

High Quality Individual Career Plan & Additional Resources

High schools are required to provide counseling and support services for Curriculum Choice students related to their Individual Career Plans. Schools should document evidence that an Individual Career Plan (ICP) has been developed for each student that specifies the student's matriculating to a two-year degree program, acquiring a business and industry credential, or entering an apprenticeship and contains the counseling and support services provided for the student.

High Quality Individual Career Plan should include the following elements:

1. Career goals
2. Interests, skills and knowledge that support career goals
3. High school classes related to career goals
4. Outside-of-school activities to reach career goals
5. Specialized training needed to meet career goals during and after high school
6. Career/Passport Portfolio
7. Record of assessments both current and future
8. Identify post graduation plan which may include either a 2-year degree program, acquiring a business and industry credential, or entering an apprenticeship program
