# Report Overview

## *General Description and Significance*

The data collected are used to determine the amount of Special Education Part-B IDEA and Early Childhood special education funds allocated to the state.  Data submitted to the federal Office of Special Education are aggregated by disability, age, race, LEP status, gender, and poverty status.  The December Childhood Count report contains detailed handicapped student counts by disability type, by primary program code, and by age.

City, exempted village, local traditional public school districts and community schools are required to report data on the number of children with disabilities who are receiving special education and related services in accordance with an IEP on December 1, 2008.  These data are to be submitted to the US Department of Education by February 1, 2009.

## *Header Information*

The first area of the header describes information about the report generation. The upper left section names the program from which the report was generated and the data source. The middle information identifies the producer of the report and the report title. The upper right section states the page number, and the date on which the report was generated.

The second area of the header pertains to the recipient of the report. It identifies the district for which the report was produced, its IRN and COUNTY, and the phone number of the district.

That is followed by a line stating the disability type for the counts on a specific page.

That is followed by column headers that are the same for all pages except 5, 10, and the summary page:
   • AGE
   • CHILDREN CURRENTLY IN PROGRAM
   • Then the list of Least Restrictive Environment codes.

## *Detail Information*

In brief, there are 15 pages to the report. Each lists data about a specific disability condition.

<u>Page 10: 3, 4, and 5-year-olds</u>.

The data on this page count **PRESCHOOLERS WITH A DISABILITY** for **AGES 3, 4**, and **5** and **OTHER 5 YEAR OLDS WITH A DISABILITY**.

The 5-year-old students are counted in two columns, those who are disabled preschoolers and other 5 year olds.  Five-year-olds might be preschool or kindergarten students.  Because the 5-year-olds might have either a 217XXX program code or a 210XXX program code, there is a cross-walk between the two sets of codes.

# CSV Report

This Comma Separated Value (CSV) format file contains a record for each student a district submitted during the reporting week.

In basic terms, the CSV file will contain the data element values separated by a comma to denote the end of one data element value and the start of a new one.  For example, if you were to take the district IRN, its name, and county and convert it into a CSV file it would look like this:

**012345, My District, Franklin**

When imported into Excel, this string of comma separated values would be split into corresponding columns:

| District IRN | District Name | County Name |
|---|---|---|
| 012345 | My District | Franklin |

*TIP: When importing data from a CSV file containing a numerical value that starts with a zero, like an IRN, it is important to import that type of data element as text and not a number in Excel.  If imported as a numerical value, the first zero will be removed.*

## *Header Information*

The following is the header as it appears in the original CSV file.  Note: the comma between each element name allows the data to be opened in Excel as a comma-delimited file without any additional formatting on the user's part.

The header record for the CSV file contains:

**Fields to Display**

1.) District IRN
2.) SSID
3.) Disability Code
4.) Student Age
5.) Primary Program Code
6.) Related Service Code
7.) State Equivalent Grade Level
8.) Date of Birth
9.) Student Status Code
10.) Student Attending/Home Indicator Code
11.) Racial/Ethnic Code
