecommunication systems.</p> | CTA | — |
| 170914 | <p>Investigations and Forensics in Criminal Investigations Forensic Science uses a structured and scientific approach to the investigation of crimes including assault, abuse and neglect, domestic violence, accidental death and homicide. Students will learn the psychology of criminal behavior and apply it to investigative procedures. Students will collect and analyze evidence through case studies and simulated crime scenes such as fingerprint analysis, ballistics, and blood spatter analysis.</p> | CTA | — |
| 170915 | <p>The Correctional System and Services The correctional officer plays a critical role in the criminal justice system. In this course students will learn institutional rehabilitation and community corrections strategies that prepare them for work in a correctional setting. The student will learn the role and responsibilities of a correctional officer including processing inmates, maintaining security in a correctional setting, and understanding inmate mental health needs.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 170916 | <p>Homeland Security: Protecting America’s Critical Infrastructure In this course students will learn techniques to secure and protect America’s people and infrastructure from natural and man-made disasters. Students will analyze a range of national security issues. Students will learn to develop and manage local emergency plans. Students will also learn to manage critical incidents through training in the National Incident Management System and the Incident Command System.</p> | CTA | — |
| 170342 | <p>Foundations of Firefighting and Emergency Medical Services In this first course in the pathway, Fire Fighting and Emergency Medical Services introduces students to the foundational concepts of firefighting safety and emergency medical services. Students will learn and practice skills outlined in the Ohio Department of Public Safety Fire Protection and Ohio Emergency Medical Services rules and regulations in preparation for Firefighter I&II curriculum and EMT licensure.</p> | CTA | — |
| 170343 | <p>Firefighter I The Firefighter I course prepares students for a career in the fire service. Students learn the history of firefighting, fire science and techniques to fight fires and conduct rescues. Students will train with tools, appliances and fire equipment in the classroom and in live fire exercises. Students that successfully complete this course at a chartered institution will be eligible to take the Ohio Firefighter I certification test.</p> | CTA | — |
| 170344 | <p>Firefighter II The Firefighter II course builds on the knowledge and skills learned in Firefighter I. In this course students will apply knowledge and skills to advanced training in fire suppression, rescue and hazardous materials operations. Students who have completed Firefighter I and successfully complete this course at a chartered institution will be eligible to take the Ohio Firefighter II certification test.</p> | CTA | — |
| 170345 | <p>Emergency Medical Technician Emergency Medical Technicians are first responders who provide basic care to individuals needing medical attention. Students will learn to assess an emergency situation and provide pre-hospital care to stabilize a patient. They will learn the procedures and protocols for patient transport and the transition to advanced medical care. Students who successfully complete this course at chartered institution will be eligible to take the National Registry Exam for Ohio EMT certification.</p> | CTA | — |

Table 31. Career Field 14: Manufacturing Technologies Codes (17xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 170370 | <p>Automation & Robotics Utilizing business and industry, math, English, science and technology standards, introduces concepts of Automation and Robotics technologies: Computer Numerical Control (CNC), Data Acquisition and Analysis, Electrical/Electronic controls, Fluid Power, Robotics and Programmable Logic Controllers (PLC).</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 170006 | <p>Manufacturing Technologies Combined with specialization competencies utilizing business and industry technical standards and a math, science, ELA, technology, and business process framework, develops technical literacy in manufacturing systems, leading to pathways in manufacturing operations, product design and material production and post-secondary articulation.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171012 | <p>Integrated Systems Technology Utilizing business and industry, math, science and technology standards, introduces concept of the maintenance of machinery and mechanical equipment of an industrial plant or factory.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 171300 | <p>Manufacturing Design and Development Utilizing business and industry, math, English, science and technology standards, introduces concepts of Design and Development Technologies: Design Process, Teamwork and Project Management, Marketing, Technical Applications, Modeling, Materials and Quality Assurance.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 171503 | <p>Electronics Utilizing business and industry, math, science, and technology standards, introduces concepts of electronic theory and practice.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 172302 | <p>Precision Machining Utilizing business and industry, math, science, and technology standards, introduces concepts related to set up and operation; and the control of various metal working equipment.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 172306 | <p>Welding and Cutting Utilizing business and industry, math, science, and technology standards, introduces concepts of metal welding, brazing and flame cutting.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 176000 | <p>Gas Metal Arc Welding Students will safely use the Gas Metal Arc Welding process (GMAW) to join various types of metal. They will cut metals using oxy-fuel processes and perform multiple types of welds in all positions up to overhead. They will select the appropriate type of electrode and shielding gas and adjust welding equipment based on the physical characteristics and properties of the metal. Students will apply their understanding of quality control factors to evaluate weld quality.</p> | CTA | — |
| 176001 | <p>Shielded Metal Arc Welding Students will be able to safely use the Shielded Metal Arc Welding process (SMAW) to join various types of metal. They will perform multiple types of welds in all positions up to overhead. They will select the appropriate type of electrode and adjust welding equipment based on the physical characteristics and properties of the metal. Students will apply their understanding of quality control factors to evaluate the quality of welds.</p> | CTA | — |
| 176002 | <p>Flux Core Arc Welding Students will be able to safely use the Flux Core Arc Welding process (SMAW) to join various types of metal. They will perform multiple types of welds in all positions up to overhead. They will select the appropriate type of cored electrode and adjust welding equipment based on the physical characteristics and properties of the metal. Students will apply their understanding of quality control factors to evaluate the quality of welds.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 176003 | <p>Gas Tungsten Arc Welding Students will safely use the Gas Tungsten Arc Welding process (GMAW) to join various types of metal. They will perform multiple types of welds in all positions up to overhead. They will select the appropriate type of electrode, filler metal and shielding gas and be able to adjust welding equipment based on the physical characteristics and properties of the metal. Students will apply their understanding of quality control factors to evaluate weld quality.</p> | CTA | — |
| 176004 | <p>Machine Tools This course introduces students to all aspects of machining applications in manufacturing. They will be able to perform routine calculations, interpret basic drawings, begin the process of performing accurate measurements and be able to plan simple machining processes. Students will learn the fundamental principles and practices of cutting, drilling and grinding using modern machine tools, hand tools and precision measuring instruments.</p> | CTA | — |
| 176005 | <p>Machining with Industrial Lathes This course directs the student in the safe use of different types of manual industrial lathes. Students will use these machine tools to shape, pattern, bore, thread and polish metal and other materials. Students will apply their knowledge of product characteristics, perform necessary calculations, use precision measuring instruments and make all adjustments needed to fabricate products to print dimensions. Students will be able to identify operational problems and provide routine care and maintenance to the lathe.</p> | CTA | — |
| 176006 | <p>Machining with Industrial Milling Machines In this course students are directed in the safe use of manual milling machines. Students apply their knowledge of product characteristics, perform necessary calculations, use precision measuring instruments and layout equipment to mill products to print dimensions. Students will use these machine tools to shape, cut, drill and bore and metal and other materials. Students will be able to identify operational problems and provide routine care and maintenance to the manual mill.</p> | CTA | — |
| 176007 | <p>Computer Numerical Control Technology with Industrial Mills and Lathes In this course students will use computer numerical control (CNC) programming to mill products comprised of various materials. Students will prepare numerical control programs in positioning systems using standard industrial G and M codes. They will program computerized numerical control mills and lathes.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 176008 | <p>Manufacturing Capstone The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in Manufacturing program in a more comprehensive and authentic way. Capstones often include project/problem based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship/internship.</p> | CTA | — |
| 176009 | <p>Welding Technologies Students will use fundamental welding principles involving shielded metal arc, oxyacetylene, gas tungsten, and gas metal arc welding in the flat, horizontal, and vertical positions. An emphasis is given to electrode selection, equipment setup, operating procedures, welding inspection, and testing. Students will learn joint designs and layout and will be introduced to welding codes and standards. Additional topics include employability skills and an emphasis will be given to personal safety.</p> | CTA | = |

Table 32. Career Field 16: Transportation Systems Codes (17xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 170350 | <p>Transportation Systems Combined with specialization competencies utilizing business and industry technical standards and math, science, ELA, technology, and business process framework, develops technical literacy in transportation systems, leading to pathways in ground and air transportation and post-secondary articulation.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |
| 170301 | <p>Auto Collision Repair Specialized learning experiences concerned with all phases of the repair of damaged vehicle bodies and frames. Areas of Instruction may include: Paint and Refinishing, Mechanical/Electrical Repair, Structural and Non-Structural Repair.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 170302 | <p>Auto Technology Learning experiences involving the service and repair of the mechanical components of the vehicle. The focus of the program will be in the ASE areas of Electrical/Electronic Systems, and Suspension and Steering, Brakes and Engine Performance.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 170303 | <p>Auto Specialization Specialized learning experiences that involve more intensive training in a single automotive system. Examples may include Automotive Detailing, Custom Car Prep, High Performance, Alternative Fuel, Engine Repair, Transmission Service.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 170400 | <p>Aviation Occupations Classroom and practical experiences that include instruction relating to aircraft maintenance, operation, and ground support. Instructor and program must be certified by the Federal Aviation Administration (FAA).</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 170401 | <p>Aircraft Maintenance This is the official FAA Aviation Maintenance Air Frame and Powerplant Course. 1800 hour program. Instructor and program must be certified by the Federal Aviation Administration (FAA) in airframe and power plant.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 170403 | <p>Ground Operations This program is geared toward the Airport Environment and activities concerning the ground support of commercial aircraft, terminal and hanger activities.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 170801 | <p>Maritime Occupations Utilizing rigorous academics and Maritime industry standards introduce concepts of deck, engineering and other careers in the maritime industry.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 171200 | <p>Medium/Heavy Truck Technician This program focuses on the service and repair of trucks. Instruction includes the diagnosis, maintenance and repair of diesel engines operational systems. ASE areas of concentration are: Diesel Engines, Suspension and Steering, Brakes, Electrical/Electronic Systems and Preventive Maintenance Inspection.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 173100 | <p>Power Equipment Technology Training in this program focuses on 2 and 4 cycle gasoline powered engines and their use in outdoor power and recreational equipment. This includes the basic service and preventative maintenance of equipment.</p> <p>FY15 will be the last year for this subject code; it will be deleted as of FY16.</p> | CTA, TEC | — |
| 177000 | <p>Ground Transportation Maintenance In this first course, students will apply skills needed to inspect and perform general service on vehicles. Students will research applicable service information and technical service bulletins, and perform maintenance on vehicles. Students will inspect and service engine, drive train, suspension, steering, electrical and braking systems. Students will perform ignition maintenance including spark plug/glow plug and ignition wire and coil pack replacement. Additionally, students change fluids, filters and inspect vehicles for leaks and fluid condition.</p> | CTA | — |
| 177001 | <p>Ground Transportation Engine and Power Train Students will inspect, adjust and repair internal combustion engines and drivetrain. Topics include physical and mechanical principles of engines, transmissions and transaxles, differentials and cooling systems. Students will learn precision measurement, inspection, and reconditioning techniques. Students will also identify customer's needs, determine labor rates, and create estimates.</p> | CTA | — |
| 177002 | <p>Ground Transportation Electrical/Electronics Student will diagnose and repair vehicle electrical systems, including chassis electrical, charging, starting and lighting systems. Students will learn the fundamentals of direct current (DC) electronics including series, parallel, and series-parallel circuits. Students will use electronic diagnostic tools, read schematics, and utilize printed and electronic repair manuals to troubleshoot electrical circuits, test components and replace defective modules.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 177003 | <p>Automotive Braking, Suspension, and Steering Systems (Undercarriage Systems) Students will perform inspections, troubleshoot malfunctions and service automotive undercarriage systems. Students will identify poor performing hydraulic brake systems and replace malfunctioning components. Students will install coil and leaf springs, shock absorbers and struts, and replace wheel bearings. Students will inspect and replace automotive steering components and perform wheel alignments. Additionally, students will disable and enable supplemental restraint systems (SRS) and replace antilock brake systems components.</p> | CTA | — |
| 177004 | <p>Ground Transportation HVAC Students will learn principles of heating, ventilation and air conditioning systems (HVAC) for use in motor vehicles. They will also inspect, diagnose, repair and maintain vehicle air conditioning and heating systems. Students will use service equipment to evacuate, store and charge the air conditioning system. An emphasis will be given to the safe handling of refrigerants following EPA regulations.</p> | CTA | — |
| 177005 | <p>Truck Braking, Suspension, and Steering Systems (Undercarriage Systems) Students perform inspections, troubleshoot malfunctions, and service truck undercarriage systems. Students identify poor performing air brake systems and replace malfunctioning components. Students will install leaf springs, shock absorbers and air suspension components. Students inspect and replace truck steering components and replace wheel bearings. Additionally, students will perform wheel alignment and tire inspections, diagnostics, and repair. Identifying workplace risk factors associated with repetitive motion and lifting, operating, and moving of heavy objects are emphasized.</p> | CTA | — |
| 177006 | <p>Automotive Engine Performance Students will research vehicle service histories using model specific service bulletins. Students will test and diagnose for engine performance in fuel, air induction and exhaust systems using advanced testing procedures. Topics include computerized engine controls including retrieving and recording diagnostic trouble codes using On Board Diagnostics (OBD). Additionally, students will diagnose drivability and emissions problems resulting from malfunctions of interrelated systems.</p> | CTA | — |
| 177007 | <p>Truck Diesel Engines Students will inspect, diagnose, and repair diesel truck engines. Students will learn the principles of valve train assemblies, lubrication, intake, exhaust and fuel systems. Additionally, skill development in engine testing, inspection and repair of electronic fuel management systems are emphasized. Students will break down and assemble heavy truck engines and supporting systems.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 177008 | <p>Sports/Recreational Power Systems Students learn principles and skills to maintain and repair sports/recreational vehicles. Students will inspect, diagnose, and repair engine, drive train, and suspension systems. Students remove, disassemble, and repair components in engine cylinder head and block assemblies. Students inspect, adjust and repair drivetrain systems including shaft and chain drive components. Additionally, students will inspect, adjust and replace suspension components including shocks, seals and springs. Students will maintain and adjust systems specific to specialized vehicles.</p> | CTA | — |
| 177009 | <p>Collision Electrical & Mechanical Systems Students will perform inspections and repair electrical and mechanical damage due to collision. Topics include electrical and wiring harness, suspension, braking and cooling system repairs. Students will service supplemental restraint systems (SRS) and ensure the integrity of the systems.</p> | CTA | — |
| 177010 | <p>Collision Structural Inspection & Repair Students will perform automotive collision repair of full and unibody frames and attach non-structural components. Students will apply the skills and knowledge needed to measure and diagnose structural damage, create a parts list, and determine labor costs. Students will remove and replace damaged structural components. Emphasis will be given to joining and cutting aluminum, steel and other metals. Students will maintain tools and facilities while complying with personal and environmental safety practices.</p> | CTA | — |
| 177011 | <p>Collision Nonstructural Inspection & Repair Students will learn the skills and knowledge of automotive body panel repairs, replacements, and adjustments. Students will analyze, document and repair nonstructural collision damage. Students will remove corrosion protection, undercoating, sealer, and other protective coatings as necessary to perform repairs. Emphasis will be given to joining and cutting aluminum, steel and other metals. Students will maintain tools and facilities while complying with personal and environmental safety practices.</p> | CTA | — |
| 177012 | <p>Collision Painting & Refinishing Students will restore and refinish vehicle exterior body and paint finish. Students will inspect and identify substrate, type of finish, surface condition, and film thickness; develop and execute a plan for refinishing using a total product system. Students will inspect, clean, and determine condition of spray guns and related equipment. Additionally, students will observe safety precautions when using hazardous materials.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 177013 | <p>Aviation In this first course, students apply knowledge of aviation theory and navigation to flight performance and planning. Students will apply principles of simple machines and fluid mechanics to aircraft operations. Identification of aircraft engines and airframe related systems will be emphasized. Weather theories and concepts are used to interpret weather-briefing documents. Additionally, students will distinguish among airport environments, and understand rules, regulations and orders relevant to the airport industry.</p> | CTA | — |
| 177014 | <p>Aviation Maintenance General Students will apply knowledge of aircraft ground handling safety procedures to aviation maintenance. Students will start, ground operate, service, and secure aircraft. Students will perform aircraft maintenance including detecting, identifying, removal, and treating of various types of corrosion found on ferrous and non-ferrous metals. In addition, students will identify methods of cleaning aircraft and aircraft components. The course content also focuses on developing communication, leadership, human relations and employability skills; and safe, efficient work practices.</p> | CTA | — |
| 177015 | <p>Aviation Structure and Design Students will inspect, repair, and refinish aircraft airframes and external components. Students will rig rotary and fixed-wing aircraft, evaluate and repair sheet metal and nonmetallic structures. Students will form, layout, bend and join metal airframe components using welding processes, rivets and fasteners. Students will inspect, repair and assemble wooden, metal, aluminum, fiberglass and composite components. Students will inspect and repair external finishes including surface preparation and refinishing.</p> | CTA | — |
| 177016 | <p>Aviation Airframe Systems and Components Students will learn the principles avionics and practical application of AC/DC electrical circuits with an emphasis on airborne installations. Students will learn power calculations, and the relationship of voltage, current, and resistance. Students will inspect, repair, and install instrument, communication and navigation systems. Additionally, students will evaluate and service airframe electrical systems including position, warning, hazard control, ignition systems.</p> | CTA | — |
| 177017 | <p>Aviation Powerplant Theory and Maintenance Students will learn the principles of theory, operation, and maintenance of powerplant electrical systems including ignition, starting, and fire protection. Students will inspect, repair, and install aircraft powerplants including reciprocating, radial, and turbine engines. Students examine and service systems that support each engine type including fuel, lubrication and cooling. Additionally, will perform powerplant conformity and airworthiness inspections, troubleshoot malfunctions and service aircraft to assure continued operation and reliability.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 177018 | <p>Aviation Powerplant Systems and Components Students will inspect, repair and replace fuel systems for fixed and rotary wing aircraft. Topics will include troubleshooting and servicing fuel management transfer, pressure fueling, fluid quantity, fuel indicator and temperature warning systems. Additionally, students will evaluate and service unducted fan, fuel dump, and induction and exhaust systems including heat exchangers and superchargers. Students will perform planned preventative maintenance on tools and equipment, and maintain a clean and safe work environment.</p> | CTA | — |
| 177019 | <p>Aviation Meteorology Learners apply principles of meteorology forecasting to aviation. Students will take, record, encode, and disseminate surface weather observations using forecasting equipment. Topics include concepts of aviation meteorology in the study of temperature, pressure, moisture, stability, clouds, air masses, fronts, thunderstorms, icing, and fog. Additionally, students will interpret and use of weather information for pre-flight and in-flight support to aviation.</p> | CTA | — |
| 177020 | <p>Aviation Airport Management Learners will distinguish between controlled and nontowered fields and apply management principles to airport environments. Students will interpret and use weather, Automatic Terminal Information Systems (ATIS), and Traffic Collision Avoidance Systems (TCAS) to control aircraft operations. Students will sequence aircraft approaches and departures with approach control radar. Students will interpret and use airport lighting, navigation principles and avionic communication systems including Very High Frequency (VHF), Ultra-High Frequency (UHF), radio and phraseology.</p> | CTA | — |
| 177021 | <p>Aviation Pilot Training Students will learn the essentials of piloting an aircraft. Students will learn principles of aircraft operations, air traffic control, meteorology, and navigation. Students learn aircraft performance functions including spins, recovery, stalls, landings and takeoffs. Additionally, students learn to use aircraft instruments and flight controls. Students will apply skills to tie-off, transfer and defuel aircraft. An emphasis is given to Federal Aviation Administration regulations, and mitigation of personal and aviation hazards.</p> | CTA | — |
| 177022 | <p>Aviation Air Traffic Control Students will learn and simulate fundamentals of air traffic control. Subjects taught include principles of aircraft tracking using radar and transponders, controlling aircraft departures, takeoffs, ground operation and in air flight control. Students will learn and simulate techniques of sequencing aircraft approaches and departures using approach control radar. Students will study concepts of meteorology, the flight environment, identification of emergency codes, fundamental aspects of flight and air navigation.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 177023 | <p>Transportation Capstone The capstone course provides opportunities for students to apply knowledge, attitudes and skills that were learned in Transportation program in a more comprehensive and authentic way. Capstones often include project/problem based learning opportunities that occur both in and away from school. Under supervision of the school and through community partnerships, students may combine classroom learning with work experience. This course can be delivered through a variety of delivery methods including cooperative education or apprenticeship/internship.</p> | CTA | — |

Career Based Intervention Section

Table 33. Career Based Intervention (CBI) Codes (25xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 250510 | <p>CBI Language Arts Content based on academic content standards; for CBI students facing academic barriers. (These courses are always reported in EMIS with Curriculum Element “V3”.)</p> | ENG | Language Arts |
| 250519 | <p>CBI Reading Content based on academic content standards; for CBI students facing academic barriers. (These courses are always reported in EMIS with Curriculum Element “V3”.)</p> | ENG | Reading |
| 251110 | <p>CBI Mathematics Content based on academic content standards; for CBI students facing academic barriers. (These courses are always reported in EMIS with Curriculum Element “V3”.)</p> | MTH | Mathematics |
| 251310 | <p>CBI Science Content based on academic content standards; for CBI students facing academic barriers. (These courses are always reported in EMIS with Curriculum Element “V3”.)</p> | SCI | Science |
| 251510 | <p>CBI Social Studies Content based on academic content standards; for CBI students facing academic barriers. (These courses are always reported in EMIS with Curriculum Element “V3”.)</p> | SOC | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 252525 | <p>Career Based Intervention CBI programs are designed for students ages 12 through 21 in grades 7 through 12 who are identified as disadvantaged (either academically or economically or both) and who have barriers to achieving academic and career success. The goals of the program are to help students improve academic competence, graduate from high school, develop employability skills, implement a career plan and participate in a career pathway in preparation for postsecondary education and/or careers.</p> | CTA | — |

Career Development Section

Table 34. Career Development Codes (99xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 990361 | <p>Entrepreneurship Skills (Career Technical) Exploring owning your own business.</p> | CTA | — |
| 990362 | <p>Employability Skills (Career Technical) Work related skills for entering, competing and advancing in a changing work world.</p> | CTA | — |
| 990363 | <p>Essential Skills for Business The central theme of this course is the development of students’ skills that support business employment and entrepreneurial endeavors. Emphasis is placed on using personal, interpersonal and organizational skills that contribute to the success of a business. Students identify their leadership styles, collaborate with people, develop professional networks, use communication skills, and reflect on their own personal growth. They apply principles needed to contribute to business operations in general and management of projects in particular.</p> | CTA | — |
| 990364 | <p><u>Career Connections</u> <u>In this course, students investigate how classroom learning translates into marketable skills. Through hands-on learning and local business involvement, students will engage in career-related experiences to acquire basic skills in various career fields. This provides students with tangible experiences to begin career decision making. Teachers have the flexibility to select career fields related to Ohio’s in-demand jobs represented in the community.</u></p> | <u>CTA</u> | <u>—</u> |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 990365 | <u>Pre-Apprenticeship</u> <u>Students in this course have the opportunity to apply knowledge, attitudes and skills in a structured work environment. Students are enrolled in a career-technical education structured pre-apprenticeship program, apprenticeship, or formalized work-based learning program, with a documented training plan that will potentially lead to further employment or training with the industry partner following graduation. Students are required to have completed at least three courses in the pathway related to the work assignment.</u> | <u>CTA</u> | <u>=</u> |

Family and Consumer Sciences (Career Technical) Section

Table 35. Family and Consumer Sciences Codes (09xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 090191 | <u>Graduation Reality and Dual-Role Skills (GRADS)</u> <u>This course will allow pregnant and parenting students to remain in school while developing parenting skills. Topics will include career readiness, financial management, relationship techniques, human growth and development and parenting styles and responsibilities. This is a dropout prevention program.</u> | <u>CTA</u> | <u>=</u> |
| 090192 | GRADS – Minimum Intervention/Follow-up Graduation, Reality and Dual-role Skills (GRADS) is an instructional and intervention program for pregnant and parenting students, male and female. An in-school instructional program for pregnant and parenting students, grades 7-12. The mission is to promote personal growth, educational competence, and economic self-sufficiency as socially responsible members of society. The objectives are for the student to remain in school, have healthy pregnancies and healthy babies, learn practical parenting and child-development skills, gain orientation to work, set goals toward balancing work and family, and delay subsequent pregnancies. | CTA | — |
| 090193 | GRADS – Alternative Structure Graduation, Reality and Dual-role Skills (GRADS) is an instructional and intervention program for pregnant and parenting students, male and female. An in-school instructional program for pregnant and parenting students, grades 7-12. The mission is to promote personal growth, educational competence, and economic self-sufficiency as socially responsible members of society. The objectives are for the student to remain in school, have healthy pregnancies and healthy babies, learn practical parenting and child-development skills, gain orientation to work, set goals toward balancing work and family, and delay subsequent pregnancies. | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 090194 | <p>GRADS – Class Structure Graduation, Reality and Dual-role Skills (GRADS) is an instructional and intervention program for pregnant and parenting students, male and female. An in-school instructional program for pregnant and parenting students, grades 7-12. The mission is to promote personal growth, educational competence, and economic self-sufficiency as socially responsible members of society. The objectives are for the student to remain in school, have healthy pregnancies and healthy babies, learn practical parenting and child-development skills, gain orientation to work, set goals toward balancing work and family, and delay subsequent pregnancies.</p> | CTA | — |
| 090700 | <p>Consumer and Financial Literacy Students will learn how to manage money, set goals, understand needs and wants, develop spending plans that fit different careers, and make financial decisions based on the impact of advertising and practice good consumer responsibilities.</p> | — | — |
| 091025 | <p>Child Development <u>In this course, students will study the principles of child growth, development, and behavior. An emphasis will be placed on the cognitive development of a child and sensory and motor skills. Additional topics will include childhood diseases, immunizations, theories of development, learning styles and evaluating childcare services.</u> Provide students with knowledge of how parents and child care providers meet the needs of infants and young children to provide for healthy growth and development. Prominent theories of child psychology will be studied.</p> | CTA | — |
| 091050 | <p>Financial Management I Course provides students with an understanding of the concepts and principles involved in managing one’s personal finances. Topics may include savings and investing, credit, insurance, taxes and social security, spending patterns and budget planning, contracts, and consumer protection. These courses may also provide an overview of the American economy.</p> | CTA | — |
| 091051 | <p>Financial Management II Course helps students evaluate resources, financial institutions and services that meet individual, family and business goals, protect financial health including credit and debit, prevent loss of assets, and advocate public policy issues that impact financial well-being.</p> | CTA | — |
| 091400 | <p>Career Search I Update IACP plans, practice job skills, and interpret career and workplace issues. Demonstrate how academic achievement influences personal and career growth, conflict resolution techniques and apply social skills that lead to effective school, career and family relationships that lead to a healthy, caring and responsible citizen.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 091401 | <p>Career Search II (Includes Mentorship) Areas of study would include assessing career plans, managing job searches, and examining career and workplace issues, develop essential interpersonal skills, communication skills and workplace related skills. The course has a mentorship experience attached.</p> | CTA | — |
| 091410 | <p>Transitions and Careers <u>In this course, students will analyze interests, aptitudes and skills to prepare for careers and transition through life. An emphasis will be placed on work ethics, team building, communication and leadership skills. Additional topics will include technology etiquette and career planning.</u>Students develop personal assets of a healthy, responsible citizen and family member who are responsible for their academic, career and personal growth.</p> | — | — |
| 090050 | <p>Healthy Food – Middle School Provide students with the knowledge to evaluate good food choices and develop a plan for maintaining healthy weight. Demonstrate proper food handling, food preparation and apply safe kitchen practices.</p> | — | — |
| 091077 | <p>Healthy and Safe Food Develop practical problem solving that influences cultural and social factors that affect the body weight and healthy lifestyles. Demonstrate safe food-handling practices related to food-borne pathogens and kitchen environments.</p> | CTA | — |
| 091200 | <p>Healthy Living Develop practical problem solving that influences cultural and social factors that affects the body weight and healthy lifestyles. Demonstrate safe food-handling practices related to food-borne pathogens and kitchen environments. Use time management strategies, decision-making skills, peer pressure and multi-cultural awareness that relate to educational, work and family goals that sustain productive, meaningful lifestyles.</p> | CTA | — |
| 091300 | <p>Managing Transitions Assess values and resources that support lifestyle goals, effective time management plans, stress management, multicultural awareness that sustains a productive, meaningful lifestyle. Choose resources that meet individual, family and business financial goals, credit and debt issues, techniques to prevent financial loss of assets conflict resolution and public policy that impact financial well-being.</p> | CTA | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 091201 | <p><u>Introduction to Family and Consumer Sciences</u> <u>This first course, will provide students with an overview of the four major content areas of Family and Consumer Sciences. Students will be introduced to child development, family relationship concepts and how they relate to family dynamics. Additionally, students will identify financial literacy and consumer economic principles. Students will understand the concepts of design through textiles for personal and home use. Throughout the course, students will develop communication, leadership and career investigation skills.</u></p> | CTA | = |
| 091205 | <p><u>Principles of Food</u> <u>In this course, students will gain knowledge in food selection criteria and apply preparation methods to promote a healthy lifestyle. Students will apply cooking methods, ingredient selection and nutritional information in the context of selected food dishes. Throughout the course, basic food safety and sanitation techniques will be emphasized.</u></p> | CTA | = |
| 091210 | <p><u>Global Foods</u> <u>In this course, students will compare cuisines, ingredients and preferred cooking methods of various cultures. The influence of traditions and regional and cultural perspectives on food choices and culinary practices will be emphasized. Students will examine the issues and conditions that affect the availability and quality of food in the global market, and apply advanced cooking techniques, including the use of specialty and advanced equipment in the preparation of food dishes.</u></p> | CTA | = |
| 091215 | <p><u>Food Science</u> <u>In this course, students will apply basic culinary practices and understand how flavor, texture and appearance are affected during food preparation. Students will evaluate chemical reactions as they occur in cooking methods and assess how to control high-risk food safety situation. Food safety and sanitation techniques will align to industry-recognized certifications.</u></p> | CTA | = |
| 091220 | <p><u>Culinary Fundamentals</u> <u>In this course, students will apply fundamental culinary techniques, such as knife handling skills and the recognition, selection and proper use of tools and equipment. An emphasis will be placed on mise en place, the management of time, ingredients and equipment. Students will apply standard recipe conversions using proper scaling and measurement techniques.</u></p> | CTA | = |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 091225 | <p><u>Principles of Nutrition and Wellness</u> <u>In this course, students will use principles of nutrition to ensure a healthy body throughout the lifecycle. An emphasis will be placed on planning and preparing meals with an understanding of nutrients and their benefits, portion control and dietary needs. Additional information will include steroid and supplemental use, body weight and management and the implementation of physical activity to maintain a healthy lifestyle.</u></p> | CTA | = |
| 093010 | <p><u>Personal Wellness</u> <u>In this course, students will analyze personal physical, emotional, social and intellectual growth for a healthy lifestyle. An emphasis will be placed on lifespan wellness by managing stress through relaxation, physical activity and sleep. Additional topics will include human growth development, mental health management, personal hygiene and preparing for emergency medical situations. This course may serve as the Health credit.</u></p> | CTA | = |
| 093015 | <p><u>Human Growth and Development</u> <u>In this course, students will analyze human growth and development throughout the lifespan. An emphasis will be placed on physical, cognitive, social and emotional growth and development. Additional topics will include human characteristics and traits, genetic defects, parenting styles and responsibilities and cultural differences within a family unit and community.</u></p> | CTA | = |
| 091403 | <p><u>Leadership and Community Engagement</u> <u>In this course, students will learn how to become an active community member and citizen. An emphasis will be placed on in-service learning, leadership training and teambuilding opportunities. Additional topics will include public policy issues, community and global engagement.</u></p> | CTA | = |
| 091053 | <p><u>Consumer Economics</u> <u>In this course, students will study public policy and consumer behavior related to consumer economics. Throughout the course, students will examine laws and regulations that affect the consumer. Additional topics will include consumer expenditures, consumer fraud, global economy, large purchases, and contracts.</u></p> | CTA | = |
| 091052 | <p><u>Personal Financial Management</u> <u>In this course, students will develop personal financial plans for individual personal well-being. Throughout the course, students will develop financial literacy skills to provide a basis for responsible citizenship and career success. Additional topics will include analyzing services from financial institutions, consumer protection, investing and risk management.</u></p> | CTA | = |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 091402 | <p><u>Career and College Readiness</u> <u>In this course, students will develop effective learning strategies and skills to provide a strong foundation for successful lifelong learning. Throughout the course, students will research careers and occupations, review postsecondary admissions qualifications, develop interviewing skills and participate in internships. Additional topics will include principles and techniques of professionalism, networking, conflict-resolution, negotiation, leadership and entrepreneurship.</u></p> | CTA | = |
| 091500 | <p><u>Interior Design, Furnishings and Management</u> <u>In this Family and Consumer Sciences career field, students will examine design principles used in residential interiors. An emphasis will be placed on incorporating anthropometrics, ergonomics and psychological responses. Additional topics will include the selection and organization of furnishings, floors and wall coverings in living spaces, kitchens and baths.</u></p> | CTA | = |
| 091505 | <p><u>Textile Design, Construction and Maintenance</u> <u>In this course, students will study the visual appearance of fabric and fashion design. Students will identify, analyze and apply production processes and techniques to textiles. Additional topics will include the maintenance and alterations of textiles products, including home interior accessories and garments.</u></p> | CTA | = |
| 091501 | <p><u>Textiles and Interior Design</u> <u>In this course students will explore a broad range of topics relating to the various aspects and career opportunities available in the field of textiles and design. The emphasis will be given to textiles project development and developing strategies to maintain the home. Additional topics will include project collaboration, design techniques and environmental sustainability.</u></p> | CTA | = |
| 093005 | <p><u>Personal Wellness and Development</u> <u>In this course students will develop a personalized approach to healthy living. An emphasis will be placed on developing personal health for an adolescent that can be used as they transitions through life. Additional topics will focus on problem-solving, work ethics, nutritional and food selections, family dynamics and personal health.</u></p> | CTA | = |

SELF-CONTAINED COURSES SECTION

Table 39. General Education Codes (18xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 180108 | Preschool Preschool program in a self-contained classroom, this includes course related to ECE, Federal Head Start, and other local programs. | NA | — |
| 180280 | Title I Preschool A preschool program funded with Title I funds. | N/A | — |
| 180050 | Early Education (0-2) Courses taught to students ages 0-2. | N/A | — |

Table 40. Exceptional Children (for Students with Disability Conditions) Codes (19xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|---|---|-----------------------------------|-----------------------------|
| 196095 | Early Education of the Handicapped Special Education programs and related services for children below six years of age. | N/A | — |
| 199000 | Transition to Post School Readiness Specialized curriculum designed for students with disabilities 14 years of age and older that provides training for the development of skills that supports the students transition to post school environments, including employment, postsecondary education, independent living, or community participation. | N/A | — |
| Content of the following courses is based on IEP goals linked to standards, but instruction is based on substantial modification to the form and substance of the general education curriculum. Course content focuses largely on application of state standards through essential life skills that typical students generally acquire in a non-school setting. For example, content in these courses linked to language arts standards might be learning to say one’s own name or expressing preferences using non-verbal responses; content in these courses linked to math standards might be learning the concept of “one.” | | | |
| 196350 | Adaptive Living Skills (K-3) Basic skills for students with severe motor, sensory, or cognitive disabilities that present unique and significant challenges to participation in other courses. Grades K - 3 | N/A | — |
| 196360 | Adaptive Living Skills (4-6) Basic skills for students with severe motor, sensory, or cognitive disabilities that present unique and significant challenges to participation in other courses. Grades 4 - 6 | N/A | — |
| 196370 | Adaptive Living Skills (7-8) Basic skills for students with severe motor, sensory, or cognitive disabilities that present unique and significant challenges to participation in other courses. Grades 7 - 8 | N/A | — |

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 196380 | Adaptive Living Skills (9-12) Basic skills for students with severe motor, sensory, or cognitive disabilities that present unique and significant challenges to participation in other courses. Grades 9 – 12. | N/A | — |

OTHER COURSES SECTION

Table 41. Other Course Codes (30xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|---|---|-----------------------------------|-----------------------------|
| These courses may be included in district programs and/or graduation requirements. However, these courses are not aligned with the academic content standards and do not represent courses for which credit toward meeting legislated graduation requirements is awarded. | | | |
| 300010 | Career Exploration Scheduled time for researching career options. | ELE | — |
| 300020 | Community Service (Volunteer Program) Scheduled time for volunteer service projects during or outside the school day. Note: This course cannot earn credit per ORC §3313.60.5. | ELE | — |
| 300030 | Study Skills Instruction in strategies to improve learning and develop study skills; e.g., tips to improve study habits and test performance, with limited coverage of new content or the academic content standards for a single or multiple academic areas. | ELE | — |
| 300040 | School Publications Scheduled time for production work and related activities of school publications; e.g., advertising and finances, for newspaper and/or yearbook. Activities not aligned with the academic content standards and do not earn English Language Arts credit. | ELE | — |
| 300050 | Wellness A course that addresses general wellness strategies. Credit earned is not applied towards meeting graduation requirements for health and physical education due to limited focus on content related to those areas. | ELE | — |

Table 42. Humanities Codes (31xxxx)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--|--|-----------------------------------|-----------------------------|
| Humanities courses may be included in district programs and may be taught by a teacher holding a valid certificate or instruction may be provided by a team of teachers that collective hold the appropriate certificates/licenses for the content areas included in the course. | | | |
| 310010 | Humanities (7-8) The study of cultural achievements through the integration of literature, the arts, religion, history, and philosophy. (for grades 7-8) | N/A | — |
| 310020 | Humanities The study of cultural achievements through the integration of literature, the arts, religion, history, and philosophy. | N/A | — |

Table 43. Driver Education Code (210100)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|---|-----------------------------------|-----------------------------|
| 210100 | Driver Education Learning experiences provided by the school for the purposes of helping pupils to become good traffic citizens and to operate motor vehicles safely and efficiently. | ELE | — |

Table 44. ROTC Military Science Code (220000)

| Subject Code | Description | Suggested Subject Area for Credit | Core Subject Area (for HQT) |
|--------------|--|-----------------------------------|-----------------------------|
| 220001 | ROTC Military Science Organized subject matter and learning activities which are concerned with the development in each student attributes of (1) good citizenship and patriotism, (2) self-reliance, leadership, responsiveness to constituted authority, (3) a knowledge of the basic military skills, and (4) an appreciation of the role of the U.S. military in national defense. | ELE | — |
