Report Overview

General Description and Significance

The data collected are used to determine the amount of Special Education Part-B IDEA and Early Childhood special education funds allocated to the state. Data submitted to the federal Office of Special Education are aggregated by disability, age, race, LEP status, gender, and poverty status. The December Childhood Count report contains detailed handicapped student counts by disability type, by primary program code, and by age.

City, exempted village, local traditional public school districts and community schools are required to report data on the number of children with disabilities who are receiving special education and related services in accordance with an IEP on December 1, 2006. These data are to be submitted to the US Department of Education by February 1, 2007.

Page 10, 3, 4, and 5-year-olds.

The data on this page count **PRESCHOOLERS WITH A DISABILITY '11'** for **AGES 3, 4, and 5** and **OTHER 5 YEAR OLDS**.

The 5-year-old students are counted in two columns, those who are disabled preschoolers and other 5 year olds. Five-year-olds might be preschool or kindergarten students. Because the 5-year-olds who do not have a disability condition of “11” might have either a 217XXX program code or a 210XXX program code, there is a cross-walk between the two sets of codes.
