GRAD ISSUES REPORT

FUNCTION AND PURPOSE

All traditional districts, community schools, and STEM districts receive a Grad Issues Report, which is a Level 2 report that can be found in the Data Collector.

The Grad Issues Report is designed to assist districts in identifying possible data quality issues and is not meant to imply that ODE has made a determination that the information presented contains errors. This is based on data reported in the Student and Graduation Collections. This report may be useful to district administrators as well as the district EMIS coordinator.

PROCESS DESCRIPTION

The Grad Issues Report generates rows based on potential issues that have been flagged for review and assigned a Result Code. Each Result Code assigned is based on an anomaly in reporting, where the data may be causing unintended outcomes.
