# Ohio Department of Education

## EMIS FY12 Changes

Presented by:  
David Ehle, Director  
Office of Data Quality and Governance  
Ohio Department of Education  
September 16, 2011

---

# Overview

- Some Delayed Implementation
- General Student Changes
- Assessment
- Courses and Teachers
- Building/District Record Redesign
- Special Ed OSEP Compliance Period
- Career Tech Updates
- Overrides via Record Type
- Miscellaneous Changes

---

# The Usual Reminders...

- Not enough time today to cover all the details of each change
- More information will be included in the manual (which will be out very soon...)
- As always, if conflict between this presentation and manual, manual prevails

---

# Delayed Implementaion

- Monthly Vendor conference call since January
  - Changes discussed in detail
  - Pieces of the manual provided
- However, since manual not available, ODE will support some reporting under both FY11 and FY12 requirements in October- marked with \* on slides
- Many do not impact reporting until yearend- marked with (N)

---

# General Student Changes

- Exemption from CORE requirements<sup>(N)</sup>
- Military Compact students & OGT<sup>(N)</sup>
- Admitted From & Withdrawn To IRNs\*

---

# Assessment

- New tests in pipeline- can not continue current path
- A single record type for all assessments\*
- Add element to indicate which test the score is from (GA, GX, GO, GB, etc.)\*
- Only one score per row- so multiple rows for some tests (e.g., OTELA)\*

---

# Assessment

- Move elements not related to scores to other locations
  - Test Building IRN now derived based on schedule for Math assessment for a particular building and grade level<sup>(N)</sup>
  - Required for grad to new record type<sup>(N)</sup>
  - Acceleration information to new record type<sup>(N)</sup>
  - No longer report INV, PNO, and NSA as scores- now Score Not Reported\*

---

# Assessment

- New Special Education Graduation Requirements record<sup>(N)</sup>
- Reported at time of IEP
- Only reported if a student is exempted from one or more OGT subject passes, or...
- If previously exempted but exemption removed

---

# Assessment

- In long run, separate record type works better than addition to the GE record
- Student with an IEP could have anywhere from 0 to 5 rows
- reported as exempted for a subject, report again for each IEP if still true
- No longer need to re-report most recent score if status changes

---

# Assessment

- New Acceleration record<sup>(N)</sup>
- Combines several elements in one place
  - Y4 accommodation from OAA record
  - Special rules for reporting Building IRN on test record of accelerated student
  - Acceleration count from FN record

---

# Courses and Teachers

- Multiple teachers per course\*
- Multiple enrollment ranges per course\*
- Dates on all Course Masters
- Exceptions to course dates for all Student Course\*
- Credit Flex

---

# Courses and Teachers

- A significant change for some districts
- Many business rules still being developed
- Will not be perfect the first year
- Critical to start now- expect growing importance based on policy and budget discussions

---

# Multiple Teachers per Course

- Add a new record type- Teacher Course
- Allow multiple teachers to be associated with a single group of students\*
  - At same time (team teaching)
  - Change in teacher during year
- Report role and date range if different from CN\*
- In future, may include other staff types (intervention, assistant, etc)
- Move items related to teacher from Course Master to Teacher Course

---

# Multiple Student Enrollments\*

- Same student in course more than once
- Date range must be different
- All courses
- Remove need to figure out which enrollment date range to report
- Simply report what is
- ODE will use dates in business rules

---

# Dates on Course Masters

- In 11K, 99.5% of course masters have dates
- For multiple teachers and students to work, must know dates of course
- All courses to report start and end date

---

# Dates on Student Course\*

- No change from exception reporting- if in course for dates on course master, no dates required on student course
- Now required for all courses- not just CTE and PSSE
- The “how many days” question...
- ODE will use dates to pull students for specific business rules

---

# Credit Flex

- Credit Flex experiences reported as a course
- Adding an element to indicate that a course is being completed under a credit flex plan
- Credit flex will be exempt from some agg and other checks
- Adding additional Delivery Methods

---

# Building/District Record Redesign

- Building record to be split
  - Calendar information- own record by grade and attendance pattern
  - Report one row per grade/AP combo
  - Other dates, counts, or codes- 1 per row
- District record to have one data point per row- now have multiple rows

---

# Building/District Record Redesign

- Building and District records have same layout for all reporting periods
- New data to be collected<sup>(N)</sup>
  - Date of scheduled math administration
  - School Improvement Grant required data

---

# Special Ed OSEP Compliance Period

- U.S. Dept. of Education Office of Special Education conducted site visit
- Issues found in match between data in EMIS and data in districts (first year GE)
- Corrective action requires ODE to have district submit corrected data when
  - Issue with a specific student identified, that
  - Impacts one of the Federal SE measures
- Will count against Data Quality measure

---

# Special Ed OSEP Compliance Period

- New reporting period(s)
- Only collect data on students on list from Office for Exceptional Children at ODE
- Only record type will be the GE record
- Will add a column to record to indicate type of correction (add, delete, update)
- Window could go back three years if ETR involved
- Good chance this will be handled outside the SIS- ODE will provide spreadsheet to enter data then load into Data Collector as flat file

---

# Career Tech Updates

- Usual annual updates
  - Subject codes
  - Assessment codes<sup>(N)</sup>
  - Programs of Concentration<sup>(N)</sup>
- Updates to GV follow-up record
- New program code for HOSA<sup>(N)</sup>
- Name update- Work & Family Studies to Family & Consumer Sciences

---

# Overrides via Record Type

- New record types (one for staff, one for student)
- Submit overrides for most students and staff along with the rest of the data
  - Students who should have been withdrawn in previous period
  - Staff who separated and should have been reported with reason and date in previous period
- Will still be some staff/student overrides via Helpdesk requests
- No change to other measure override
- ODE will provide data entry document/extract

---

# Miscellaneous Changes

- All ECE students take ASQ/SE, including repeat students
- Staff name in parts
- Subject Code that end in 0000<sup>(FY13)</sup>
- CTAG Program Code definition
- Add GE record consent outcome codes<sup>(N)</sup>
- A few Social Studies subject code updates<sup>(FY13)</sup>
- Special Ed Events for Non-Pub students<sup>(N)</sup>
- RIEP Parent Refusal clarification

---

# Q & A
