CORRECTIVE ACTION

When a program was not in compliance with applicable laws and rules, the Department placed the licensee on a corrective action plan that outlined the violation issues and steps that needed to be taken to address the violations. The action plan process began by notifying programs of any noncompliance issues that required corrective action. The corrective action plan submitted needed to address the following questions:

- What short-term or immediate action has been taken to correct the area of noncompliance?
- Please explain the planned changes to your system(s) or procedure(s) to prevent this noncompliance in the future?
- Who will be responsible for the ongoing implementation of the planned changes to your system(s) or procedure(s) to continue to prevent this noncompliance?

Licensing specialists verify that corrective action plans have been implemented during each program's next unscheduled compliance visit.
