## Revision History

The revisions to this document listed in the table below.

Revision Date	Owner/Source	Description of Change
5/15/2007	IP&M/McKeand	Revised report explanation to include A,N,O summary CSV files, revised report name illustrations, revised table of contents and index, and removed excess white space.

## Report Overview

### *General Description and Significance*

The Where Kids Count reports are a series of business rules that are implemented during the accountability calculations. As their names implies, these rules determine which school and/or district a student's test scores will count towards.

The Where Kids Count Report is generated through software modules that generate six .CSV files for each district, three containing WKC detail by test and three containing summary information by test. Each student record is initially assigned a WKC IRN, which is modified by subsequent adjustments. The first adjustment that matches the student's data is processed and any remaining adjustments are ignored.

### *Tips for Reading This Document*

- EMIS data elements are written in **SMALL CAPITAL LETTERS**.
- Report field names are written in **BOLD SMALL CAPITAL LETTERS**.
- Options (values) for each data element are indicated in *ITALICIZED CAPITAL LETTERS* and are enclosed in quotation marks.
- Record names are displayed in *italicized bold letters*.
- File names are displayed in **CAPITALIZED BOLD LETTERS**.
- CCYY? denotes the century and year and processing period.

Revision Date May 15, 2007

**Report Name and Timing**

The file name for the report is **.CSV\_CCYYN\_STU\_WKC\_ATEST**; its components are described below. This report is produced during the Yearend (N) reporting period.

The file name for the report is **.CSV\_CCYYN\_STU\_WKC\_ATEST\_SUMM**; its components are described below. This report is produced during the Yearend (N) reporting period.

The file name for the report is **.CSV\_CCYYN\_STU\_WKC\_NTEST**; its components are described below. This report is produced during the Yearend (N) reporting period.

The file name for the report is **.CSV\_CCYYN\_STU\_WKC\_NTEST\_SUMM**; its components are described below. This report is produced during the Yearend (N) reporting period.

The file name for the report is **.CSV\_CCYYN\_STU\_WKC\_OTEST**; its components are described below. This report is produced during the Yearend (N) reporting period.

Revision Date May 15, 2007

The file name for the report is `.CSV_CCYYN_STU_WKC_OTEST_SUMM`; its components are described below. This report is produced during the Yearend (N) reporting period.

## ODE Processing

### Process Description

This report is generated based on the EMIS data files submitted through the ITCs. The output is six CSV files for each district, three containing WKC detail by test and three containing summary information.

### Logic

#### WKC Assignment:

When both the Majority of Attendance IRN and the Accountable IRN contain **building** IRNs with different values, the Accountable IRN value will be used to populate the WKC IRN. For all other conditions, Majority of Attendance IRN will be used to populate the WKC IRN.

#### WKC Adjustments:

1. If the student has a Limited English Proficiency (LEP) equal to "L", then the WKC IRN is assigned the State IRN ("\*\*\*\*\*") and WKC TYPE is assigned the value '12'.
2. If the student participated in an Autism Scholarship, then the WKC IRN is assigned the State IRN ("\*\*\*\*\*") and WKC Type is assigned the value '11'.
3. If the WKC IRN assignment does **not** equal "\*\*\*\*\*" and the student's attending home status is '1B' or their Attending/Home status is between '22' and '26' and student status is 'B', the WKC IRN is assigned the Attending/Home District IRN and the WKC TYPE is assigned the value '10'.

Revision Date May 15, 2007

4. If student's attending home status is '1P' or '1T' or their Attending/Home status is between '22' and '26' and the student status is a 'P' or 'T', then the WKC IRN is assigned the State IRN and the WKC TYPE is assigned the value '05'.
5. If the WKC IRN assignment is a building and both the Majority of Attendance IRN and Accountable IRN contain the same building IRN, the WKC IRN remains as assigned and the WKC TYPE is assigned the value '01'.
6. If the WKC IRN assignment is a building but the Majority of Attendance IRN and Accountable do not contain the same building IRN, the WKC IRN remains as assigned and WKC TYPE is assigned the value '02'.
7. If the WKC IRN assignment is a district, the WKC IRN remains as assigned and the WKC TYPE is assigned the value '03'.
8. If the WKC IRN assignment is the state, the WKC IRN remains as assigned and the WKC TYPE is assigned the value '04'.
9. If the 'subject' WKC IRN is a BLDG-IRN, move the Spring Test Administration IRN to the subject WKC IRN and the WKC TYPE is assigned the value of '15'.

See the EMIS manual for reporting instructions regarding the Accountability IRN and the Majority of Attendance IRN fields.

### ***Data Source***

The Detail WKC is sorted in ascending WKC IRN, Test Type, and State Student ID order and is created from Student Demographic records. The Summary WKC text file will be sorted in ascending File IRN, Reporting Building IRN order to create the summary CSV.

### **Submitted Data Used in Report**

Submitted data used in this report are obtained from the Student Attendance Record, Student Demographic Record, Student Achievement Record, Ohio Graduation Test Record, and OEDS.

<b>Element Name</b>	<b>Record Field #</b>	<b>File Name</b>	<b>Special Notes</b>

STUDENT –DATA-SUBMIT-DATE		<i>Audit File</i>		

\*Note: State and Federal Caps

The 1.0% district alternate assessment cap is defined as: The number of students taking the alternate assessment reported with a score at or above the proficient level can not consist of greater than 1.0% of the number of students that took the test (both the standard and the Alternate Assessments).

There is one cap, set at the district level, that is applied separately to 2 different populations:

Federal - for calculating AYP (Federal District Cap) Includes:

- 3 - 8th Grade Reading Achievement
- 3 - 8th Grade Math Achievement
- 10<sup>th</sup> Grade OGT in Reading and Math

State - for calculating the performance index & state indicators (District Alternate Assessment Cap) Includes:

- All tests in grades 3-8, 10 and 11.

NOTE: A student whose score counts as proficient when the cap is applied to one cohort of students (federal or state) might not count as proficient when the cap is applied to the other cohort of students.

### Report Selection Criteria

Every student that is reported to ODE will be on one of the WKC Reports.

Detail Information

Revision Date May 15, 2007

The header record for the CSV file contains:

<b>Data Element</b>	<b>File Name</b>	<b>Special Notes</b>
<b>FILE IRN</b>	File IRN	Contains either a DISTRICT IRN or ATTENDING/HOME DISTRICT IRN Field used to control into which District's CSV file the remaining record data is written

**Subject Indicator Calculation:** Indicator equals:

\* (If student grade level is NOT = 3, 4, 5, 6, 7, 8, 10, or 11) or (If test grade level is NOT = 3, 4, 5, 6, 7, 8, 11, or OGT) or (If WKC IRN = “\*\*\*\*\*”)

N If no test result record found for subject.

Y/N Contents of test taken flag.

Please note that for students taking the Achievement Test, the highest score for the current school year will be reflected in the report from across all districts in which a student has attended. For students taking the Ohio Graduation test, the highest score reflected in the report has been gleaned from all years of test scores, across all school districts.

## Report Sample, CSV File

### *CSV File Format, General Information*

Revision Date May 15, 2007

This Comma Separated Value (CSV) format file contains a record for each student that a district submits during any reporting period. In basic terms, the CSV file will contain the data element values separated by a comma to denote the end of one data element value and the start of a new one. For example, if you were to take the district IRN, its name, and county and convert it into a CSV file it would look like this:

**012345, My District, Franklin**

When imported into Excel, this string of comma separated values would be split into corresponding columns:

<b>District IRN</b>	<b>District Name</b>	<b>County Name</b>
012345	My District	Franklin

*TIP: When importing data from a CSV file containing a numerical value that starts with a zero, like an IRN, it is important to import that type of data element as text and not a number in Excel. If imported as a numerical value, the first zero will be removed.*

## **Error Detection and Correction**

If there are any discrepancies between the report data and the numbers that the district believes it submitted to ODE, district personnel should check their aggregation error messages, their data submission reports, and other student reports.

If there are questions about the numbers, districts should look particularly at any of the elements that are used as report criteria. Student records should be checked for the validity of the values in:

- GRADE LEVEL
- RACE
- GENDER
- DISABILITY CONDITION
- DISADVANTAGEMENT
- LEP
- HOMELESS
- MIGRANT
- 504 PLAN
- BUILDING IRN
- STATE EQUIVALENT GRADE LEVEL
- PROGRAM CODE
- STUDENT ACHIEVEMENT TEST RECORD
- OHIO GRADUATION TEST RECORD

## Addendum

### Where Kids Count Type Explanation

WKC Type Code	Meaning	WKC Level
01	Student is enrolled in one building within a district for a full academic year.	Student counts at the building where the full academic year criterion is met, AND counts at the district, and state levels, for the % proficient, performance index, and attendance rate calculations.
02	Student is enrolled in one building within a district for a full academic year, AND The district has determined that the student should be included in another building within the reporting district for accountability purposes.	Student counts at the building level in the building indicated in the "Accountability IRN" by the educating entity, AND counts at the district, and state levels, for the % proficient, performance index, and attendance rate calculations.
03	Student is enrolled in the district, but not in one building within the district, for a full academic year.	Student counts at the district level and the state level for the % proficient, performance index, and attendance rate calculations.
04	Student is NOT enrolled in either a building or a district for a full academic year.	Student counts at the state level for the % proficient, performance index, and attendance rate calculations.
05	Student is placed into an institution either via a court-placement or a parent-placement.	Student counts at the state level for the % proficient, performance index, and attendance rate calculations.
10	Student participates in a special education cooperative program in another district; and is in the educating district for a full academic year.	Student counts in the Resident District for the % proficient, performance index, and attendance rate calculations. The student will count at the educating district for participation rate.
11	Student Participates in the Autism Scholarship	Student counts in the state level calculations, if student has attendance or takes a statewide test in a public district.
12	LEP student in US schools	State level calculations: %
