## Revision History

The revisions to this document listed in the table below.

Revision Date	Owner/Source	Description of Change
January 15, 2009	ODE/IPM	Updated report explanation to reflect usage of new FY09 records.
May 27, 2009	ODE/IPM	Updated for FY09N
Dec 8, 2009	ODE IPM	Updated for FY10

## Report Overview

### *General Description and Significance*

This exception report should provide a listing of preschool special education students who should have an ECO record but that has not yet been reported by a district. These students meet the profile described under selection criteria.

These data will define whether or not preschool students with a disability have been assessed using this instrument.

### *Report Distribution*

A report is to be distributed weekly to any EMIS reporting entity where data meet the report criteria. It is to be generated during the weekly cycle and transferred to its contracted ITC for distribution. The output is to include district-level information in a single report file.

The file name for the report is:

**ITC\_IRN\_COORD\_CCYYMMDD.CSV\_CCYY?\_STU\_PS\_ECO\_MISSING**; its components are described below. This report is produced during the October (K) and Yearend (N) reporting periods.

## Constraints

### *Data Source*

These data come from the *Student Demographic, Student Standing, Student Attribute-Effective Date, Preschool ECO Assessment, OEDS, and Audit* files.

Revised December 8, 2009

### Derived Data Used in Report

Element Name	Record Field #	File Name	Field Value	Conversion factors
STUDENT AGE		<i>Student Demo</i>	Calculated from DOB	

### Report Selection Criteria: Potential Students

FISCAL YEAR is the current school year and reporting period is October (K) or Yearend (N).

The grade level used must be the STATE EQUIVALENT GRADE LEVEL equal to “PS.”

With the exception of students in the Autism Scholarship program, all preschool students with a disability and between the age of 3-5 years by December 1 of the current fiscal year where the reporting district has a district relationship (*DIST\_RELAT\_CODE*) value of “1” or “2” or (“3” with a value indicating the student is being sent to an MR/DD (*FIRST\_SENT\_REASON\_CODE* or *SECOND\_SENT\_REASON\_CODE* = “MR”).

*For October (K) reporting:*

- A potential student must have a Student Standing Record with an ADMISSION DATE and EFFECTIVE START DATE before December 2 of the current fiscal year.
- A potential student must have a Student Standing Record with an EFFECTIVE END DATE on or after the start of the school year.

*For Yearend (N) reporting:*

- A potential student must have a Student Standing Record with an EFFECTIVE START DATE AND an ADMISSION DATE before May 15 of the current fiscal year (the end of the Spring test administration window’s fiscal year).
- A potential student must have a Student Standing Record with an EFFECTIVE END DATE on or after December 2 of the school year (> Dec 1).

### Selection Criteria: Potential Districts

When multiple districts are involved in the student’s education, the district having the lowest relationship (*DIST\_RELAT\_CODE*) value and who is also the legal district of residence (*STDNT\_RESDNG\_DIST\_IRN*) will trump all other districts as the district responsible for reporting test records.

In cases, where none of the districts are the legal district of residence, then all districts sharing the lowest relationship value are responsible for reporting test records.

A district sending a student to an MR/DD, the sending district is responsible for reporting test records.

Revised December 8, 2009

## Logic

The program will check the student records for those students who should have PRESCHOOL ECO ASSESSMENT records for the current reporting period of the current fiscal year, to determine which students do not have assessment records.

The program will check all districts reporting the student to determine which district is responsible for reporting the assessment records but none have been reported by the district.

To determine the percentage of records that will be required at various weeks during the reporting period use the following logic.

The NUMERATOR\_COUNT and the DENOMINATOR\_COUNT must be calculated once for each responsible district whose student data are read in this program. Even if the district does not get a missing report, i.e. all of its test records have been submitted, the program should calculate the NUMERATOR\_COUNT and DENOMINATOR\_COUNT.

For each responsible district, every time the program determines that it has found an SSID for a student who should take this particular test (the student meets the criteria for this test), add 1 to the count for the denominator.

For each responsible district, every time the program finds required test records for this SSID, add 1 to the count for the numerator, only if all three tests have been reported (Assessment area E, K and T). If the program does not find all the required test records for this SSID, the record should be included in the Missing Report.

## Report

### *Header & Detail Information*

The following is the header and detail as it should appear in the CSV file. Note: A comma should be placed between each element name allowing the data to be opened in Excel as a comma-delimited file without any additional formatting on the user's part.

**Note:** Output column, START-OF-SCHOOL, only appears on Period K reports.  
Blank or null FS-END-DATE is replaced with '25001231'.

### **Error Detection and Correction**

As this file is providing the district with a report that reflects at least one missing Preschool ECO Assessment testing record, if there are any discrepancies between the file and the district's information, check the specific admission fields for accuracy. The district should also verify all fields on the ***STUDENT PRESCHOOL ECO ASSESSMENT*** record for accuracy and completeness. Other issues that can cause errors:

- More than one open Student records (Student Standing and/or Student Attribute – Effective Date record). Verify the report against the record containing the latest effective start date that is within the test window.
- Verify latest changes if any on Student Attributes- No date record (disability, grade level).
- The district with the lowest district relationship value has not reported the student. Look at the SSID report and see who else is reporting the student.

Revised December 8, 2009

- The district should verify that *admission date, effective dates, state equivalent grade level, and disability condition* elements are reported correctly by the district
- For October reporting period, make sure the *effective date* on the Student Standing record is greater than or equal to the building's first day of school. If no building record is found, 09/30 is the default building first day of school.
- Verify all that three tests have been reported for the student; one test per assessment area (E, K and T).

The district should also review all elements listed under the **Submitted Data Used in Report** table to ensure that all elements were reported correctly.
